### QUESTION 1

Note: This question is part of a series of questions that use the same set of answer choices. Each answer choice may be used once, more than once, or not at all.

Your network contains a single Active Directory domain. The domain contains computers that run Windows 10 Enterprise.

The computers are configured as shown in the following table:

Computer name	Primary user	Computer type
PC_User1	User1	Laptop
PC_User2	User2	Laptop
PC_User3	User3	Tablet

When User1 works remotely, the user fails to access shared folders on the corporate network.

When User 2 and User3 work remotely, they successfully connect to the shared folders on the corporate network.

You need to ensure that User1 can connect to the shared folders without user interaction.

What should you do?

- A. Click Turn on password protected sharing.
- B. Disable Network Discovery.
- C. Modify the Profile settings of an incoming firewall rule.
- D. Run the Add-VpnConnectionTriggerApplication cmdlet.
- E. Run the New-NetFirewallRule cmdlet and specify the -Direction Outbound parameter.
- F. Run the Ncw-VpnConnection cmdlet.
- G. Run the Set-NetConnectionProfile cmdlet.
- H. Run the Set-VPNConnection cmdlet

Correct Answer: D

[https://technet.microsoft.com/en-us/library/dn296460\(v=wps.630\).aspx](https://technet.microsoft.com/en-us/library/dn296460(v=wps.630).aspx)

### QUESTION 2

Computer name	Operating system	Upgrade requirement
Computer1	Windows 7	Retain all installed applications.
Computer2	Windows	Remove all locally installed applications, but retain access to the user files.
Computer3	Windows 8	Remove all locally installed applications.

You have three computers configured as shown in the following table.

You plan to migrate the computers to Windows 10.

Which installation option should you use for each computer? To answer, select the appropriate options in the answer area.

Hot Area:

Computer1:

▼  
Custom  
Upgrade

Computer2:

### QUESTION 3

Your company is developing a Universal Windows Platform (UWP) app named App1. App1 is not published in the Windows Store.

You are provided with an AppX package for App1.

You need to install App1 locally.

What should you do first?

- A. From a Group Policy object (GPO), add a software installation package.
- B. From the Settings app, modify the for developers setting.

- C. Set the AppX Deployment Service (AppXSVC) to Automatic and restart the computer.
- D. Disable User Account Control (UAC).

Correct Answer: B

<https://msdn.microsoft.com/windows/uwp/get-started/enable-your-device-for-development>

---

#### QUESTION 4

You have a computer named Computer1 that has the following four hard disk drives installed:

You need to create a two-way mirror by using Storage Spaces. The solution must minimize data loss.

Which drives should you use?

- A. Drive 1 and Drive 2
- B. Drive 1 and Drive4
- C. Drive 2 and Drive 3
- D. Drive 3 and Drive 4

Correct Answer: D

<http://www.windowscentral.com/how-use-storage-spaces-windows-10>

---

#### QUESTION 5

Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series.

Start of repeated scenario

Your network contains a single Active Directory domain named contoso.com. All computers are members of the domain and run the 64-bit version of Windows 10 Enterprise.

On a test computer named Computer\_Test1, you pin several company-specific applications in a group named Contoso Apps, and then you export the start menu layout to a file named contoso.xml.

You install Client Hyper-V on a computer named Computer6.

You identify the following requirements.

- 

Install the Hyper V feature on a computer named Computer1.

- 

Use virtual smart card authentication on a computer named Computer2.

- Enable Secure Boot on a computer named Computer3.
- Connect a computer named Computer4 to a projector by using Miracast.
- Ensure that a user named User 1 can use keyboard shortcuts by pressing one key at a time.
- Ensure that you can share the clipboard between Computer6 and the virtual machines running on Computer6.
- Add the Contoso Apps group to the Start menu of a computer named Computer7.

End of repeated scenario.

Which hardware feature must Computer4 must support?

- A. a Wi-Fi adapter
- B. a Bluetooth adapter
- C. an HDMI port
- D. a MiniDisplayPort connector

Correct Answer: A

<https://www.microsoft.com/en-za/windows/windows-10-specifications#sysreqs>

---

## QUESTION 6

Note: This question is part of a series of questions that use the same set of answer choices. Each answer choice may be used once, more than once, or not at all.

You purchase a new USB drive. You apply a custom image of Windows to the USB drive.

You plan to modify the BIOS setting on a computer so that the computer can start from the USB drive.

You need to ensure that you can start the computer by using the USB drive.

What should you run?

- A. Add-Windows Image
- B. bcdboot.exe
- C. bcdedit.exe

- D. bootcfg.exe
- E. bootim.exe
- F. bootsect.exe
- G. diskpart.exe
- H. Expand-Windows Image

Correct Answer: D

<https://support.microsoft.com/en-us/help/317521/description-of-the-bootcfg-command-and-its-uses>

### QUESTION 7

A company plans to test an application in a Windows 10 Enterprise installation that runs in a virtual hard disk (VHD).

You create and generalize a Windows 10 image. You need to create and boot from the VHD.

Which three commands should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	Answer Area
dism	<input type="text"/>
diskpart	<input type="text"/>
sysprep	<input type="text"/>
bootboot	<input type="text"/>

Correct Answer:

Actions	Answer Area
	diskpart
	dism
sysprep	bcdboot

### QUESTION 8

Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario exactly

the same in each question in this series.

Start of repeated scenario

Your network contains a single Active Directory domain named contoso.com. All computers are members of the domain and run the 64-bit version of Windows 10 Enterprise.

On a test computer named Computer\_Test1, you pin several company-specific applications in a group named Contoso Apps, and then you export the start menu layout to a file named contoso.xml.

You install Client Hyper-V on a computer named Computer6.

You identify the following requirements.

- 

Install the Hyper V feature on a computer named Computer1.

- 

Use virtual smart card authentication on a computer named Computer2.

- 

Enable Secure Boot on a computer named Computer3.

- 
- Connect a computer named Computer4 to a projector by using Miracast.
- 
- Ensure that a user named User 1 can use keyboard shortcuts by pressing one key at a time.
- 
- Ensure that you can share the clipboard between Computer6 and the virtual machines running on Computer6.
- 
- Add the Contoso Apps group to the Start menu of a computer named Computer7.

End of repeated scenario.

Which hardware feature must Computer3 support.

- A. Data Execution Prevention (DEP)
- B. Unified Extensible Firmware Interface (UEFI)
- C. Trusted Platform Module (TPM)
- D. Second LevelAddress Translation (SLAT)

Correct Answer: B

<https://www.microsoft.com/en-us/windows/windows-10-specifications>

---

## QUESTION 9

A user has a laptop named Computer 1 that runs Windows 10 and has a 64-bit application named App1 installed.

App1 fails to launch and generates an error message indicating that the application is not supported on this version of Windows.

You need to ensure that App1 can run successfully.

What should you do?

- A. Create a package that includes App1 by using the Windows Imaging and Configuration Designer (Windows ICD).
- B. Create a fix in the Compatibility Administrator.
- C. Run App1 in the Standard User Analyzer (SUA).
- D. Use the Application Compatibility Manager (ACM) to create aninventory package.

Correct Answer: B

[https://msdn.microsoft.com/en-us/library/windows/desktop/dd744763\(v=vs.85\).aspx](https://msdn.microsoft.com/en-us/library/windows/desktop/dd744763(v=vs.85).aspx)

VirtualMachineMigrationAuthenticationType : CredSSP
VirtualMachineMigrationEnabled : False
VirtualMachineMigrationPerformanceOption : TCP/IP
CimSession : CimSession:
IsDeleted : False
  
```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the output.

**Answer Area**

You [answer choice] storage migrations on Computer1.

▼

cannot perform  
can perform a maximum of two concurrent  
can perform a maximum of four concurrent  
can perform a maximum of eight concurrent

You [answer choice] virtual machine migrations from Computer1 to another Hyper-V host.

▼

cannot perform  
can perform a maximum of two concurrent  
can perform a maximum of four concurrent  
can perform a maximum of eight concurrent

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the output.

Hot Area:

Answer Area

You [answer choice] storage migrations on Computer1.

<input type="checkbox"/>	cannot perform
<input type="checkbox"/>	can perform a maximum of two concurrent
<input type="checkbox"/>	can perform a maximum of four concurrent
<input type="checkbox"/>	can perform a maximum of eight concurrent

You [answer choice] virtual machine migrations from Computer1 to another Hyper-V host.

<input type="checkbox"/>	cannot perform
<input type="checkbox"/>	can perform a maximum of two concurrent
<input type="checkbox"/>	can perform a maximum of four concurrent
<input type="checkbox"/>	can perform a maximum of eight concurrent

Correct Answer:

Answer Area

You [answer choice] storage migrations on Computer1.

<input type="checkbox"/>	cannot perform
<input checked="" type="checkbox"/>	can perform a maximum of two concurrent
<input type="checkbox"/>	can perform a maximum of four concurrent
<input type="checkbox"/>	can perform a maximum of eight concurrent

You [answer choice] virtual machine migrations from Computer1 to another Hyper-V host.

<input type="checkbox"/>	cannot perform
<input checked="" type="checkbox"/>	can perform a maximum of two concurrent
<input type="checkbox"/>	can perform a maximum of four concurrent
<input type="checkbox"/>	can perform a maximum of eight concurrent

QUESTION 12

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this scenario, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are the administrator for a company. All devices run Windows 10 Enterprise and are members of the Adatum.com domain. All drives on the devices are formatted with the NTFS file system and have the default permissions assigned. You

have a device which is used by multiple users and stores information for a specific project. The project team members are members of a group named ProjectX.

The system is also used by other people that are not members of the ProjectX team. All files for ProjectX are stored in a folder with the path E:\ProjectX.

You have the following requirements:

\*Only members of the ProjectX group must have all permissions on the folder and all of the files in it.

\*ProjectX members should not be granted any specific rights to any other folders.

You need to meet the requirements.

Solution: You disable inheritance on the E:\ProjectX with the remove option. You assign the Full Control permission to the Adatum\ProjectX group.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: A
