Following Questions and Answers are all new published by CA Official Exam Center

QUESTION 1

You have added an operator named Create_Tickets to a process. You need to access an operator dataset named Result from this operator. Which statements will fetch the value of Result? (Choose two)

A. Process.OpName.Result

B. Process[OpName].Result

C. Process.OpName.[Result]

D. [Process.OpName].Result

Correct Answer: AB

QUESTION 2

To invoke a Start Request Form (SRF):

A. Run the process containing the SRF.

B. Use the Assign User Request operator.

C. On the Library tab, right-click the SRF and click Start.

D. Open the SRF in Form Designer and click the green Start button on the toolbar.

Correct Answer: C

QUESTION 3

After you install CA Process Automation r4.1, you want to enable seamless authentication to CA Process Automation using Windows credentials. To implement this capability, you need to edit the oasisconfig.properties file. Which setting do you need to configure?

A. isFipsMode=true

B. SSO.enabled=true

C. ntlm.enabled=true

D. siteminder.ntlm.enabled=true

Correct Answer: C

QUESTION 4

When planning your CA Process Automation implementation in production environments, you might need to consider factors such as high availability, fault tolerance, and scalability. Which capabilities help ensure that your automation

solution meets such requirements? (Choose two)

A. Executing a large amount of process instances concurrently

B. Continuing process execution if an individual orchestrator or agent node fails

C. Completing the execution of any given process instance within a defined period

D. Continuing to run CA Process Automation processes in another environment if the main environment completely fails

Correct Answer: AB

QUESTION 5

The mail server for email notifications can be configured for all operators and processes by:

A. Setting the hostname variable.

B. Setting the outgoing mail server in Outlook.

C. Defining an SMTPServer variable within your process.

D. Modifying the SMTP Server for Outgoing e-mail setting in the Email module for the domain.

Correct Answer: D

QUESTION 6

Sue White is responsible for approving notebook upgrades. Sue is notified by email that she needs to approve an upgrade request. When Sue logs into CA Process Automation and right clicks the task, which menu options are available? (Choose two)

A. Take

B. Reply

C. Escalate

D. Approve

Correct Answer: AB

QUESTION 7

You want to define a rule to run a set of tasks on the last day of each month. You create an object and name it LastOpenDayofMonth, which will be used to specify the time to run backups and monthly reports. The object you created, which contains the necessary rule, is a:

A. Policy object.

B. Calendar object.

C. Resource object.

D. Schedule object.

Correct Answer: B

QUESTION 8

You need to integrate CA Process Automation with an external application. A data value or status change in the application will result in a CA Process Automation process starting, continuing, or stopping. Which approach enables you to minimize any potential impact on performance?

A. Send an email into a mailbox monitored by a CA Process Automation mail trigger.

B. Continuously poll the external application from the CA Process Automation process to ascertain if data values or statuses in its database change.

C. Continuously check for a predefined file that the external application will be configured to create in a commonly accessible file system when data values or statuses change.

D. Send an event to CA Process Automation from the external application when data values or statuses change with a data payload, which will start, continue, or stop the execution of a designated CA Process Automation process.

Correct Answer: D

QUESTION 9

Which data types can you use for dataset variables? (Choose three)

A. Char

B. String

C. Double

D. ValueMap

E. XML Fragment

Correct Answer: BCD

QUESTION 10

Which statements about JavaScript expressions in CA Process Automation are TRUE? (Choose two)

A. The CA Process Automation Boolean dataset type maps to the JavaScript Boolean data type.

B. JavaScript expressions in double quotation marks will result in an invalid expression error message.

C. Dataset objects and their variables are accessed using JavaScript expressions in calculated parameters.

D. JavaScript variables set in the pre-execution or the post-execution section of an operator can be accessed from the pre-execution or post-execution section of another operator.

Correct Answer: AC
