QUESTION 1

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

You represent a SAM partner.

A client must consolidate their IT departments into a single business unit. The client was previously assessed in the Microsoft SAM Optimization Model (SOM) key competencies and designated a SAM level.

You need to compile product terms and license use rights for all software.

What should you do?

- A. Purchase software only from approved vendors.
- B. Publish software deployment reports to stakeholders.
- C. Use information provided by a software publisher.
- D. Use software metadata generated by the client.
- E. Deploy only approved software.
- F. Formulate a retirement process.
- G. Create an inventory of deployed assets.
- H. Maintain updated records of deployed assets.

Correct Answer: C

What is the Product Terms document?

The Microsoft Volume Licensing Product Terms document is part of your Microsoft Volume Licensing agreement. It is the successor document to the Product Use Rights and the Product List (both retired June 2015). When you need to know

how to license a particular product or the specifics of what you can do with that product under the terms of your license agreement, the Product Terms generally has the information you need. The Product Terms details product availability by

Volume Licensing program as well as terms and conditions for the deployment and use of software. The Product Terms is structured around product entries that point to supporting sections of the document for terms that apply more broadly,

such as the Universal License Terms and the terms of the licensing models under which Volume Licensing products are available. Some products have logical deployment scenarios that may necessitate special use rights or exceptions.

These are also outlined in the product entries in the Product Terms. The number of licenses required for a Microsoft product is determined by the licensing model used for that particular product and how you plan to deploy that product.

QUESTION 2

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

An organization uses Microsoft SQL Server and SQL Server Reporting Services (SSRS) for inventory reporting.

The organization must generate a report that includes detailed hardware information for desktops and servers in the environment. The report must use data that is collected from a scheduled inventory process.

What should you use?

- A. Microsoft Assessment and Planning Toolkit (MAP)
- B. Microsoft Deployment Toolkit (MDT)
- C. Microsoft Intune
- D. Microsoft License Advisor (MLA)
- E. Microsoft Security Compliance Manager (SCM)
- F. System Center Configuration Manager (ConfigMgr)
- G. System Center Operations Manager (OpsMgr)
- H. Microsoft Virtual Machine Manager (VMM)

Correct Answer: F

Reporting in System Center Configuration Manager provides a set of tools and resources that help you use the advanced reporting capabilities of SQL Server Reporting Services (SSRS) and the rich authoring experience that Reporting

Services Report Builder provides.

Reporting helps you gather, organize, and present information about users, hardware and software inventory, software updates, applications, site status, and other Configuration Manager operations in your organization.

QUESTION 3

You manage the hardware and software retirement process for a customer.

The customer plans to donate several computers to a charitable organization. The computers have Windows 7 Professional preinstalled. All Microsoft Office 2013 licenses that were purchased under a volume license agreement.

You have the following requirements:

Maximize license reuse.

Ensure that license agreements are not violated.

You need to recommend a course of action for reusing Windows and Office licensing.

Which two actions should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Donate the Office licenses with the computers.
- B. Reallocate all of the Office licenses within your organization.
- C. Donate the Windows licenses with the computers.
- D. Reallocate all of the Windows licenses within your organization.

Correct Answer: BD

QUESTION 4

You are an IT asset manager for an organization. You generate a software inventory report.

You must implement a SAM verification process for the software inventory.

You need to determine if the organization has purchased the right number of licenses for its assets.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Select and Place:

Actions

- Reconcile purchasing records with inventory records.
- Find purchasing records for all installed software.
- Perform an inventory of the installed software.
- Create a list of approved vendors.

Answer Area

⊞ ⊞

⊞ ⊞

Correct Answer:

Actions

Create a list of approved vendors.

Answer Area

Perform an inventory of the installed software.	⬆
Find purchasing records for all installed software.	⬆
Reconcile purchasing records with inventory records.	⬇

QUESTION 5

You are designing a purchasing process for a SAM program. An organization overpays for software licenses. Managers are making independent software purchases on their corporate credit cards.

The solution has the following requirements:

Ensure that the organization receives volume discount.

Minimize costs associated with software licenses purchases.

Ensure that the employees comply with new policies.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
You should implement an employee awareness training program.	<input type="checkbox"/>	<input type="checkbox"/>
You should establish and publish a list of approved software vendors.	<input type="checkbox"/>	<input type="checkbox"/>

Correct Answer:

Answer Area

Statement	Yes	No
You should implement an employee awareness training program.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
You should establish and publish a list of approved software vendors.	<input checked="" type="checkbox"/>	<input type="checkbox"/>

QUESTION 6

Your network contains 1,000 thin clients.

An automated inventory system manages all software accessed from the thin clients.

You need to ensure that Microsoft Office inventory information is up-to-date.

What should you do?

- A. Install a hardware inventory system and use Microsoft License Advisor (MLA).
- B. Configure the inventory system to automatically delete unused instance records every 90 days.
- C. Configure the inventory system to automatically delete instance records when users log off the thin clients.
- D. Install a Remote Desktop Services Licensing Manager and use Microsoft License Advisor (MLA).

Correct Answer: B

QUESTION 7

An organization implements a SAM program.

The organization's IT department tags physical assets with custom serial number tags. The asset serial number and device serial number are stored in a workbook.

The IT department downloads a CSV file of licenses from the Microsoft Volume Licensing Service Center (VLSC).

You need to combine the VLSC and workbook data based on devices that use licensed software.

What should you do?

- A. Merge the data sources.
- B. Create relationships between the data sources.
- C. Create a union table from the data sources.
- D. Create a Microsoft PowerApp app that uses the data sources.

Correct Answer: A

QUESTION 8

The question requires that you evaluate the underlined text to determine if it is correct.

An organization has several business units.

The organization reports software update issues related to maintaining different versions and editions of software.

An International Association of Information Technology Asset Managers (IAITAM) certified SAM partner reviews the existing environment and proposes ways to mitigate the issues.

The SAM partner should propose creating an IT purchasing group for each business unit.

Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed
- B. decentralized the asset purchasing
- C. centralizing the asset purchasing
- D. creating a hardware support group for each business unit

Correct Answer: C

SAM benefits include:

Gain centralized control and implement/enforce procurement procedures by increasing your understanding of the software licenses that your business needs to succeed.

QUESTION 9

An organization implements a SAM program and collects software inventories on a defined schedule. You need to ensure that software identification processes meet ISO 19770-1 Tier 4 specifications. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement	Yes	No
Data collected during software inventory processes must include specific software versions.	<input type="radio"/>	<input type="radio"/>
Data collected during software inventory processes must include proof of license documentation.	<input type="radio"/>	<input type="radio"/>
Data collected during software inventory processes must include software usage details and the physical location of the hardware on which software is installed.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Statement	Yes	No
Data collected during software inventory processes must include specific software versions.	<input checked="" type="radio"/>	<input type="radio"/>
Data collected during software inventory processes must include proof of license documentation.	<input checked="" type="radio"/>	<input type="radio"/>
Data collected during software inventory processes must include software usage details and the physical location of the hardware on which software is installed.	<input checked="" type="radio"/>	<input type="radio"/>

QUESTION 10

You are leading a SAM licensing optimization initiative at an organization. The primary focus for this effort is a cloud migration project. You need to determine which versions and editions of Microsoft Office are installed on computers.

Which tool or report should you use?

- A. Office 365 Admin center Microsoft Teams activity report
- B. System Center Configuration Manager (ConfigMgr)
- C. Microsoft Online Services portal
- D. Office 365 Admin center email activity report

Correct Answer: B

Use Center Configuration Manager software inventory to collect information about files on client devices. The software inventory data can be run reports that provide details about files on devices.

References: <https://docs.microsoft.com/en-us/sccm/core/clients/manage/inventory/introduction-to-software-inventory>

QUESTION 11

An organization is creating a central repository to support all software license and reporting needs. You manage all Microsoft applications by using System Center Configuration Manager (ConfigMgr) 2012.

The reporting solution must meet the following requirements:

Retrieve data directly from Oracle databases.

Reporting must be automated.

Manage reports by using a web portal that is integrated into the current ConfigMgr environment.

You need to implement a solution.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Install a cross-platform database query tool. Connect to both Oracle and Microsoft SQL Server to run your reports.
- B. Use the advanced reporting features of ConfigMgr and Microsoft SQL Server Reporting Services (SSRS) to configure the reports.
- C. Install the Oracle Tuning and Diagnostic Pack on the server that runs Oracle, and run reporting by using that tool.
- D. Install the Oracle client on a Windows Server instance that runs Microsoft SQL Server Reporting Services (SSRS) and establish a connection between the Oracle client and SSRS.

Correct Answer: BD

QUESTION 12

The question requires that you evaluate the underlined text to determine if it is correct.

You complete an initial inventory and assess an organization's Microsoft SAM Optimization Model (SOM). You follow Microsoft documentation outlining the three main departments that benefit from a SAM engagement.

You create a SAM stakeholder group that consists of Windows server administrators, database administrators, and the networking team to oversee the project.

Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed
- B. IT, purchasing, and management
- C. IT, engineering, and human resources
- D. IT, human resources, and maintenance

Correct Answer: B
