QUESTION 1

Your network contains a Hyper-V host named Host1 that runs Windows Server 2012. Host1 contains a virtual machine named DC1. DC1 is a domain controller that runs Windows Server 2012.

You plan to clone DC1.

You need to recommend which steps are required to prepare DC1 to be cloned. What should you include in the recommendation? (Each correct answer presents part of the solution. Choose all that apply.)

A. Run dcpromo.exe /adv.

B. Create a file named Dccloneconfig.xml.

C. Add DC1 to the Cloneable Domain Controllers group.

D. Run sysprep.exe /oobe.

E. Run New-VirtualDiskClone.

Correct Answer: BC

QUESTION 2

Contoso.Ltd, has an Active Directory Domain Services (AD DS) domain named contoso.com. The domain and forest functional levels are set to Windows Server 2008 R2. You have a property configured certificati n authority (CA). All

servers run Windows Server 2012 R2.

You have the following requirements.

Users must not be able to attach specific documents to email messages or copy the files to a personal USB device.

Finance department users must be able to access the solution from their domainjoined windows devices on the corporate network over the internet without any additional configuration

Finance department uses must be able to access the documents even if the primary server fails.

What should you do?

A. Upgrade the domain functional level to Windows 2012 or higher.

B. Install Active Directory Federation Services (AD FS), and integrate the Active Directory Rights Managements Services server with AD FS.

C. Ensure that the internal and external URLs for the Active Directory Rights Management Services cluster are the same.

D. Implement an Active Directory Rights Management Services cluster and place at least one cluster node in the perimeter network

Correct Answer: D

QUESTION 3

Your network contains a data center named DataCenterl that contains multiple servers. The servers are configured as HyperV hosts.

Your company deploys a disaster recovery site. The disaster recovery site has a dedicated connection to DataCenterl. The network is connected to the disaster recovery site by using a dedicated link. DataCenterl contains 10 business critical

virtual machines that run a lineofbusiness application named Appl. You need to recommend a business continuity solution to ensure that users can connect to Appl within two hours if DataCenterl fails.

What should you include in the recommendation?

More than one answer choice may achieve the goal. Select the BEST answer.

A. From Microsoft System Center 20l2 Virtual Machine Manager (VMM), implement live migrati n on the virtual machines.

B. From HyperV Manager, implement HyperV replicas.

C. From Microsoft System Center 20l2 Data Protection Manager, implement a protection group.

D. From HyperV Manager, create snapshots of the virtual machines.

Correct Answer: B

QUESTION 4

You need to give Great Britain division access to the UKSales application What should you set up?

A. a border Gateway protocol

B. a multitenant clienttosite VPN gateway

C. a web application proxy

D. a multi tenant Remote Access VPN gateway

Correct Answer: C

QUESTION 5

Your network contains an Active Directory domain named contoso.com.

You plan to implement Network Load Balancing (NLB).

You need to identi y which network services and applications can be load balanced by using NLB.

Which services and applications should you identi y?

A. Microsoft SQL Server 20l2 Reporting Services

B. A failover cluster

C. A DHCP server

D. A Microsoft Exchange Server 20l0 Mailbox server

E. A file server

F. A Microsoft SharePoint Server 20l0 frontend Web server

Correct Answer: AF

QUESTION 6

You deploy an Active Directory domain named contoso.com to the network. The domain is configured as an Active Directory-integrated zone. All domain controllers run Windows Server 2012 and are DNS servers. You plan to deploy a child

domain named operations.contoso.com. You need to recommend changes to the DNS infrastructure to ensure that users in the operations department can access the servers in the contoso.com domain.

What should you include in the recommendation?

A. A zone delegation for _msdcs.contoso.com

B. Changes to the replication scope of contoso.com

C. Changes to the replication scope of _msdcs.contoso.com

D. Changes to the replication scope of operations.contoso.com

Correct Answer: B

QUESTION 7

Your network contains an Active Directory domain named contoso.com. The domain contains multiple servers that run Windows Server 20l2. All client computers run Windows 7.

The network contains two data centers.

You plan to deploy one file server to each data center.

You need to recommend a solution to provide redundancy for shared folders if a single data center fails.

What should you recommend? More than one answer choice may achieve the goal. Select the BEST answer.

A. A Distributed File System (DFS) namespace and DFS Replication

B. Cluster Shared Volumes (CSVs)

C. The clustered File Server role of the File Server for general use type

D. The clustered File Server role of the File Server scaleout application data type

Correct Answer: A

QUESTION 8

You need to implement a Hyper-V Recovery Manager solution in the hosting environment of Northwind Traders.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
From the Windows Azure Management Portal, upload a .cer file.	
On the VMM server, download and install the Hyper-V Recovery Manager Provider.	
From the Virtual Machine Manager console, select the **Synchronize cloud data with the vault** option.	
From the Windows Azure Management Portal, create a Hyper-V Recovery Manager vault	
From the Virtual Machine Manager console, enable the **Send configuration data about this cloud to the Windows Azure Hyper-V Recovery Manager** option.	

Correct Answer:

Actions

Answer Area

From the Windows Azure Management Portal, create a Hyper-V Recovery Manager vault

From the Windows Azure Management Portal, upload a .cer file.

On the VMM server, download and install the Hyper-V Recovery Manager Provider.

From the Virtual Machine Manager console, select the **Synchronize cloud data with the vault** option.

From the Virtual Machine Manager console, enable the **Send configuration data about this cloud to the Windows Azure Hyper-V Recovery Manager** option.

QUESTION 9

You need to recommend a solution for communicating to Windows Azure services.

What should you recommend? To answer, select the appropriate options in the answer area.

Answer Area

Protocol to use on Server4: [▼]

Object to create on Server4: [▼]

Hot Area:

Answer Area

Protocol to use on Server4:
- IKEv2
- PPoE
- PPTP
- SSTP

Object to create on Server4:
- A site-to-site interface
- A route to a VPN connection
- A custom route to the BGP routing table
- An entry point to a multi-site deployment

Correct Answer:

Answer Area

Protocol to use on Server4:
- **IKEv2**
- PPoE
- PPTP
- SSTP

Object to create on Server4:
- **A site-to-site interface**
- A route to a VPN connection
- A custom route to the BGP routing table
- An entry point to a multi-site deployment

QUESTION 10

Your network contains an Active Directory domain named adatum.com. Your company plans to open a new branch office named Branch1. You identify the following requirements for Branch1:

All Branch1 users must have a password that is a minimum of 14 characters. All other domain users must have a password that is a minimum of 12 characters.

A group named Group1 must be able to reset user passwords for users in Branch1. You need to recommend changes to the domain to support the Branch1 requirements.

What should you recommend?

More than one answer choice may achieve the goal. Select the BEST answer.

A. Create a new organizational unit (OU) named BranchOU and add Group1 to the Managed By attribute of BranchOU. Move the Branch1 user objects to the new OU. Create a fine-grained password policy for the Bronchi users.

B. Create a new forest. Migrate all of the Branch1 user objects to the new forest and add the Group1 members to the Enterprise Admins group. Configure the password policy in a Group Policy object (GPO).

C. Create a new organizational unit (OU) named BranchOU. Delegate the permissions for BranchOU to Group1. Move all of the Branch1 user accounts to the new OU. Create a fine-grained password policy for the Branch1 users.

D. Create a new child domain. Move all of the Branch1 user accounts to the new domain. Add the Group1 members to the Domain Admins group. Configure the password policy in a Group Policy object (GPO).

Correct Answer: C

QUESTION 11

You need to implement the network Unlock feature to meet the BitLocker requirements.

In which order should you perform the acaons?To answer, move all acaons from the list of acaons to the answer area and arranie them in the correct order.

Actions	Answer Area
Create the Network Unlock certificate.	
Deploy the private key and certificate to the Windows Deployment Server.	> <
Configure a Group Policy in contoso.com for Network Unlock.	
Install Windows Deployment Services on a new server in the contoso.com domain.	

Select and Place:

Actions

Create the Network Unlock certificate.
Deploy the private key and certificate to the Windows Deployment Server.
Configure a Group Policy in contoso.com for Network Unlock.
Install Windows Deployment Services on a new server in the contoso.com domain.

Answer Area

Correct Answer:

Actions

Answer Area

Install Windows Deployment Services on a new server in the contoso.com domain.
Create the Network Unlock certificate.
Deploy the private key and certificate to the Windows Deployment Server.
Configure a Group Policy in contoso.com for Network Unlock.

QUESTION 12

You need to plan the migration of Appl. What should you do?

A. Install Appl on drive C. Move all of the data that supports Appl to drive D.

B. Expand the size of drive C Install Appl and all of the data that supports the app on drive C

C. Install Appl on drive D. Move all of the data that supports Appl to an additional data drive.

D. Install Appl on drive C. Move all of the data that supports Appl to an additional data drive.

Correct Answer: C
