### QUESTION 1

Your company plans to deploy three SharePoint Server 2010 Service Pack 1 (SP1) server farms named Farm1, Farm2, and Farm3.

During the initial planning phase, you identify the following high-level requirements for each farm:

- Farm1 will host shared service applications.
- Farm2 will host content for the human resources department. The farm content will be searchable.
- Farm3 will host content for all users. The users will be able to open Microsoft Word documents stored in the farm directly from a web browser.

You identify the following deployment requirements:

- Server virtualization will not be used.
- Farm1 must host service applications whenever possible.
- The service applications must not run on servers that host webpages for end users.
- The users must be able to access all services and all content in all of the farms if a single server fails.

You need to identify the minimum number of SharePoint servers required for each farm. How many servers should you identify? To answer, drag the appropriate number to the correct farm in the answer area.

Select and Place:

Number of Servers	Answer Area
<input type="text" value="1"/> <input type="text" value="2"/> <input type="text" value="4"/> <input type="text" value="6"/>	Farm1 <input type="text"/>
	Farm2 <input type="text"/>
	Farm3 <input type="text"/>

Correct Answer:

Number of Servers	Answer Area
<input type="text" value="1"/> <input type="text" value="2"/> <input type="text" value="4"/> <input type="text" value="6"/>	Farm1 <input type="text" value="2"/>
	Farm2 <input type="text" value="4"/>
	Farm3 <input type="text" value="4"/>

### QUESTION 2

You are a SharePoint administrator for Trey Research.

You plan to upgrade the existing Microsoft Office SharePoint Server 2007 environment to SharePoint Server 2010 Service Pack 1 (SP1).

You need to recommend a solution to back up the business critical lists. You must restore the lists in the minimum amount of time.

What should you recommend?

- A. automated content deployment
- B. scheduled granular backups
- C. server farm backups
- D. database replication

Correct Answer: C

---

### QUESTION 3

You are planning a SharePoint Server 2010 Service Pack 1 (SP1) server farm. You need to recommend which editions of Microsoft SQL Server 2008 R2 must be deployed to support online index rebuilding.

Which editions should you recommend? (Each correct answer presents a complete solution. Choose all that apply.)

- A. Workgroup
- B. Standard
- C. Enterprise
- D. Datacenter
- E. Web

Correct Answer: CD

---

### QUESTION 4

You plan to deploy SharePoint Server 2010 Service Pack 1 (SP1) for the human resource department.

You plan to create two SharePoint groups named Group 1 and Group 2.

The groups must have the following permissions:

Users in Group 1 must be able to view pages and documents, but must be prevented from viewing historical versions of pages and documents and permissions of users. Users in Group 2 must be able to view pages and list items, and to download documents.

You need to identify the permission level required for each group. The solution must minimize the number of permissions assigned to each group.

Which permission levels should you identify? To answer, drag the appropriate permission level to the correct group in the answer area.

Select and Place:

www.PassApply.com

Correct Answer:

www.PassApply.com

### QUESTION 5

You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm. The farm contains 10 front-end Web servers that have the query server role installed.

You plan to index 15 million items.

You need to recommend a solution to minimize the amount of time it takes to return search results to end users.

What should you include in the recommendation?

- A. crawl rules
- B. index partitioning
- C. authoritative pages
- D. crawler impact rules

Correct Answer: B

### QUESTION 6

You plan to deploy a SharePoint Server 2010 Service Pack1 (SP1) server farm.

The network has Microsoft System Center Operations Manager 2012 installed.

You need to ensure that Operations Manager can monitor availability of the SharePoint service applications.

What should you recommended deploying?

- A. a management pack
- B. a Web Part pack
- C. a feature pack
- D. a solution package

Correct Answer: A

### QUESTION 7

You are the administrator for a SharePoint Server 2010 Service Pack 1 (SP1) farm. The farm topology is as shown in the following table.

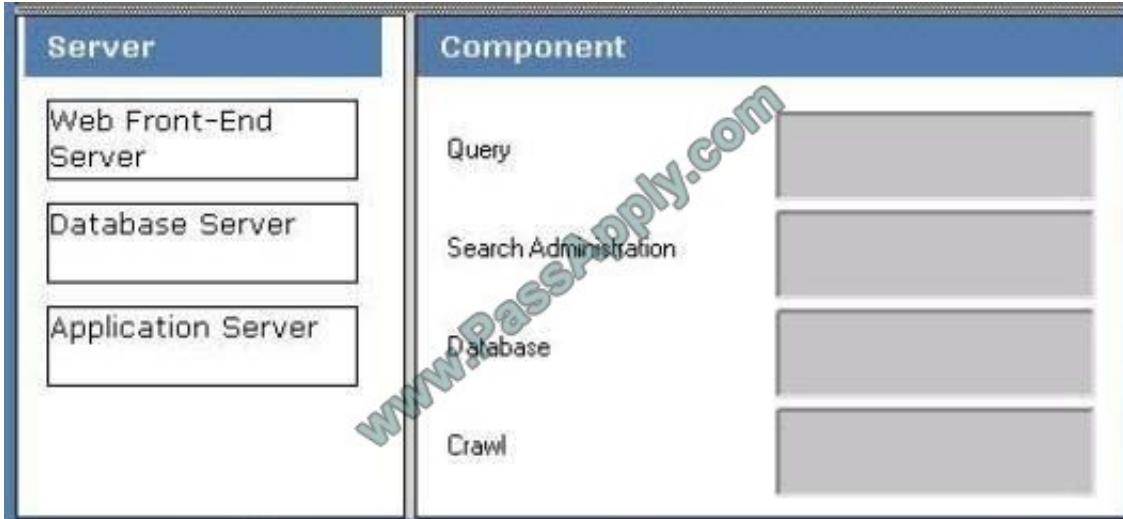

Servers	Roles
Web Front-End Server	<ul style="list-style-type: none"><li>• Web Front End</li><li>• All service applications</li></ul>
Database Server	<ul style="list-style-type: none"><li>• Microsoft SQL Server 2008 R2</li></ul>

You want to improve the performance of the search.

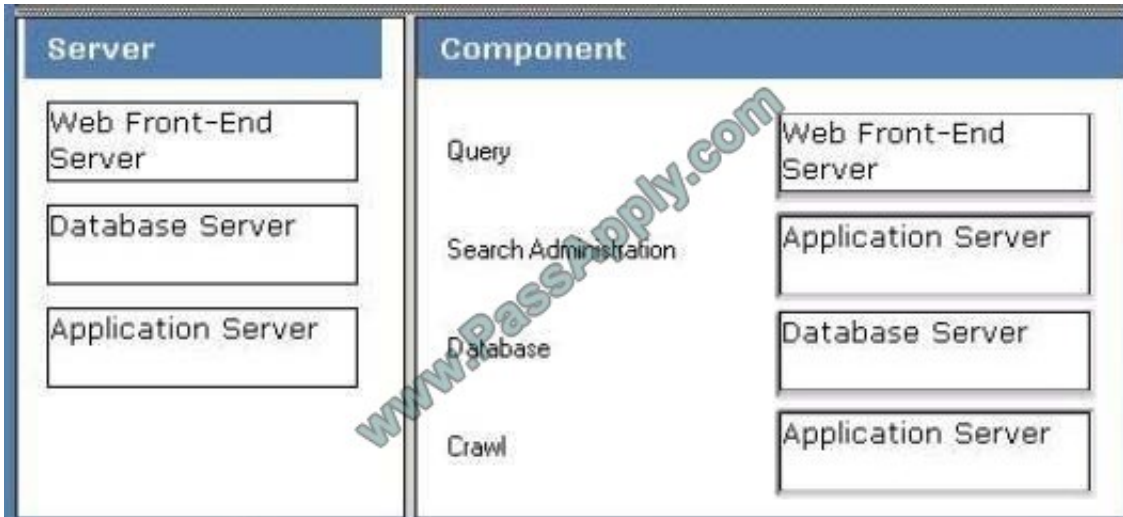

You need to add an Application Server.

Which component should you place on each of the three servers? (To answer, drag the appropriate server or server to the correct location or locations in the answer area.)

Select and Place:

Correct Answer:

### QUESTION 8

You plan to implement SharePoint Server 2010 for your company's public Website. The site will display information about the products that the company sells.

You need to ensure that all the Web pages in the site display the company logo at the top of the page and a copyright notice at the bottom of the page.

What should you implement?

- A. master pages
- B. variations
- C. page layouts

D. site templates

Correct Answer: A

---

#### QUESTION 9

You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm. The farm contains a web application. The web application contains several sites in individual content databases.

You are planning the maintenance strategies for the content databases. You need to plan a strategy to release unused space from the databases.

Which tool should you use?

- A. Storage Explorer
- B. Windows System Resource Manager (WSRM)
- C. SharePoint Health Analyzer
- D. Resource Monitor

Correct Answer: B

---

#### QUESTION 10

You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm. The farm contains an Excel Services service application. You plan to display a Microsoft Excel file in a Web Part.

The Excel file will contain the following:

Data from a Microsoft SQL Server database

Custom calculations written in Microsoft Visual Studio You need to identify which Excel Services configuration must be configured to display the Excel file.

What should you configure? To answer, drag the appropriate configuration to the correct location in the answer area.

Select and Place:

Configurations	Answer Area
a trusted data connection library	Data from a SQL Server database
a trusted data provider	Custom calculations written in Visual Studio
a trusted file location	Configuration
a user-defined function assembly	Configuration

Correct Answer:

Configurations	Answer Area
a trusted data connection library	Data from a SQL Server database
a trusted data provider	Custom calculations written in Visual Studio
	a trusted file location
	a user-defined function assembly

### QUESTION 11

You are the administrator for a SharePoint 2010 farm.

You need to move the content database from a Microsoft SQL Server named Server1 to an SQL Server named Server2 within the farm.

What should you do? (To answer, move the appropriate actions from the list of actions in the answer area and arrange them in the correct order.)

Select and Place:

Back up the database in Server1.

Restore the database in Server2.

Detach the database from Server1.

Remove the content database from the web application.

Add the content database to the destination web application.

Move the .mdf, .ndf, and .ldf files associated with the database from Server1 to Server2.

Restart any service applications and services that must be run against the database, including timer jobs and search crawls.

Pause any service applications and services that might attempt to run against the database, including timer jobs and search crawls.

Correct Answer:

Pause any service applications and services that might attempt to run against the database, including timer jobs and search crawls.

Remove the content database from the web application.

Back up the database in Server1.

Restore the database in Server2.

Add the content database to the destination web application.

Restart any service applications and services that must be run against the database, including timer jobs and search crawls.

## QUESTION 12

You are a SharePoint administrator for Northwind Traders.

The company has 20,000 employees distributed across 11 different departments. You plan to implement a SharePoint Server 2010 server farm for internal collaboration.

You need to recommend a solution that provides users with the ability to update their user attributes in Active Directory.

What should you recommend?

A. a User Profile Service Application

- B. Active Directory Federation Services (AD FS)
- C. Business Connectivity Services
- D. Active Directory Rights Management Services (AD RMS)

Correct Answer: A
