### QUESTION 1

Which of the following provides the best example of a product risk leading to a project risk?

- A. The signalling systems may have more defects than anticipated, leading to the need for more retesting to be carried out.
- B. There may be unexpected lags on the network traffic communication, causing drivers to slow the trains down unnecessarily.
- C. The new development staff may require training for this type of system, which, if not carried out, may lead to an increase in the number of defects introduced.
- D. The budget may need to be increased significantly during the project, otherwise there may be delays in the delivery of the system.

Correct Answer: A

---

### QUESTION 2

Which one of the following test tools would you recommend for the E2E phase.

- A. A configuration management tool to ensure that all user-stories have been properly archived.
- B. A test design tool to create the test cases as efficiently as possible.
- C. A performance test tool to check that anticipated loading can be handled.
- D. A modelling tool to verify the stock exchange pricing structures.

Correct Answer: C

---

### QUESTION 3

At the end of Sprint 1, which of the following would give the best indication of test coverage?

- A. Number of user-stories required to define the trading environment.
- B. Amount of unit testing planned by developers for each user-story associated with the trading environment.
- C. Number of links required to the stock exchange.
- D. Percentage of user-stories tested and passed for the trading environment.

Correct Answer: D

---

### QUESTION 4

Which of the following is an accurate depiction of the hierarchy of test management documentation (where the highest

comes first)?

- A. Test policy-Test strategy-Project test plan-System test plan
- B. Test strategy-Test policy-Project test plan-System test plan
- C. Test policy-Project test plan-Test strategy-System test plan
- D. Project test plan-Test strategy-System test plan-Test policy

Correct Answer: A

---

#### QUESTION 5

Which of the following test design techniques could be used to do this?

- a.  
Statement testing.
  - b.  
Path testing.
  - c.  
State transition testing.
  - d.  
Exploratory testing.
- A.  
a and c.
- B.  
b and c.
- C.  
c and d.
- D.  
a and d.

Correct Answer: C Case Study# 5Scenario

A rail services provider is upgrading its signalling systems, to allow train drivers and signallers to communicate securely and timely.

This is seen as a safety critical system. The IT processes in place include many quality check points, including the use of the V-model for software development.

The provider has recently lost many of its software development and test staff to other organizations. The management staff has been retained, including the project and development manager for this upgrade. A recruitment drive is underway.

You have been brought in as a new test manager, and you have been asked to review the processes surrounding development and testing.

The project manager has been asked about a formal process of building test procedures using specification-based techniques.
