Correct Answer: C

---

#### QUESTION 6

You want to update a Mac OS X v10.5 computer to Mac OS X v10.6. Which aspect of the computers current configuration can you choose NOT to change when using the Archive and Install option to install Mac OS X v10.6?

- A. System fonts
- B. Hardware drivers
- C. Network settings
- D. Printer configurations

Correct Answer: C

---

#### QUESTION 7

Review the screenshot, and then answer the question below.

You open Terminal on your Mac OS X v10.6 computer, and see the window displayed in the screenshot above. What does the "~" indicate?

- A. The current shell.
- B. The current working directory.
- C. The path to the admin command.
- D. An argument passed to the admin command.

Correct Answer: B

#### QUESTION 8

Which process will let you start up a computer in target disk mode?

- A. Start up the computer from the Mac OS X Install DVD, then choose Target Disk Mode from the Utilities menu.
- B. Hold down the S key on the keyboard while the computer starts up, then type the command `reboot -target`.
- C. Hold down the T key on the keyboard while the computer starts up, until a FireWire icon appears on the screen.
- D. Hold down the Option key on the keyboard while the computer starts up, until a dialog appears, then select Target Disk Mode from the dialog.

Correct Answer: C

### QUESTION 9

When a user performs a default installation of Mac OS X v10.6 on a computer that has an earlier version of Mac OS X and existing user accounts, what happens?

- A. The Installer archives the older operating system, and maintains the user accounts.
- B. The Installer replaces the older operating system with the Mac OS X v10.6 operating system, and maintains the user accounts.
- C. The Installer upgrades the older operating system to Mac OS X v10.6. It archives the user accounts, but they can be restored manually.
- D. The Installer erases the older operating system and installs Mac OS X v10.6. It archives the user accounts, but they can be restored manually.
- E. The Installer presents the options to upgrade, archive, or erase the older operating system and user accounts, and the installation proceeds according to the user's selection.

Correct Answer: B

---

### QUESTION 10

A new, 5 MB file named text.rtf was backed up by Time Machine once, but the file has been edited since then, and is now 6 MB. It is about to be backed up by Time Machine again. How will Time Machine handle this backup?

- A. Time Machine will copy the 6 MB file to the backup drive, and delete the original backup copy of the file from the backup drive.
- B. Time Machine will copy the 6 MB file to the backup drive, and keep both the new backup file and the original backup file on the backup drive.
- C. Time Machine will identify the 1 MB of file changes, copy those changes to a new file on the backup drive, and keep both the new backup file and the original backup file.
- D. Time Machine will identify the 1 MB of file changes, copy those changes to a new file on the backup drive, then create a 500 KB parity file, and keep all three files: the two new files representing the 1 MB of file changes, and the original backup file.

Correct Answer: B

---

### QUESTION 11

You have a file with a resource fork on a Mac OS X v10.6 computer. You use the Finder to copy the file from your computer to a local volume that has a FAT32 file system. What happens to the information in the file's resource fork when the file is copied to the FAT32 volume?

- A. The information in the resource fork is stored in a second data segment of the file.
- B. The information in the resource fork is copied to a second file on the new file system.
- C. The information in the resource fork is stored as an extended attribute on the new file system.

D. The information in the resource fork is discarded from the copy of the file that resides on the new file system.

Correct Answer: B

---

### QUESTION 12

How does the Finder in Mac OS X v10.6 identify the application it will use to open a file?

- A. The Finder queries the Spotlight index.
- B. The Finder consults a directory of Spotlight plug-ins provided by each application.
- C. The Finder queries the volume catalog stored on the Mac OS Extended file system.
- D. The Finder queries Launch Services, which queries a database in /Library/Caches/.

Correct Answer: D
