QUESTION 1

What is a characteristic of tree quotas?

A. Quotas cannot be applied to the root of a file system

B. Tree quotas can be set on existing directories

C. A maximum of 4096 quota trees can be set on a single file system
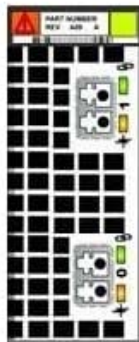

D. Tree quota policies are applied by default

Correct Answer: A

QUESTION 2

Refer to the exhibit.

a. 4-port 2/4/8 Gb FC I/O Module

b. 2-port 10 GbE optical I/O Module

c. 2-port FCoE I/O Module

d. 4-port 1 GbE BaseT I/O Module

e. 4-port (2 copper/2 optical) 1 GbE I/O Module

Which I/O module combination could be used in Slot 0 within a VNX Gateway X-Blade?

A. a. and c.

B. a. and b.

C. a., b., and d.

D. a., c., and e.

Correct Answer: A

QUESTION 3

For all Linux environments, how many Fibre Channel initiator ports are supported on a single host?

A. 16

B. 8

C. 12

D. 24

Correct Answer: A

QUESTION 4

What will prevent a storage administrator from deleting a storage group?

A. The presence of hosts in the storage group

B. The presence of LUNs in the storage group

C. The presence of MirrorView source LUNs in the storage group

D. The presence of MirrorView target LUNs in the storage group

Correct Answer: A

QUESTION 5

What happens when a new CIFS share is created using Unisphere and all available CIFS server check boxes remain unchecked?

A. A global share is created and served by all CIFS servers residing on the Data Mover.

B. None of the CIFS servers residing on the Data Mover serve the newly created share.

C. The VNX system prompts for selection of at least one CIFS server.

D. A global share is created and served by the primary VDM.

Correct Answer: A

QUESTION 6

When provisioning a new logical unit, which RAID group property is the basis for limiting the LUN capacity that can be specified?

A. Largest contiguous free space

B. Total formatted capacity

C. Total raw capacity

D. Largest user capacity

Correct Answer: A

QUESTION 7

Which criterion must be met before executing the storagepool destroy command with Navisphere Secure CLI?

A. Complete removal of all LUNs from the pool

B. Complete removal of unused LUNs from the pool

C. Complete removal of large LUNs from the pool

D. Complete removal of empty LUNs from the pool

Correct Answer: A

A. Virtual Storage Integrator (VSI)

B. VMware Aware Storage API (VASA)

C. vStorage API for Array Integration (VAAI)

D. VNX Unisphere Service Manager (USM)

Correct Answer: A

QUESTION 10

The Unified Storage Management plugin for VMware assists in automating the provisioning of storage on a VNX Storage System. What types of storage can be provisioned through the Provision Storage wizard?

A. NFS, VMFS and RDM

B. NFS, VMFS, RDM and iSCSI

C. VMFS and iSCSI

D. NFS and CIFS

Correct Answer: A

QUESTION 11

What is the only kind of LUN that VNX Snapshots can use?

A. Pool LUNs

B. Traditional LUNs

C. Clone Private LUNs

D. Reserved LUNs

Correct Answer: A

QUESTION 12

What is the maximum file system size currently supported on a VNX system?

A. 2 TB

B. 16 TB

C. 32 TB

D. 64 TB

Correct Answer: B

QUESTION 13

Where are VNX SnapView fracture logs stored?

A. Clone private LUN

B. Reserved LUN pool

C. Clone LUN

D. Source LUN

Correct Answer: A

QUESTION 14

A Storage Administrator created several new LUNs for an existing SAN attached Linux host. Some of the new LUNs are owned by SPA and some are owned by SPB. Linux can only see some of the new LUNs.

Which troubleshooting step should be completed next?

A. Check the EMC Host Connectivity Guide for Linux to verify the maximum number of LUNs visible to the host

B. Check the zoning to verify that all HBAs can see all of the ports on each Storage Processor

C. Check the agent.config file on the host to verify the maximum number of LUNs the host can manage

D. Check the LUN ownership of each LUN to make sure none are trespassed

Correct Answer: A

QUESTION 15

How much FAST Cache storage can be allocated as cache?

A. 500 GB

B. 1 TB

C. 2 TB

D. 4 TB

Correct Answer: C
