QUESTION 1

If a user agent that does not support authentication tries to request content through a connection on which the ProxySG requires authentication, how can you best resolve the issue?

A. Identify the TCP ports used by the user agent, and create a proxy service to bypass such traffic.

B. Identify an HTTP header that identifies the user agent, and then write policy to exempt matching transactions from authentication.

C. Identify the IP address of the user agent, and then write policy to exempt matching transactions from authentication.

D. You cannot do this.

Correct Answer: B

QUESTION 2

To create policy that tests only for the authentication error of expired_credentials, can you use the VPM, CPL, or either?

A. VPM

B. CPL

C. Either

Correct Answer: C

QUESTION 3

Where do you most appropriately configure the ProxySG to decide whether to authenticate guest users?

A. In the CLI.

B. In the Management Console.

C. In policy.

Correct Answer: C

QUESTION 4

What is a precondition for using L2 MAC rewrite with WCCP?

A. The LAN where WCCP router and ProxySG are located should use IPv6

B. No forwarding should be defined for ProxySG

C. ProxySG and router should be in the same broadcast domain

Correct Answer: C

QUESTION 5

The ProxySG compiles CPL code at installation time and performs optimizations that might not have been written into the code.

A. True

B. False

Correct Answer: B

QUESTION 6

Is SGOS a 32-bit or 64-bit operating system?

A. 32-bit

B. 64-bit

C. Either, depending on the model of ProxySG on which it runs

Correct Answer: C

QUESTION 7

Which of these possible problems does a nearly-full ProxySG disk indicate? (Select all that apply)

A. This ProxySG should be upgraded to a more powerful model.

B. One or more additional ProxySG appliances should be deployed in this network.

C. Caching parameters are improperly set in the Management Console.

D. None; this is a normal condition.

Correct Answer: BC

QUESTION 8

When the ProxySG determines whether a user is a member of an LDAP group, is that considered authenti- cation or authorization?

A. Authentication

B. Authorization

Correct Answer: B

QUESTION 9

Which types of requests are likely to be served the fastest?

A. TCP_MISS

B. TCP_NC_MISS

C. TCP_HIT

D. TCP_MEM_HIT

E. TCP_RESCAN_HIT

Correct Answer: E

QUESTION 10

In which types of ProxySG realms does the ProxySG join the Active Directory domain associated with an IWA realm?

A. IWA Direct

B. BCAAA

C. Both IWA Direct and BCAAA

D. Neither IWA Direct nor BCAAA

Correct Answer: A

QUESTION 11

The ProxySG policy engine allows an administrator to create policy based on any MIME type, File Extension or File Signature (first bytes in the response body).

A. True

B. False

Correct Answer: A

QUESTION 12

Which level(s) of global policy trace contain information about proxy transactions? (Select all that apply)

A. Trace proxy traffic policy execution.

B. Trace all policy execution.

C. Global policy traces do not contain information about proxy transactions.

Correct Answer: A

QUESTION 13

When one ProxySG forwards HTTP requests to another ProxySG, does the originating ProxySG send a server-style GET request or a proxy-style GET request?

A. Server-style

B. Proxy-style

Correct Answer: A

QUESTION 14

What does this CPL layer do?

A. Sets the transaction status to Allow for all users who have the group attribute of Administrators.

B. This policy contains a syntax error and cannot be installed.

C. Nothing.

D. Sets the group attribute of Administrators for all users whose transactions are allowed.

Correct Answer: A

QUESTION 15

Log format variable s-ip always refers to

A. IP address of the HTTP request client

B. IP address of the original content server

C. IP address of the ProxySG to which client has established a connection

Correct Answer: C
