-  **800,000+** Satisfied Customers

QUESTION 1

The customer site requires Cisco 1400 bridges with 28dBi external antennas in a PTP design. What is the maximum power setting allowed by Cisco?

- A. 150 mW
- B. 155 mW
- C. 160 mW
- D. 145 mW

Correct Answer: B

QUESTION 2

When planning to perform a customer WLAN site survey, which three components and tasks should be considered? (Choose three.)

- A. Schedule a meeting with the customer to discuss the Statement of Work
- B. Complete the Pre-Survey Customer Questionnaire
- C. Schedule customer end user interviews
- D. Consider travel, access, and equipment requirements necessary to perform the site survey
- E. Schedule initial customer meeting and pre-survey walkthrough events
- F. Determine radio spectrum and channel allocation
- G. Determine AP and controller placement
- H. Determine customer training requirements

Correct Answer: BDE

QUESTION 3

Which option describes the method of measuring the beamwidth of an antenna?

- A. 30 degrees on each side from the main lobe gain
- B. 60 degrees on each side from the main lobe gain
- C. - 3 dB on each side from the main lobe gain
- D. - 6 dB on each side from the main lobe gain

Correct Answer: C

QUESTION 4

During the site survey kick-off meeting with your customer, they ask why you need to verify the existing network infrastructure. Which two reasons do you give them? (Choose two.)

- A. You need to verify the make, model, and software versions of all the equipment that will connect to the WLAN components in order to ensure compatibility.
- B. You need to verify that the equipment the WLAN components will connect to has sufficient memory capacity to support the additional WLAN connections.
- C. You need to verify that there are sufficient switch ports to support the new WLAN connections.
- D. You need to verify that the switches the WLAN components will connect to can supply 802.3af inline power, and that they have sufficient ports to support all the new WLAN devices.
- E. Depending on the type of APs that are planned for, the deployment may require different types of PoE to be supplied by the LAB switches.

Correct Answer: CD

QUESTION 5

When discussing a WLAN site survey project with a customer, which four things do you need to know about the scope of the project before starting? (Choose four.)

- A. Is the project funded?
- B. Internally, who or which group is driving this project?
- C. Is this a new project, an extension, or a modification to an existing WLAN?
- D. How many APs and controllers are projected to be needed?
- E. How many members of the customer IT staff will require training?
- F. Can the survey be accomplished in the time allotted?
- G. How many user groups will need to be interviewed?
- H. Will site survey engineers need to shadow user as they perform their work duties?

Correct Answer: ABCF

QUESTION 6

What three best practices should be performed for a Data-Only Survey? (Choose three.)

- A. reduce the power to 50% of the client max power
- B. reduce the power to 75% of the client max power

- C. disable DTPC
- D. enable DTPC
- E. 5 - 10 percent overlap
- F. 10 - 15 percent overlap

Correct Answer: ACF

QUESTION 7

Which two factors influence the density of APs in a data-only WLAN environment? (Choose two.)

- A. Channel reuse and WLAN bandwidth
- B. The type of controller chosen.
- C. The defined coverage area and customer needs.
- D. The number of clients that will roam through the facility.
- E. The number of APs dedicated to voice services.

Correct Answer: AC

QUESTION 8

An engineer is tasked with designing a WLAN. The customer is prioritizing data speeds to the desktop, but is also entertaining the idea of adding 802.11 phones in the future. Given this information, how should the engineer conduct the survey?

- A. consider the employee head count in congested office space and limit the edge of each cell to an RSSI of -67mW
- B. restrict AP cell edges to -67dB and be sure to strategically place APs in congested office spaces
- C. co-locate access points when possible to cover high user areas and place APs at each corner of the facility
- D. stagger the AP placements, and be sure to have a high signal to noise ratio that will accommodate the future VoIP devices

Correct Answer: B

QUESTION 9

You have completed a WLAN site survey for a customer. Which two pieces of information will need to be included in the final customer report? (Choose two.)

- A. Client association report
- B. Client inventory

- C. Printed cable scan certification results
- D. Map location of all APs and controllers
- E. WCS device inventory report of only the AP, WLC, and location server (MSE)

Correct Answer: CD

QUESTION 10

An engineer is conducting a passive survey. On what two items will data be collected? (Choose two.)

- A. RF interference
- B. rate shifting data rates
- C. roaming
- D. rouges
- E. encryption

Correct Answer: AD

QUESTION 11

A Cisco 1250 AP is deployed for a/b/g/n using version 7.0 software on 802.3af PoE. What are the three deployment results of the 5 GHz radio on channel size, spatial stream, and data rate? (Choose three.)

- A. 1 spatial stream
- B. 20 MHz
- C. 150 Mb/s
- D. 72 Mb/s
- E. 144 Mb/s
- F. 2 spatial streams
- G. 40 MHz
- H. 300 Mb/s

Correct Answer: ACG

QUESTION 12

What is the vertical height that a MAP should not exceed for proper deployment?

- A. 15 ft
- B. 30 ft
- C. 45 ft
- D. 55 ft

Correct Answer: B
