QUESTION 1

While performing routine maintenance a technician has had to re-install System Platform. Which statement describes what must be done next?

A. The SMGR Template must be installed.

B. The SMGR Template must be installed, followed by the utilities domain (in that order),

C. The utilities domain must be installed, followed by the SMGR Template (In that order),

D. The Dom-0 must be installed, followed that order) by the utilities domain and then the SMGR Template (in that order).

Correct Answer: A

QUESTION 2

Application definitions allow system administrators to define and mange individual applications each with their own attributes. The definitions allow administrators to add one or more such applications to which of the following?

A. application programs

B. application data sets

C. application sequences

D. application lists

Correct Answer: C

QUESTION 3

Which component of the Communication Profile can be changed by modifying a user via Communication profile editor?

A. Communication Address

B. Session Manager Profile

C. Endpoint Profile

D. Messaging Profile

Correct Answer: B

QUESTION 4

A new feature server has been deployed in the network. The feature server must be applied to all calls made and received by the user. A technician has been asked to make the necessary arrangements. After adding a SIP Entity and

Entity Link, which sequence describes the next steps that should be taken?

A. Navigate to the user\\'s User Profile and open the Session Manager Profile. From the Originating Application Sequence drop down list, select the new Application Sequence. Repeat for the Terminating Application Sequence drop down list. Mark them both as being Mandatory.

B. Define the new feature as an Application. Add the Application to an Application Sequence. Mark the Application Sequence as Mandatory. Add the Application Sequence to user\\'s User Profile.

C. Create a new Application Sequence or edit one that already exists. Add details of the new feature to the Application Sequence. Mark the new feature as being mandatory. Apply the Application Sequence to user\\'s Originating and Terminating Application Sequences In their Session Manager Profile.

D. Define a new Application that details the new feature. Add the new Application to an Application Sequence. Mark the new feature as being mandatory. Apply the Application Sequence to both Originating and Terminating Application Sequences in the user\\'s Session Manager Profile.

Correct Answer: C

QUESTION 5

On a SIP Entity that is defined as type session Manager, what should be defined?

A. an adaptation

B. listening ports

C. an outbound proxy

D. a credential name

Correct Answer: B

QUESTION 6

A technician wants to schedule a bulk operation to take place at a convenient time in the future. What are two methods for scheduling bulk operations? (Choose two.)

A. # Sh exportUpmUsers.sh -u admin -p adminl23 -t 2013:05:01:12:00:00

B. # sh exportUpmUsers.sh -u admin -p adminl23 -d 2013:05:01:12:00:00

C. Navigate to Users > User Management, click \\'More Options\\' and select \\'Import Users\\'. Choose \\'schedule\\' in the options.

D. Navigate to Users > User Management, click \\'More Options\\' and select \\'Export Users\\'. Choose \\'schedule\\' in the options.

Correct Answer: CD

QUESTION 7

What is validated when the Transport Layer Security (TLS) handshake and mutual TLS authentication is performed between the SIP entity and Session Manager?

A. entity link

B. entity name

C. domain

D. certificate

Correct Answer: D

QUESTION 8

When performing a remote backup of system Manager data the administrator is asked for a user name and password. Which statement best explains why a user name and password are required?

A. The backed-up data file is encrypted. The username and password are used in encryption process and subsequently to access the file on restoring backed up data.

B. The backed-up data is stored on a remote server using SCP. The user name and password are used to login remote server.

C. Because System Manager Date is being exported from the server for security and authentication purpose system Manager once again checks the administrator\'s credentials.

D. All System Manager Data is backed up to common storage repository setup during installation. For system Manager to access the repository the correct user name and password must be supplied.

Correct Answer: B

QUESTION 9

Digit Conversion in Adaptation can be specified to modify "origination" type headers. Which three are origination / source type URIs? (Choose three.)

A. Request-URI

D. DomainChangeAdapter

E. DefaultAdapter

Correct Answer: B

QUESTION 12

While reviewing the Event Logs on the Session Manager, you notice an ALERT message: (OP_AFW17504) "SIP firewall white list configuration failed, retaining existing configuration." Which action should you perform when you see this alert?

A. Access the SIP firewall white list configuration and verify that the configuration is correct.

B. Access the SIP firewall configuration and change the RULE log type to none to not have these ALERTS appear in the
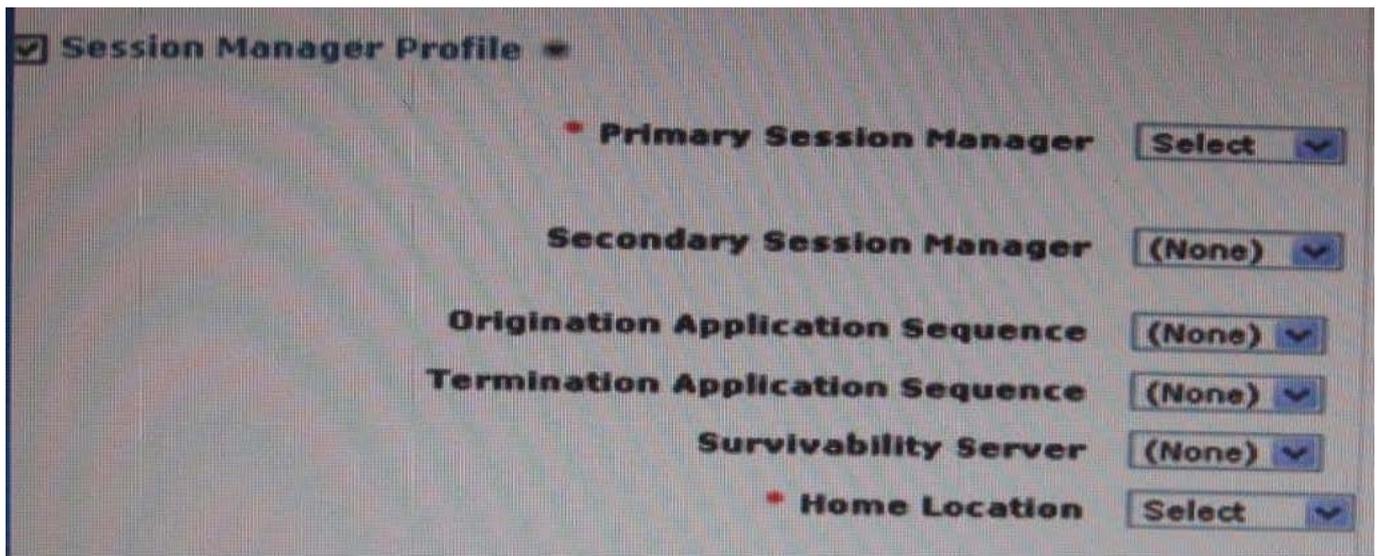

EVENT logs.

C. Access the SIP firewall configuration and Load the ASM Default Configuration.

D. Disregard these messages as they are sent to the Event Logs and do not generate alarms.

Correct Answer: A

QUESTION 13

From which Session Manager Profile field would an administrator define the local server for failover from the core?

A. Primary Session Manager

B. Secondary Session Manager

C. Origination Application Sequence

D. Termination Application Sequence

E. Survivability Server

Correct Answer: B

QUESTION 14

Which header in the request is considered by Session Manager when it is trying to match a dialed number?

A. Session Manager attempts to match the FROM header of a request to a defined dial pattern.

B. Session Manager attempts to match to the header of a request to a defined dial pattern.

C. Session Manager attempts to match the request-URI header of a request to a defined dial.

D. Session Manager attempts to match the ROUTE header of a request to a defined dial pattern.

Correct Answer: C

QUESTION 15

R has started importing a file containing many user records. What will SMGR do if it encounters a record it cannot import?

A. It will abort the operation and roll back any successfully imported records from the import file.

B. Whether SMGR will abort and rollback the operation or continue processing records is entirely configurable.

C. Whether SMGR will abort or continue processing records is entirely configurable; but you cannot rollback successfully imported users.

D. It will continue processing the rest of the import file and collate the failures into a single XML document that can be retrieved following the import.

Correct Answer: B
