QUESTION 1

Which daemon supports remote execution requests for backup requested by EMC NetWorker Management Console?

A. nsrfsra

B. nsrexecd

C. nsrjobd

D. nsrd

Correct Answer: A

QUESTION 2

An EMC NetWorker customer has one tape library with two tape drives. The customer has determined that 10 save sets, running in parallel, will optimize the throughput to the individual tape drives.

Which parameter can be changed so that the optimal amount of save sets is sent to one tape drive before using the next drive?

A. Target sessions

B. Client parallelism

C. Server parallelism

D. Group parallelism

Correct Answer: A

QUESTION 3

The three primary types of EMC NetWorker hosts form an architecture/topology.

What is this called?

A. EMC NetWorker Data Zone

B. EMC NetWorker Storage Domain

C. EMC NetWorker Storage Zone

D. EMC NetWorker Cell

Correct Answer: A

QUESTION 4

What is a characteristic of EMC NetWorker virtual synthetic full backups?

A. All participating savesets must be on the same Data Domain system

B. Participating savesets must use a deduplication node for storage

C. Backup processing occurs on the storage node, bypassing the client

D. Deduplication processing occurs on the client, bypassing the storage node

Correct Answer: A

QUESTION 5

What is a characteristic of cloud volumes in EMC NetWorker?

A. Infinitely appendable

B. Recyclable

C. Space is never reclaimed

D. Compression and encryption are unavailable

Correct Answer: A

QUESTION 6

What is a benefit of using multiplexing with EMC NetWorker backups?

A. Improved backup device throughput

B. Improved restore times

C. Reduced network traffic

D. Reduced CPU utilization on the backup client

Correct Answer: A

QUESTION 7

You are using EMC NetWorker Management Console (NMC) to manage an EMC NetWorker server. You want to add a second data zone to your environment and monitor this data zone using the existing NMC.

How can this be done?

A. Add the second EMC NetWorker server as a new host under the NMC enterprise hierarchy.

B. Add the new EMC NetWorker server to the servers file on the NMC host.

C. Grant the console user role to the administrator of the new server.

D. Select diagnostic mode in the NMC Setup window.

Correct Answer: A

QUESTION 8

You are troubleshooting a problem with EMC NetWorker resources. Some of the attributes are not being displayed in EMC NetWorker Administration GUI.

What is done to display the advanced attributes?

A. Enable Diagnostic Mode

B. Log in as administrator

C. Rescan all devices

D. Restart gstd and NMC

Correct Answer: A

QUESTION 9

Which EMC NetWorker command can be used to determine the number of records in the Client File Index for each client?

A. nsrls

B. mminfo

C. nsrinfo

D. gstclreport

Correct Answer: A

QUESTION 10

An EMC NetWorker server has one advanced file type device and a library with four tape drives. Two tape drives are dynamically shared with a NetWorker storage node. One of these shared drives has failed and is now disabled.

By default, how many nsrmmd processes are now running on the NetWorker server?

B. 5

C. 6

D. 7

Correct Answer: D

QUESTION 11

A Dell EMC NetWorker backup administrator wants to run a clone after backing up their Microsoft Windows clients.

Which configuration will combine the backup and clone?

A. Policy

B. Protection Group

C. Action

D. Workflow

Correct Answer: A

QUESTION 12

In EMC NetWorker backup environment, server parallelism is set to 8 as shown in the exhibit.

How many save sessions will be directed to each device?

A. 2
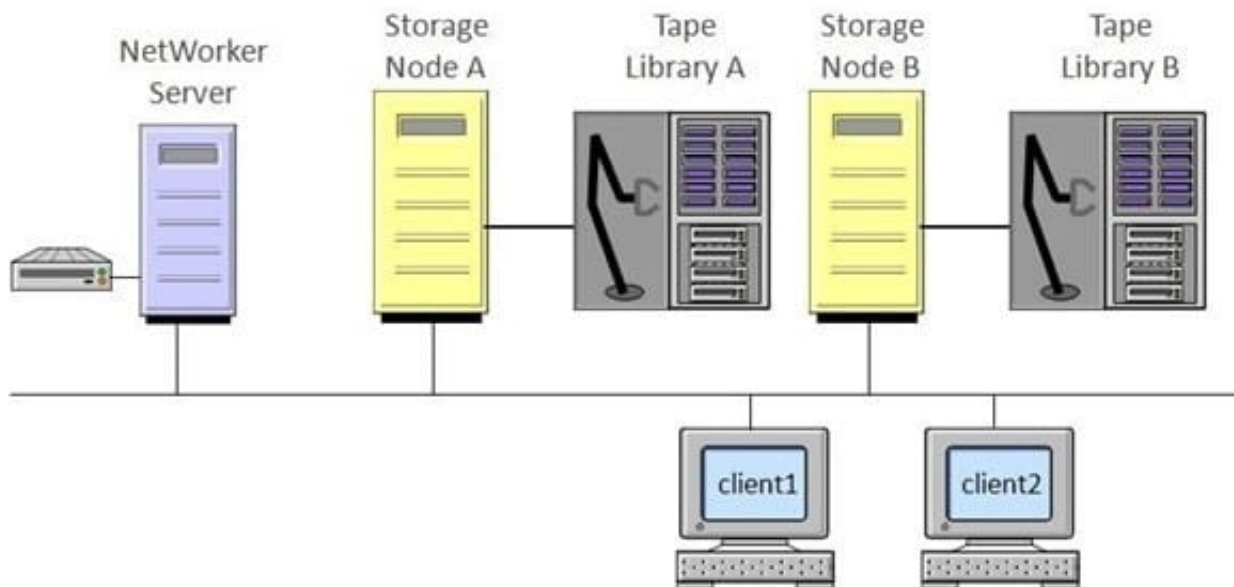

B. 4

C. 6

D. 8

Correct Answer: B

QUESTION 13

In EMC NetWorker, what is a characteristic of a probe-based group backup?

A. Name of the probe script must begin with "nsr" or "save"

B. Probe script must reside on a user-defined directory

C. A group does not allow multiple probes to be run

D. Probe processing occurs throughout the day

Correct Answer: A

QUESTION 14

Refer to the exhibit.

How many nsrmmd processes are running on each remote storage node?

A. 4

B. 5

C. 1

D. 9

Correct Answer: A

QUESTION 15

What is a benefit of the EMC NetWorker remote device support feature?

A. Distributes the backup workload throughout a data zone

B. Sends backup data directly to the backup device, bypassing the storage node

C. Isolates groups of clients from other clients in the data zone

D. Reduces the capacity requirements for backup storage

Correct Answer: A
