QUESTION 1

You administer a SQL Server 2008 instance that contains a database named AdventureWorks. The AdventureWorks database contains the Products table. You create a Merge Replication topology and a Publication to replicate the Products

table to the SQL Server instances at remote locations. The Publication has a 21-day retention period. When a user returns from a one-month vacation, she discovers that her database does not contain the most recent data. The Windows

Event log states the following error message:

"Replication: expired subscription dropped."

You need to obtain the most recent data in the database of the user. You also need to ensure that future data changes are appropriately replicated.

What should you do?

A. Recreate the publication.

B. Upload unsynchronized changes.

C. Upload unsynchronized changes, and then reinitialize the publication.

D. Reinitialize the publication and immediately generate a new snapshot.

Correct Answer: D

QUESTION 2

You maintain a default SQL Server 2008 instance.

You plan to configure FILESTREAM data to meet the following requirements:

Enable FILESTREAM for file I/O streaming access.

Allow remote client computers to have streaming access to FILESTREAM data.

You need to ensure that FILESTREAM data is enabled.

Which service should you configure?

A. SQL Server

B. SQL Server Full Text

C. SQL Server VSS Writer

D. Distributed File System

Correct Answer: A

QUESTION 3

You maintain a SQL Server 2008 instance.

You have an existing database maintenance plan that performs the following tasks:

Rebuilds indexes.

Checks database integrity.

Writes a report to a text file.

You need to ensure that an e-mail message is sent to the operators when the maintenance plan fails to execute successfully.

What should you modify?

A. The instance.

B. The SQL Server service.

C. The SQL Server Agent job.

D. The database maintenance plan.

Correct Answer: C

QUESTION 4

You maintain a default SQL Server 2008 instance.

You plan to configure FILESTREAM data to meet the following requirements:

Enable FILESTREAM for file I/O streaming access.

Allow remote client computers to have streaming access to FILESTREAM data.

You need to ensure that FILESTREAM data is enabled.

What should you do?

A. Configure the SQL Server service.

B. Configure the SQL Server Full Text service.

C. Modify the Volume Shadow Copy settings.

D. Modify the Background Intelligent Transfer Service settings.

Correct Answer: A

QUESTION 5

You administer two SQL Server 2008 instances named Instance1 and Instance2. A database named AdventureWorks resides on Instance1. You move the AdventureWorks database from Instance1 to Instance2. A SQL Server login named Mary with the password "Re#99$45" is used by a user to access the database on Instance1. You create the same SQL Server login on Instance2. The user attempts to access the AdventureWorks database on Instance2 by using the SQL Server login Mary. However, the user receives an error message which indicates that the access to the AdventureWorks database is denied. You need to ensure that the user can access the AdventureWorks database. Which Transact- SQL statements should you execute on Instance2?

A. USE AdventureWorks; ALTER USER Mary WITH LOGIN = Mary;

B. USE AdventureWorks; ALTER LOGIN Mary ENABLE;

C. USE AdventureWorks; ALTER LOGIN Mary WITH PASSWORD = \\'Re#99$45\\' UNLOCK;

D. USE AdventureWorks; ALTER LOGIN Mary WITH DEFAULT_DATABASE = AdventureWorks;

Correct Answer: A

QUESTION 6

You troubleshoot the performance of a SQL Server 2008 instance. You need to identify the longest- running common language runtime (CLR) queries. Which dynamic management view should you use?

A. sys.dm_os_wait_stats

B. sys.dm_exec_requests

C. sys.dm_exec_sessions

D. sys.dm_exec_query_stats

Correct Answer: D

QUESTION 7

You manage several SQL Server 2008 instances. You plan to collect performance data periodically on all instances by using the data collector. All collected data must be stored in the same database hosted on a single instance. You need to collect and load performance data in the management data warehouse every 6 hours. Which data collection process should you implement?

A. Create a cached data collection.

B. Create a scheduled non-cached data collection.

C. Create an on-demand non-cached data collection.

D. Create two different SQL Agent jobs that are scheduled at the same time. One job creates a data collection and the other job uploads the data collection.

Correct Answer: B

QUESTION 8

You administer a SQL Server 2008 instance that contains a database named AdventureWorks. You are log shipping the Adventureworks database to a remote SQL Server 2008 instance. During the weekend, the primary SQL Server instance required a restart. After the weekend, you discover that log shipping has stopped working. You need to troubleshoot log shipping of the Adventureworks database. What should you do?

A. Verify whether the SQL Server Agent is started on the primary server.

B. Verify whether the AdventureWorks database uses the Simple recovery model.

C. Verify whether the SQL Server Volume Shadow Copy Service (VSS) Writer is started on the primary server.

D. Execute a DBCC CHECKDB statement on the AdventureWorks database by using the EXTENDED_LOGICAL_CHECKS option.

Correct Answer: A

QUESTION 9

You administer a SQL Server 2008 instance that runs on a Windows Server 2003 computer. The instance uses mixed authentication mode. You need to ensure that the SQL Server 2008 authenticated logins follow the same password complexity rules that are enforced by Windows Server 2003. You also need to ensure that the password complexity rules continue to be enforced. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

A. Use the ALTER LOGIN ... HASHED statement to modify all logins.

B. Use the ALTER LOGIN ... CHECK_POLICY = ON statement to modify all logins.

C. Use the ALTER LOGIN ... CHECK_EXPIRATION = ON statement to modify all logins.

D. Use Policy-Based Management to create a policy that prevents any violation of these rules.

E. Create an SQL Server Agent job that runs periodically to raise an alert if a rule violation is detected.

Correct Answer: BD

QUESTION 10

You administer a SQL Server 2008 instance that contains a database named DB1. DB1 contains a table named Table1. The DB1 database includes a stored procedure named Procedure1. Procedure1 uses a sp_executesql Transact-SQL statement to select data from Table1. According to business requirements, users are not allowed to access tables directly in any database. When a user executes Procedure1, the following exception is raised:

"Msg 229, Level 14, State 5, Line 1

The SELECT permission was denied on the object \\'Table1\\', database \\'DB1\\', schema \\'dbo\\'." You need to ensure that the user can successfully execute Procedure1 without violating the business requirements.

What should you do?

A. Execute the GRANT SELECT ON dbo.Table1 TO User1 Transact-SQL statement.

B. Execute the GRANT EXECUTE ON dbo.Procedure1 TO User1 Transact-SQL statement.

C. Alter Procedure1 and add the WITH EXECUTE AS OWNER option to its header.

D. Alter Procedure1 and add the EXECUTE AS USER = \\'dbo\\' option immediately before the call to the sp_executesql stored procedure.

Correct Answer: C

QUESTION 11

You administer a SQL Server 2008 instance. The security policy permits members of a Windows group named CONTOSO\Sales to establish new connections to the SQL Server instance only during business hours between 07:00 hours and

19:00 hours. Other users may connect to the SQL Server instance any time.

You write the following Transact-SQL statements.

CREATE TABLE Security.RestrictedLogonHours (

Id int NOT NULL IDENTITY(1,1),

GroupName sysname NOT NULL,

RestrictedTimeStart time NOT NULL,

RestrictedTimeStop time NOT NULL,

CONSTRAINT RestrictedLogonHours_pk

PRIMARY KEY CLUSTERED(Id)

);

INSERT INTO Security.RestrictedLogonHours (

GroupName,

RestrictedTimeStart,

RestrictedTimeStop

)

VALUES (

\\\'CONTOSO\Sales\\\',

CAST(\\\'07:00\\\' AS time),

CAST(\\\'19:00\\\' AS time)

);

You need to implement the company security policy that is stored in the RestrictedLogonHours table. What should you do?

A. Create a logon trigger that denies the connection to the CONTOSO\Sales group during non- business hours.

B. Create a SQL Server Agent job that causes the SQL Server Windows service to pause during non- business hours.

C. Create a SQL Server Agent job that periodically looks for and kills connections made by the CONTOSO\Sales group during non-business hours.

D. Create a policy that uses a condition based on the Server Audit facet. Use the policy to deny the connection to the CONTOSO\Sales group during non-business hours.

Correct Answer: A

QUESTION 12

You manage a SQL Server 2008 instance. You upgrade a SQL Server 7.0 database to the SQL Server instance. You need to ensure the early detection of suspect pages in the database. What should you do?

A. Turn on the TRUSTWORTHY database option for the database.

B. Set the database compatibility level option to 10 for the database.

C. Set the PAGE_VERIFY database option to CHECKSUM for the database.

D. Set the PAGE_VERIFY database option to TORN_PAGE_DETECTION for the model database.

Correct Answer: C
