QUESTION 1

What is the maximum size of a stable device partition?

A. 1024 MB

B. 2040 MB

C. 1 GB

D. 1 TB

Correct Answer: D

QUESTION 2

Which of the following statements describe the behavior of Publications? (Choose 2)

A. Improve replication performance

B. Degrade replication performance

C. May centralize administrative effort

D. May reduce total administrative effort

Correct Answer: CD

QUESTION 3

Which of the following are TRUE about the scan batch size configuration parameter? (Choose 2)

A. Number of log records sent to Replication Server in each batch

B. Number of times RepAgent sleeps after sending log records to Replication Server

C. RepAgent sets secondary truncation point after sending batch of log records

D. Number of log records sent from inbound queues to outbound queues

Correct Answer: AC

QUESTION 4

Function string classes are associated with? Function string classes are associated with

A. The primary database connection.

B. Each Replication Definition.

C. Each subscription.

D. The replicate database connection.

Correct Answer: D

QUESTION 5

What action must be taken to properly affect a change to a RepAgent configuration parameter in a running Replication Server System?

A. The RepAgent connection to the primary database must be suspended before a change is made to the parameter and then the connection must be resumed.

B. The RepAgent thread must be stopped before a change is made to the parameter and then restarted.

C. The parameter can be modified at any time and the RepAgent connection to the primary database must be suspended then be resumed before the modification is applied.

D. The parameter can be modified at any time and the RepAgent thread must be stopped and restarted before the modification is applied.

Correct Answer: D

QUESTION 6

Which of the following default function string classes cannot participate in class inheritance?

A. Rs_default_function_class

B. Rs_ms_function_class

C. Rs_sqlserver_function_class

D. Rs_db2_function_class

Correct Answer: C

QUESTION 7

Which of the following statements is TRUE about stored procedure replication?

A. Multiple Replication Definitions can be created for a stored procedure.

B. To create a subscription to a stored procedure Replication Definition, only the "create subscription" command can be used.

C. The name of the replicate stored procedure can be different from the name of the primary stored procedure.

D. In a stored procedure Replication Definition, the "searchable parameters" clause can be specified but does not fulfill any function.

Correct Answer: C

QUESTION 8

What is the serialization method with the highest degree of parallelism called?

A. Wait_for_start.

B. Isolation level 3.

C. No_wait.

D. None.

Correct Answer: C

QUESTION 9

Which of the following will NOT improve the performance of Warm Standby?

A. Increasing the sqt_max_cache_size parameter

B. Implementing Parallel DSI

C. Creating a database Replication Definition

D. Increasing the RepAgent scan batch size

Correct Answer: C

QUESTION 10

A Replication Server CANNOT be quiesced when? (Choose 3)

A. Tere are no materialization queues.

B. Otbound DSI queues have been applied and acknowledged.

C. Rutes have been suspended.

D. Otbound DSI connections have been suspended.

E. Te RSSD dataserver has been shut down.

F. Tere are either no transactions or only open transactions on the inbound queues.

Correct Answer: CDE

QUESTION 11

Which of the following statements is TRUE regarding parallel dsi?

A. The serialization method refers to what order the transactions on different threads will start.

B. The partitioning method refers to what order the transactions on different threads will start.

C. The partitioning that will yield the least amount of contention is the user method.

D. The serialization method refers to the servers ability to recognize which transactions can be applied in parallel and which transactions can be grouped.

Correct Answer: A

QUESTION 12

For a Replication Server to be the source of a route, what is necessary?

A. At least one DSI connection to a user database

B. Replication Server RSSD requires a RepAgent

C. RSSD must be hosted in an Adaptive Server Enterprise

D. Replication Server requires SA access to a second Replication Server

Correct Answer: B

QUESTION 13

Name the Sybase provided function string that can be used as a parent class for user custom classes?

A. Rs_sqlserver_function_class

B. Rs_default_function_class

C. Rs_ms_function_class

D. Rs_db2_function_class

Correct Answer: B

QUESTION 14

Function strings can be used to? Choose 3)

A. Mdify updates flowing to a RDB.

B. Gnerate syntax for data flowing to a non-Sybase database.

C. Udate publications.

D. Secify a WHERE clause in an article.

E. Call stored procedures when applying changes to a RDB.

Correct Answer: ABE

QUESTION 15

Which of the following are TRUE about request functions? (Choose 2)

A. A function replicate definition is needed for both the primary Replication Server and the replicate Replication Server.

B. A function Replication Definition is created in the Primary Replication Server.

C. Request functions do not use subscriptions.

D. Request functions do not have to be marked for replication.

Correct Answer: BC
