QUESTION 1

When using single service projects, which method(s) allow(s) users to include comments from the COBOL source code in the generated XSD and WSDL files?

- A. top-down method only
- B. bottom-up method only
- C. command-line batch processor only
- D. either the bottom-up method or the command-line batch processor

Correct Answer: D

QUESTION 2

When creating a "DB2 for z/OS" database connection via the Data perspective, which type of driver does the database manager use to enable interaction with the host database?

- A. ODBC driver
- B. JDBC driver
- C. C++ driver
- D. MySQL driver

Correct Answer: B

QUESTION 3

For a new element to be added to CA Endeavor?SCM, where must the new element be located?

- A. in a data set
- B. in a local workstation folder
- C. in a local workstation project
- D. in any Eclipse project

Correct Answer: A

QUESTION 4

The Menu Manager feature can be used to perform dynamic variable substitution for JCL submission. In order to enable this feature, the parameters for variable substitution in a JCL need to be marked with which character?

A. !

B. ^

C. \$

D. ?

Correct Answer: A

QUESTION 5

The Common Access Repository Manager (CARMA) toolkit provides a common interface for accessing Software Configuration Managers (SCMs) from Rational Developer for System z. Which host-resident module does this common access framework use to manage SCM access from the CARMA client?

A. Remote Access Manager (RAM)

B. Repository Access Manager (RAM)

C. Host Access Manager (HAM)

D. Host Repository Connection (HRC)

Correct Answer: B

QUESTION 6

What information does the Remote System Explorer (RSE) user log file "rsecomm.log" contain?

A. Datastore action logging

B. RSE's reading and writing of PDS member or a sequential data set, and the time stamp of each read and write

C. the RSE server's handling of commands from the client, and the communication logging of all services relying on RSE

D. standard output (stdout) and standard error output (stderr)

Correct Answer: C

QUESTION 7

When you take a z/OS project and its MVS subprojects offline, you choose members and files to download to your workstation. During this time, what is the availability of the selected members and files?

A. available on the host system, but locked for access by other users

B. available on the host system, and available for others to edit

C. available on the host system, and can be accessible to others if you explicitly allow them to

D. unavailable on the host system, as the members and files are physically moved to the workstation

Correct Answer: B

QUESTION 8

When using the IBM® SCLM Developer Toolkits, you can use the SCLM view to work directly with host artifacts such as COBOL or PL/I programs. Which modes does the SCLM view provide?

- A. SCLM Developer mode and SCLM Explorer mode
- B. SCLM Projects mode and SCLM Explorer mode
- C. SCLM Developer mode and SCLM Projects mode
- D. SCLM Projects mode and SCLM Group mode

Correct Answer: A

QUESTION 9

To add custom actions in Common Access Repository Manager (CARMA), code must be written to extend what?

- A. the Repository Access Manager (RAM)
- B. the CARMA repository instance
- C. the CARMA filter
- D. the CARMA plug-in

Correct Answer: D

QUESTION 10

Multiple local, site-developed preprocessors can be used to process source files in a local project. A property group can be used to specify the location and options for each preprocessor used. What should be done to support a single build operation where the same preprocessor is invoked more than once, but with different options for each invocation?

- A. create multiple property groups and for each property group specify a different set of preprocessor options
- B. create multiple property groups, one for each preprocessor option used
- C. create a single property group, add the preprocessor to the property group multiple times, each with a different set of options
- D. create a single property group, add the preprocessor to the property group, and specify all the options in the order they are used

Correct Answer: C

QUESTION 11

When creating a Menu Manager menu in Rational Developer for System z, which elements are unsupported in V7.6?

- A. Actions
- B. Icons
- C. Separators
- D. Cascaded submenus

Correct Answer: B

QUESTION 12

To see the SQL statements (not the generated COBOL source) in the listing while interactively debugging with Debug Tool, what must be used to compile the source program?

- A. IBM COBOL compiler on Windows
- B. Enterprise COBOL compiler V4.2 or above
- C. the DB2 stand-aloneprecompiler
- D. the integrated DB2 coprocessor

Correct Answer: D
