Discovery Methods
Global Conditions

QUESTION 2

You need to recommend a solution to provide remote connectivity for the development department users. The solution must meet the Intune requirements. What should you include in the recommendation?

A. Set Intune as the mobile device management authority.

B. Create a script to add the users to the Remote PC Connect group on the desktop computers.

C. From the Configuration Manager Console, modify the primary device property of the users.

D. From the Configuration Manager Console, deploy the Intune connector site system role.

Correct Answer: D

QUESTION 3

You need to identify the polling interval of Computer1, Computer2 and Computer3.

What should you identify? To answer, select the correct polling interval for each computer in the answer area.

Hot Area:

Answer Area

Computer1:

15
20
25
30

Computer2:

15
20
25
30

Computer3:

15
20
25
30

Correct Answer:

Answer Area

Computer1:

| 15 |
| 20 |
| 25 |
| 30 |

Computer2:

| 15 |
| 20 |
| 25 |
| 30 |

Computer3:

| 15 |
| 20 |
| 25 |
| 30 |

QUESTION 4

You need to identify which objects must be added to a single configuration Manager baseline to monitor the configuration settings and the presence of software updates on the computers of Customer2. Which two configuration manager objects should you identify? Each correct answer presents part of the solution.

A. a software updates group

B. a software update

C. a configuration item

D. a configuration baseline

E. an automatic deployment rule

Correct Answer: DE

QUESTION 5

Your network contains one Active Directory domain. The domain contains a deployment of Microsoft System Center 2012 R2 Configuration Manager. Configuration Manager is integrated with Windows Intune. All client computers and devices

are managed by using Configuration Manager.

You have a Wi-Fi network named Wi-Fi1.

You create a Wi-Fi profile named Wi-Fi1 and provision the profile for Windows RT 8.1 devices.

You create a collection named Collection1 that contains all of the devices that run Windows RT 8.1.

You need to ensure that the users who use the Windows RT 8.1 devices can connect to Wi-Fi1 without having to configure the wireless settings manually. The Wi-Fi profile must NOT be used on any other devices.

What should you do?

A. Deploy Wi-Fi1 to the All Users collection.

B. Deploy Wi-Fi1 to Collection1.

C. Deploy Wi-Fi1 to the All Mobile Devices collection.

D. Modify the profile properties of Wi-Fi1.

Correct Answer: A

QUESTION 6

You plan to deploy Microsoft Office 365 ProPlus to all of the users in your company.

You download the Office 365 ProPlus installation files.

You need to create a Microsoft Application Virtualization (App-V) package for the Office applications.

What should you do?

A. From the downloaded installation files, run setup.exe.

B. From a command prompt, run sftsequencer.exe.

C. From the Microsoft Application Virtualization Sequencer, run the Sequencing Wizard.
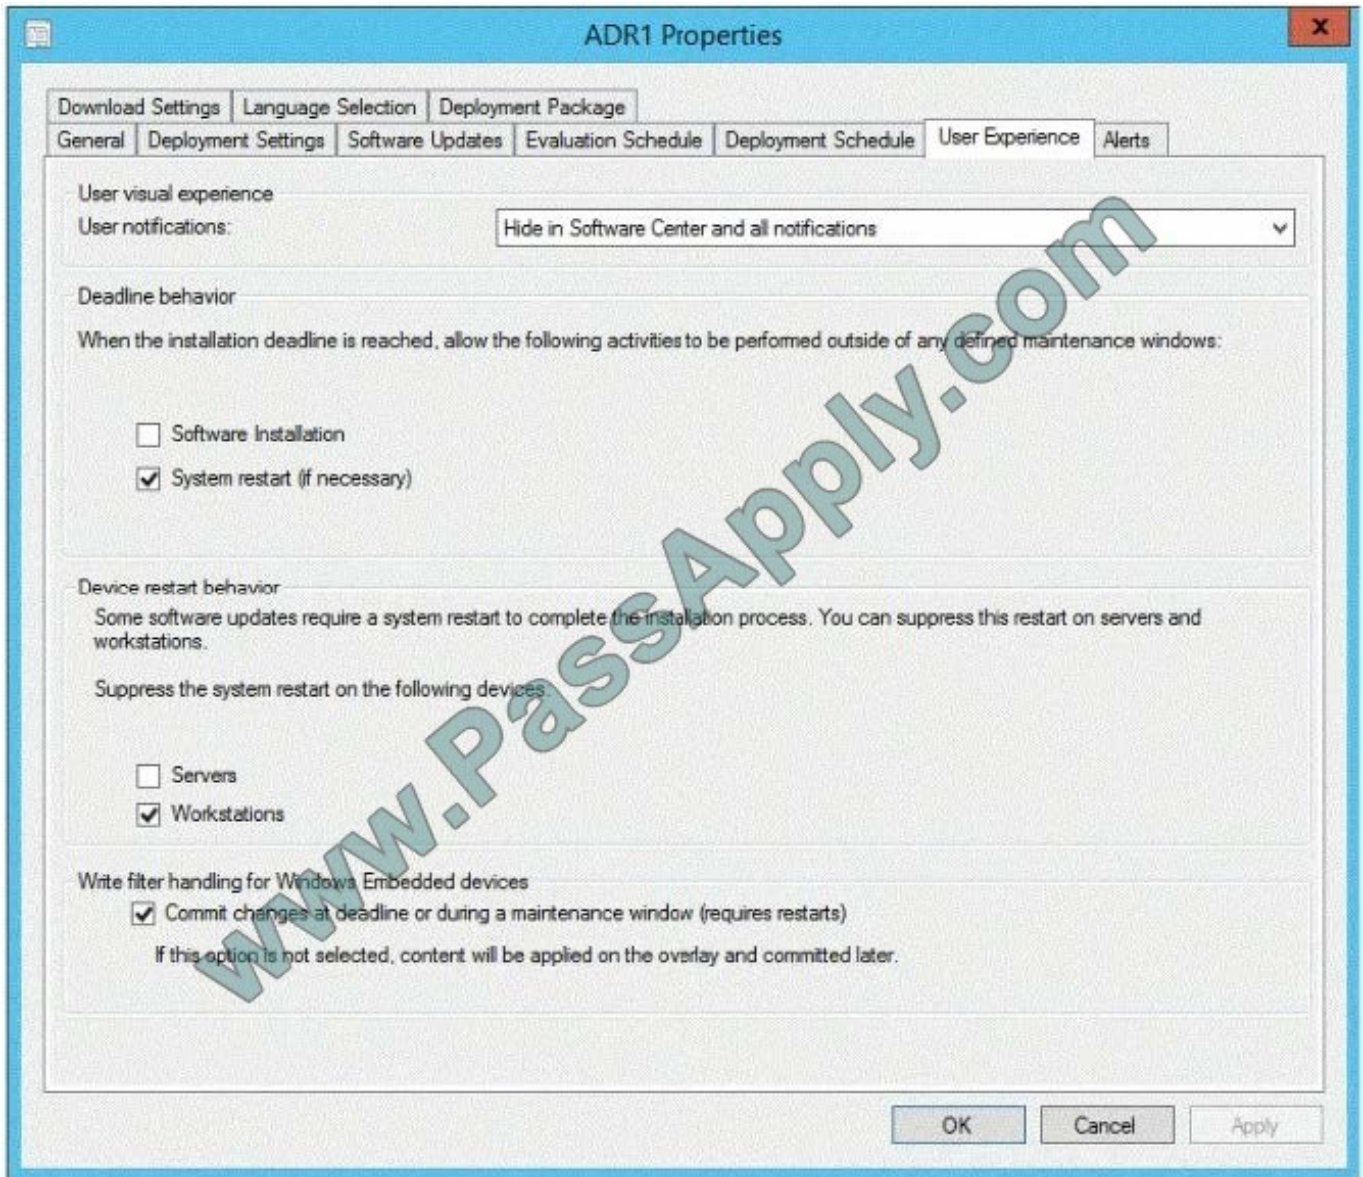

D. From Windows PowerShell, run New-AppvSequencerPackage.

Correct Answer: A

QUESTION 7

You have a deployment of Microsoft System Center 2012 R2 Configuration Manager.

You deploy an update to all client computers. The update requires a restart.

The automatic deployment rule that deploys the update is shown in the exhibit. (Click the Exhibit button.)

ADR1 Properties

Download Settings | Language Selection | Deployment Package
General | Deployment Settings | Software Updates | Evaluation Schedule | Deployment Schedule | User Experience | Alerts

User visual experience
User notifications: Hide in Software Center and all notifications

Deadline behavior
When the installation deadline is reached, allow the following activities to be performed outside of any defined maintenance windows:

☐ Software Installation
☑ System restart (if necessary)

Device restart behavior
Some software updates require a system restart to complete the installation process. You can suppress this restart on servers and workstations.

Suppress the system restart on the following devices:

☐ Servers
☑ Workstations

Write filter handling for Windows Embedded devices
☑ Commit changes at deadline or during a maintenance window (requires restarts)

If this option is not selected, content will be applied on the overlay and committed later.

OK | Cancel | Apply

Use the drop-down menus to select the answer choice that completes each statement.

Hot Area:

Answer Area

Client computers will restart [**answer choice**]
- only if initiated by a user.
- when the deadline is reached.
- as soon as the update is installed.

Users will [**answer choice**]
- never see any notifications for ADR1.
- see all notifications about the status of ADR1.
- only see notifications about ADR1 if their computer must be restarted.

Correct Answer:

Answer Area

Client computers will restart [**answer choice**]

only if initiated by a user.
when the deadline is reached.
as soon as the update is installed.

Users will [**answer choice**]

never see any notifications for ADR1.
see all notifications about the status of ADR1.
only see notifications about ADR1 if their computer must be restarted.

QUESTION 8

You have a deployment of Microsoft System Center 2012 R2 Configuration Manager.

You have laptops that run Windows 7 Enterprise and tablets that run Windows 8.1 Enterprise. All client computers have the Configuration Manager client installed.

You have an internally developed application named App1. There is a 32-bit version of App1 and a Windows Store version of App1. You plan to deploy App1 by using Configuration Manager.

You need to ensure that the laptops receive the 32-bit version of App1 only and the tablets receive the Windows Store app version of App1 only. The solution must minimize administrative effort.

Which three actions should you perform in sequence from Configuration Manager? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	Answer Area
Import two applications.	
Create one application.	
Deploy one application.	
Deploy two applications.	
Create one deployment type.	
Create two deployment types.	

Correct Answer:

Actions

Import two applications.

Deploy two applications.

Create one deployment type.

Answer Area

Create one application.

Create two deployment types.

Deploy one application.

QUESTION 9

You need to meet the technical requirement of Computer3.

What are three possible ways to achieve this goal? Each correct answer presents a complete solution.

A. Create a new antimalware policy.

B. Increase the priority of an antimalware policy.

C. Delete an antimalware policy.

D. Modify the membership of Collection2.

E. Modify the membership of Collection3.

Correct Answer: BCD

QUESTION 10

You plan to deploy Microsoft Office 365 ProPlus to all of the users in your company.

You download the Office 365 ProPlus installation files.

You need to create a Microsoft Application Virtualization (App-V) package for the Office applications.

What should you do?

A. From a command prompt, run sftsequencer.exe.

B. From the downloaded installation files, run setup.exe.

C. From Windows PowerShell, run New-AppvSequencerPackage.

D. From the Microsoft Application Virtualization Sequencer, run the Sequencing Wizard.

Correct Answer: B

QUESTION 11

You need to recommend a solution for deploying applications to the virtual desktops. What should you include in the recommendation?

A. Appv_client_setup_rds.exe with the /SHAREDCONTENTSTOREMODE parameter

B. Set-AppvClientConfiguration with the -LocationProvider parameter

C. Appv_client_setup.exe with the /SHAREDCONTENTSTOREMODE parameter

D. Set-AppvClientConfiguration with the -AllowHighCostLaunch parameter

E. Set-AppvClientConfiguration with The -Autoload parameter

F. appv_client_setup_rds.exe with the /ROAMINGFILEEXCLUSIONS parameter

Correct Answer: C

QUESTION 12

You have a Microsoft System Center 2012 R2 Configuration Manager primary site that is integrated with System Center Updates Publisher 2011.

You need to deploy third-party updates to users by using Configuration Manager. You must ensure that the update binary files are downloaded only to Update Publisher if a Configuration Manager client requests the update.

What should you do from Update Publisher?

A. Create a rule.

B. Create a publication.

C. Run the Add Software Update Catalog wizard.

D. Modify the Trusted Publishers options.

Correct Answer: C
