-  **800,000+** Satisfied Customers

### QUESTION 1

After saving or checking in a virtual document, what should you do before continuing to use any of the virtual document nodes?

- A. set the virtual document to null and call `IDfSysObject.asVirtualDocument()` again
- B. call `IDfVirtualDocument.resync()` to flush all node information and use `IDfVirtualDocumentNode.getChildCount()` to rebuild the cache
- C. use the `IDfVirtualDocumentNode.getSelectedObject()` method to access objects
- D. call `IDfVirtualDocument.resync()` to flush all node information and use `IDfVirtualDocument.getRootNode()` to rebuild the cache

Correct Answer: B

---

### QUESTION 2

What is the purpose of `IDfSessionManager.authenticate` method?

- A. To get a user session when a custom authentication plugin is used
- B. To validate user credentials without getting a session
- C. To get a user session during single sign-on
- D. To validate user credentials when shared sessions are used

Correct Answer: B

---

### QUESTION 3

Which code pattern is used to handle errors after execution of an operation?

- A. `IDfOperationMonitor myOpMonitor = ...;operation.setOperationMonitor(myOpMonitor);if (! operation.execute()){// handle errors using myOpMonitor}`
- B. `if (! operation.execute()){...operation.reportError(...);...}`
- C. `if (! operation.execute()){...operation.logError(...);...}`
- D. `if (! operation.execute()){...operation.getErrors();...}`

Correct Answer: D

---

### QUESTION 4

What does the `IDfSysObject.checkout()` method do?

- A. only places a lock on an object from the repository
- B. places a lock on an object from the repository and downloads the content
- C. places a database row level lock on the rows representing the object
- D. places a lock on an object from the repository and sets its r\_lock\_machine attribute

Correct Answer: D

---

#### QUESTION 5

Which method properly executes a query and returns the appropriate results. Assume you are developing a UI tree control in a web application to display a list of cabinets. The list of cabinets is generally static. Given the below code snippet: Which value for queryType should be used to achieve the maximum performance?

- A. IDfQuery.DF\_READ\_QUERY
- B. IDfQuery.DF\_QUERY
- C. IDfQuery.DF\_CACHE\_QUERY
- D. IDfQuery.DF\_EXECCREAD\_QUERY

Correct Answer: C

---

#### QUESTION 6

Which file must be modified to enable session leak checking for a DFC application?

- A. dmcl.ini
- B. server.ini
- C. dfc.properties
- D. dbor.properties

Correct Answer: C

---

#### QUESTION 7

Given the following statement:

```
IDfld idObj = session.getIdByQualification("dm_sysobject where object_name is not null");
```

What is a possible problem with using getIdByQualification() in this manner?

- A. The assignment should be cast to SysObject.
- B. The "Select \* from" portion is missing from the qualification.

- C. The qualification may solve for more than one Id, whereas the assignment of idObjrequires only one.
- D. The qualification does not specify a request for the Id (or "Select r\_object\_id from" ismissing in the qualification).

Correct Answer: C

---

#### QUESTION 8

What is the correct hierarchy in the Documentum object model?

- A. dm\_folder inherits from dm\_cabinet, which inherits from dm\_sysobject.
- B. dm\_sysobject inherits from dm\_document.
- C. dm\_document inherits from dm\_folder, which inherits from dm\_sysobject.
- D. dm\_category inherits from dm\_folder, which inherits from dm\_sysobject.

Correct Answer: D

---

#### QUESTION 9

When implementing the isCompatible() method for an SBO, it should be implemented such that it checks whether the \_\_\_\_\_.

- A. string passed as an argument is a supported version by this SBO
- B. string passed as an argument matches a feature that the SBO supports
- C. string passed as an argument is an interface that this SBO implements
- D. SBO has a method with the name of the argument that was passed

Correct Answer: A

---

#### QUESTION 10

How do you register the TBO and SBO packages in Documentum 5.3 or later?

- A. copy the jar file toDocumentum/dba/java\_methods
- B. create a new module using Application Builder
- C. copy the jar file to the DFC client that calls them
- D. register the package using the BOFRegister utility

Correct Answer: B

---

#### QUESTION 11

What is the purpose of IDfDynamicInheritance?

- A. allows dynamic inheritance of all IDfSysObject\\'s public methods to the TBO
- B. provides the ability to override the parent class method
- C. allows DFC to adjust the class hierarchy at run-time
- D. allows dynamic loading of the TBO from the repository to the DFC client

Correct Answer: C

---

#### QUESTION 12

Which statement about IDfXMLQuery is true?

- A. The execute method of the IDfXMLQuery returns a DOM object.
- B. By default, the element name for the root of the XML output is .
- C. By default, content will be included (the result of the execute method will include content).
- D. If an error occurs during processing, the default tag name for including error messages is .

Correct Answer: D

---

#### QUESTION 13

The following line appears in a DFC trace log file: [main] .MyTBO@eb724.setObjectName("My New Object") What does the "eb724" represent?

- A. the DMCL session Id of the connected session
- B. the repository ID to which the user is connected
- C. the hash code of the Java object of MyTBO class
- D. part of the object ID of the object being processed

Correct Answer: C

---

#### QUESTION 14

Which statement is true about Trusted Content Services (TCS)?

- A. TCS is not required to create ApplicationPermission entries.
- B. TCS is not required to evaluate ApplicationPermission entries.

C. TCS is not required to delete ApplicationPermission entries.

D. TCS validates and enforces application permissions at the server level.

Correct Answer: B

---

#### QUESTION 15

How many objects will have their subject attribute updated when the following code is executed? (Assume that there are 25 objects having the string `test` in their `object_name`.)

A. 19

B. 20

C. 24

D. 25

Correct Answer: B
