QUESTION 1

When syndicating an IBM Web Content Manager library, the following statements are all true except:

A. First-timesyndication to an existing library is not supported. If you attempt to syndicate a library to a subscriber that already has a library with the same name, an error results.

B. Information about a Library is only syndicated the first time syndication occursand not on subsequent updates and rebuilds. If a library is renamed or library user access is changed, this information is not syndicated to the Subscriber.

C. If content from one library (Library A) uses an item from another library (Library B), you mustinclude both libraries in the syndicator. Including both libraries ensures that all items are syndicated successfully.

D. When you switch from "all item" syndication to "live and projects" syndication or "live item" syndication, any drafts previously syndicated to the subscriber are removed.

Correct Answer: D

QUESTION 2

John is deploying an IBM Web Content Manager website. He is not using any IBM WebSphere Portal features, all the contents are static and is only updatedperiodically for this particular site. His company already has an external site that is delivered from a web server and he is planning to utilize that for rendering Web Content Manager.

What delivery mechanism best suits the need for John?

A. Deliver webcontent using a servlet

B. HTML delivery

C. Prerendered delivery

D. Render content with Web Content Manager Viewer portlet

Correct Answer: C

QUESTION 3

The following statements about mapping site areas, authoring templates and presentation templates are all true, except:

A. Template maps assigned in site areas will override those set in authoring templates.

B. Two items usingdifferent authoring templates can be displayed using the same presentation template if both authoring templates are mapped to the same presentation template.

C. The presentation template used by each item will be determined by the authoring template the item used, and the location of the item in the site framework.

D. A content item can be displayed using two different presentation templates. The web content library is configured to allow this.

Correct Answer: D
