Exam   :   700-303

Title   :   Advanced Borderless
                Network Architecture
                Systems Engineer Exam

Version   :   DEMO

1.Which of the following uses Cisco Security Intelligence Operations threat intelligence to protect those users with a vulnerable browser by blocking any connections to websites that may spread an attack or malware?

A.Cisco IronPort Web Security

B.intrusion prevention system

C.Stuxnet

D.URLZone

Answer: A

2.What are the primary components of the Cisco Smart Business Architecture?

A.WAN optimization, video streaming, and user services

B.network foundation, network services, and user services

C.WAN optimization, network services, and user services

D.WAN optimization, network services, and Internet edge security infrastructure

Answer: B

3.What would you use to track guest provisioning and guest network use statistics, including login and logout times?

A.Cisco ClientLink

B.Cisco Wireless Control System

C.Cisco SAFE Blueprint

D.Cisco ScanSafe

Answer: B

4.Which solution gives visitors the ability to access the Internet through a secure, scalable,and cost-effective solution?

A.Cisco TrustSec

B.Cisco Unified Wireless Network Guest Access

C.Cisco SAFE Blueprint

D.Cisco Wireless Control System

Answer: B

5.What is a characteristic of the Cisco Borderless Network Architecture?

A.It increases operational complexity.

B.It does not yet offer its own network security options.

C.It is an energy-efficient solution.

D.It does not provide on-demand services.

Answer: C

6.Which layer inthe hierarchical model is known as the backbone that glues together all the elements of the campus architecture?

A.access

B.distribution

C.core

D.architecture

Answer: C

7.What is the main goal of the Cisco Borderless Network?

A.to allow people to keep in touch with family members all around the world

B.to promote energy efficiency in data centers

C.to allow people to communicate on any device within the parameters of their networks

D.to connect anyone, anywhere, on any device

Answer: D

8.Which component of the Cisco Smart Business Architecture provides the underpinning infrastructure on which all other services and applications rely?

A.WAN optimization

B.network foundation

C.user services

D.network services

Answer: B

9.Which of the following is network system virtualization technology that pools multiple Cisco Catalyst 6500 Series Switches into one virtual switch, increasing operational efficiency, boosting nonstop communications, and scaling system bandwidth capacity tol.4Tb/s?

A.VSS

B.vPC peer switches

C.VDCs

D.vPC peer link

Answer: A

Explanation:

A VSS is network system virtualization technology that pools multiple Cisco Catalyst 6500 Series Switches into one virtual switch, increasing operational efficiency, boosting nonstop communications, and scaling system bandwidth capacity to 1.4 Tbps.
