QUESTION 1

When you create a custom vendor certification, which steps do you need to perform? (Choose three)

- A. Select a metric family.
- B. Specify a vendor name.
- C. Define a metric expression.
- D. Create a notification profile.
- E. Select a management information base (MIB).

Correct Answer: ACE

QUESTION 2

If you are planning to implement custom menus, which factor should you consider?

- A. They cannot be used to open default dashboards.
- B. They are automatically deleted if all their associated user accounts are deleted.
- C. They are unavailable to users until an administrator edits a role to include the menu and assigns it to a user.
- D. They should be created by administrators for every user so that each dashboard a user needs is always readily available on one or more custom menus.

Correct Answer: C

QUESTION 3

Sue White logs into CA Performance Center as the Global Administrator. When Sue uses the Admin menu to administer a tenant:

- A. she is granted a tenant user perspective.
- B. she will be able to view all tenant spaces.
- C. she will only be able to view Default Space items.
- D. she is granted a tenant administrator perspective.

Correct Answer: D

QUESTION 4

How can Data Collector poll logs help you troubleshoot? (Choose two)

- A. They help you to address user login problems.
- B. They enable you to examine SNMP traffic between a Data Collector and a specific IP address.
- C. They help you to debug synchronization problems between CA Performance Center and the Data Aggregator.
- D. They help you to resolve issues such as unexpected dashboard values and metric family discovery not working.

Correct Answer: BD

QUESTION 5

When you configure product data sources for CA Performance Center, which factor do you need to consider?

- A. Only one data source product can be attached to a single CA Performance Center instance.
- B. The parameters and definitions of registered data sources are not shared with any other registered data sources.
- C. Each specific data source product must be registered with CA Performance Center before any configuration is attempted.
- D. Each specific data source product must accept and utilize exactly the same set of rights and permissions as all other data source products.

Correct Answer: C

QUESTION 6

After creating a custom vendor certification, you begin to notice unexpected dashboard values. Furthermore, you suspect that discovery is not operating correctly. To troubleshoot this issue, which step should you perform?

- A. Create a new custom dashboard and check if the displayed values still indicate a possible error.
- B. To verify that the Data Collector is running, access the following URL: `http://: /rest`
- C. Open the log configuration file named `log4j.xml` for CA Performance Center and set the trace level to Error.
- D. Use the poll log to examine the SNMP communication between the Data Collector and the IP address of the monitored device.

Correct Answer: D

QUESTION 7

In CA Performance Center, permission groups:

- A. Are always read-only copies of system or custom groups.
- B. Are custom groups that organize managed items for data access purposes.
- C. Are known as context groups until they are assigned to user accounts as permission sets.

D. Are used to group users who have common access requirements to selected data sources.

Correct Answer: B

QUESTION 8

To help ensure that CA Performance Center operations run smoothly, which guidelines should you follow? (Choose three)

- A. Check log files daily or at least weekly.
- B. Purge log files manually every two weeks to avoid performance and space issues.
- C. Test the Vertica database for consistency at least once a week using DBVisualizer.
- D. Only change logging levels in the log4j.xml files for a service if advised to do so by CA Technologies support.
- E. If you have access to the CA Performance Center server, run the grep-i command with the appropriate keyword to search multiple log files for error instances.

Correct Answer: ADE

QUESTION 9

When you edit vendor certifications using the New Vendor Certification wizard, which action can you perform?

- A. Change the priority of custom vendor certifications.
- B. Modify metric expressions in custom vendor certifications.
- C. Add metric expressions to out-of-the box vendor certifications.
- D. Change the name and description of custom vendor certifications.

Correct Answer: B

QUESTION 10

To log into a specific server and uninstall a Data Collector, which account do you use?

- A. Root
- B. Admin
- C. IT Operator
- D. Any user with access to the server

Correct Answer: A
