

# DU0-001<sup>Q&As</sup>

Data Center University Associate Certification

## Pass APC DU0-001 Exam with 100% Guarantee

Free Download Real Questions & Answers **PDF** and **VCE** file from:

<https://www.passapply.com/du0-001.html>

100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by APC Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

#### QUESTION 1

Which is an example of an NCP1 management system data point?

- A. Monitoring of network traffic
- B. Mislabeling of kirk-key interlock
- C. Advanced warning of UPS battery deficiency
- D. Reading of boiler room steam pressure levels

Correct Answer: C

---

#### QUESTION 2

What is the correct order of the refrigeration cycle datacenter precision cooling?

- A. Condensation > evaporation > expansion > compression
- B. Compression > condensation > evaporation > expansion
- C. Evaporation > expansion > condensation > compression
- D. Evaporation > compression > condensation > expansion

Correct Answer: D

---

#### QUESTION 3

What function do patch panels serve in a data center?

- A. They convert Internet protocols (IP).
- B. They convert copper signals into fiber optic light signals.
- C. They serve as a demarcation point where ends of bulk cable converge.
- D. They improve the data cable signal capacity from 100 Base-T to 10 Gigabyte Ethernet.

Correct Answer: C

---

#### QUESTION 4

What is the major weakness of a bar code card system?

- A. The cards are expensive.
- B. The cards interfere with RFID systems.

- C. It is relatively easy to duplicate the cards.
- D. Running a magnet next to a card reader will disrupt the accuracy of the reader.

Correct Answer: C

---

#### QUESTION 5

How do enclosures improve rack system cooling?

- A. By improving natural air flow
- B. By improving fire suppression
- C. By allowing hot and cold air to mix together
- D. By preventing hot and cold air from mixing together

Correct Answer: D

---

#### QUESTION 6

What are three transformer types? (Choose three.)

- A. Step-up transformer
- B. Isolation transformer
- C. Step-down transformer
- D. Delayed input transformer
- E. Limited induction transformer

Correct Answer: ABC

---

#### QUESTION 7

Which two would be used for biometric access control? (Choose two.)

- A. Voice
- B. Fingerprint
- C. Smart cards
- D. Personal identification number

Correct Answer: AB

---

### QUESTION 8

To maximize the effectiveness of data center supply air distribution, where should perforated tiles in a raised floor environment be placed?

- A. In the hot aisle only
- B. In the cold aisle only
- C. In equal amounts in both hot and cold aisles
- D. Primarily in the hot aisle with some on the perimeter of room

Correct Answer: B

---

### QUESTION 9

What are three benefits of Inergen? (Choose three.)

- A. It is non-conductive.
- B. It has zero ozone depletion potential.
- C. It has a low pressure delivery system.
- D. It requires less storage tanks than Halon.
- E. It is safe to discharge in an occupied area.

Correct Answer: ABE

---

### QUESTION 10

What are three characteristics that a data center manager should look for when selecting a clean agent suppression system? (Choose three.)

- A. Pre-action valve
- B. Non-conductive agent
- C. Minimal storage footprint
- D. Zero ozone depletion potential
- E. Manual operation requirement

Correct Answer: BCD

---

### QUESTION 11

What describes the ratio of watts to volt-amps?

- A. Frequency
- B. Power factor
- C. Actual power
- D. Apparent power

Correct Answer: B

---

#### QUESTION 12

Which two types of cables would you expect to see used in a network backbone?(Choose two.)

- A. Power cables
- B. Fiber optic cables
- C. Category 5/5e/6a cables
- D. Audio / video cables

Correct Answer: BC

---

#### QUESTION 13

Which two does the network-critical physical infrastructure (NCPI) management system monitor at the rack level?  
(Choose two.)

- A. The monitoring of a chiller at the rack level.
- B. The monitoring of comfort cooling at the rack level.
- C. The monitoring of supplemental cooling devices at the rack level.
- D. The monitoring of rack based transfer switches at the rack level.

Correct Answer: CD

---

#### QUESTION 14

Which method transfers heat through the movement of a liquid or gas?

- A. Radiation
- B. Convection
- C. Conduction
- D. Evaporation

Correct Answer: B

---

**QUESTION 15**

Which risk is minimized when data center managers deploy network-critical physical infrastructure (NCPI) solutions?

- A. Downtime caused by power interruptions.
- B. Downtime caused by high speed storage.
- C. Downtime caused by poorly trained computer operators.
- D. Downtime caused by improper operational process documentation.

Correct Answer: A
