### QUESTION 1

You administer a Microsoft SQL Server 2008 R2 instance.

You need to rectify a damaged index without losing any data.

What should you do?

- A. Execute sp\_helpfile.
- B. Execute DBCC CHECKDB.
- C. Examine the msdb..suspect\_pagestable.
- D. Execute DBCC CHECKDB along with the REPAIR\_FAST clause.
- E. Execute DBCC CHECKDB along with the REPAIR\_REBUILD clause.
- F. Restore the database from the most recent full backup. Apply any differential and log backups.
- G. Use the ALTER DATABASE statement along with the SET EMERGENCY clause.
- H. Use the RESTORE DATABASE statement along with the PAGE clause. Create a new log backup. Apply all differential and log backups, including the most recent backup.
- I. Use the RESTORE DATABASE statement along with the PAGE clause. Apply any differential and log backups. Create a new log backup and then restore the new log backup.

Correct Answer: E

---

### QUESTION 2

You administer a SQL Server 2008 instance. Users report that applications that run on the server perform poorly. You suspect that the performance issues are related to table scans.

You need to use an appropriate Windows System Monitor object to capture the appropriate information.

Which performance object should you use?

- A. SQLServer:Databases
- B. SQLServer:Access Methods
- C. SQLServer:Buffer Manager
- D. SQLServer:Memory Manager

Correct Answer: B

---

### QUESTION 3

You administer a SQL Server 2008 instance that contains a very large database named FinanceDB.

You plan to create a maintenance plan that meets the following objectives for the FinanceDB database:

You need to ensure that the maintenance plan is executed in the minimum amount of time.

Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

- A. Use the Reorganize Index task.
- B. Use the Update Statistics task.
- C. Use the Shrink Database task.
- D. Use the Check Database Integrity task.
- E. Use the Rebuild index task.

Correct Answer: AE

---

#### QUESTION 4

You are mastering the company database, You should check the log of the a SQL Server 2005 Enterprise Edition everyday, You get the information on the torn page errors of the database. In order to fine the solution of the torn page, Which is the correct answer?

- A. You should utilize the latest database backup to restore only the torn page. Then restore any transaction logs which have been made since the full backup.
- B. You should reserve the newest database backup and then reserve any transaction logs which have been made since the past backup.
- C. You should operate DBCC CHECKDB.
- D. You should reserve the database from the newest database snapshot.

Correct Answer: A

---

#### QUESTION 5

You administer a remote SQL Server 2008 instance. Users report that the performance of the application is poor.

You use SQL Profiler to capture a workload of the remote instance to a trace table on the remote SQL Server instance.

You need to analyze the workload of the remote SQL Server instance on a local SQL Server instance by using the Database Engine Tuning Advisor.

What should you do?

- A. Use the data collector to recapture the workload.
- B. Use SQL Profiler to recapture the workload to a trace file.

- C. Enable the XP\_MSVER stored procedure on the local server.
- D. Enable the XP\_MSVER stored procedure on the remote server.

Correct Answer: B

---

#### QUESTION 6

You administer a SQL Server 200S instance. A user named Mary reports that she is waiting for a query to complete. You need to ascertain whether the query is blocked. Which tool should you use?

- A. The Windows System Monitor tool
- B. The Database Engine Tuning Advisor tool
- C. The Activity Monitor tool in Microsoft SQL Server Management Studio
- D. The Job Activity Monitor tool in Microsoft SQL Server Management Studio

Correct Answer: C

---

#### QUESTION 7

You maintain a SQL Server 2008 instance that runs on a computer that hosts several applications. You configure the SQL Server Agent service to run by using the SERVER1\AGENT account. You create a job named MailingList that requires a file to be written to a file server. The job fails to run because it does not have appropriate access to the file server. You plan to configure the SQL Server Agent service.

You need to perform the configuration such that only the SQL Server Agent service has read and write access to the file server.

Which account type should you use?

- A. Domain account
- B. Local System account
- C. Local Service account
- D. Network Service account

Correct Answer: C

---

#### QUESTION 8

You manage several SQL Server 2008 instances.

You plan to collect performance data periodically on all instances by using the data collector. All collected data must be stored in the same database hosted on a single instance.

You need to collect and load performance data in the management data warehouse every 6 hours.

Which data collection process should you implement?

- A. Create a cached data collection.
- B. Create a scheduled non-cached data collection.
- C. Create an on-demand non-cached data collection.
- D. Create two different SQL Agent jobs that are scheduled at the same time. One job creates a data collection and the other job uploads the data collection.

Correct Answer: B

---

### QUESTION 9

You administer a SQL Server 2008 instance that runs on a Windows Server 2003 computer. The instance uses mixed authentication mode.

You need to ensure that the SQL Server 2008 authenticated logins follow the same password complexity rules that are enforced by Windows Server 2003. You also need to ensure that the password complexity rules continue to be enforced.

Which two actions should you perform? (Each correct answer presents part of the solution.

Choose two.)

- A. Use the ALTER LOGIN ... HASHED statement to modify all logins.
- B. Use the ALTER LOGIN ... CHECK\_POLICY = ON statement to modify all logins.
- C. Use the ALTER LOGIN ... CHECK\_EXPIRATION = ON statement to modify all logins.
- D. Use Policy-Based Management to create a policy that prevents any violation of these rules.
- E. Create an SQL Server Agent job that runs periodically to raise an alert if a rule violation is detected.

Correct Answer: BD

---

### QUESTION 10

You maintain multiple SQL Server 2008 instances.

You develop a failure recovery strategy.

You need to find out the edition and the build of SQL Server that is deployed in your environment.

What should you use to find the required information?

- A. SELECT @@VERSION
- B. SELECT \* FROM sys.dm\_os\_sys\_info
- C. DBCC HELP

D. EXEC xp\_msver

Correct Answer: A

---

### QUESTION 11

You administer a Microsoft SQL Server 2008 R2 instance.

A disk drive that contains the files for the database is lost. The drive has been replaced, but the data files have been irrevocably lost.

You need to restore the database.

What should you do?

A. Execute sp\_helpfile.

B. Execute DBCC CHECKDB.

C. Examine the msdb..suspect\_pagestable.

D. Execute DBCC CHECKDB along with the REPAIR\_FAST clause.

E. Execute DBCC CHECKDB along with the REPAIR\_REBUILD clause.

F. Restore the database from the most recent full backup. Apply any differential and log backups.

G. Use the ALTER DATABASE statement along with the SET EMERGENCY clause.

H. Use the RESTORE DATABASE statement along with the PAGE clause. Create a new log backup. Apply all differential and log backups, including the most recent backup.

I. Use the RESTORE DATABASE statement along with the PAGE clause. Apply any differential and log backups. Create a new log backup and then restore the new log backup.

Correct Answer: F

---

### QUESTION 12

You maintain multiple SQL Server 2008 instances on the same physical computer.

Users can connect to the default instance but are unable to connect to the named instances. You verify that currently all SQL Server instances run.

You need to start the service required to connect to the named instances.

Which Service should you start?

A. Server

B. SQL Server Agent

C. SQL Server Browser

D. SQL Active Directory Helper

Correct Answer: C
