QUESTION 1

You create a website to share photographs with friends. The Web.config file for the website contains the following markup:

```
<configuration>
  <system.web>
    <authentication mode="Forms">
      <forms name="MyApp" loginUrl="/login.aspx"/>
    </authentication>
    <authorization>
      <allow roles="Administrators" />
      <deny users="?"/>
    </authorization>
  </system.web>
</configuration>
```

You need to evaluate security for the website.

Instructions: Use the drop-down menus to select the answer choice that completes each statement. Each correct selection is worth one point.

Hot Area:

Answer Area

[answer choice] will be granted access to the site.

```
Administrators only
Administrators and anonymous users
Administrators and authenticated users
Authenticated users only
```

[answer choice] will be redirected to the login.aspx page.

```
Administrators only
Anonymous users only
Administrators and anonymous users
Authenticated users only
```

Correct Answer:

Answer Area

[answer choice] will be granted access to the site.

Administrators only
Administrators and anonymous users
Administrators and authenticated users
Authenticated users only

[answer choice] will be redirected to the Login.aspx page.

Administrators only
Anonymous users only
Administrators and anonymous users
Authenticated users only

QUESTION 2

A Web page has an control and three controls named num1, num2, and num3.

When a user clicks the control, the Web page calls a JavaScript function named Product(). Product() multiplies the values of num1 and num2, and places the resulting value into num3.

Which attribute should you set on the control to call Product()?

A. OnCommand="Product();"

B. CommandName="Product();"

C. OnClientClick="Product();"

D. OnClick="Product();"

Correct Answer: B

QUESTION 3

What syntax should you use to pass variable a and variable b in a QueryString?

A. Response.Redirect("Webpage.aspx?a=1andb=2")

B. Response.Redirect("Webpage.aspx?a:1andb:2")

C. Response.Transfer("Webpage.aspx?a:1+b:2")

D. Response.Transfer("Webpage.aspx?a=1+b=2")

Correct Answer: A

QUESTION 4

You are deploying your website to a production environment.

You need to ensure that the minimally necessary components are installed on the server for the deployment to succeed.

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No. Each correct selection is worth one point.

Hot Area:

Answer Area

Required Action	Yes	No
Ensure that IIS is installed on the production server.	C	O
Ensure that SQL Server is installed on the production server.	C	O
Ensure that Windows Defender is installed on the production server.	C	O

Correct Answer:

Answer Area

Required Action	Yes	No
Ensure that IIS is installed on the production server.	C	O
Ensure that SQL Server is installed on the production server.	C	O
Ensure that Windows Defender is installed on the production server.	C	O

QUESTION 5

A Web service contains the following code.

```
Public Class
    Public Function GetVerse(ByVal page As Integer) As String
        Return arrVerse(page)
    End Function
End Class
```

You need to expose the method in the Web service.

What should you do?

A. Change the method scope from public to web.
