QUESTION 1

After installation of a VNX Block system, you are tasked with completing the installation of the ESRS IP monitoring system.

Which component must have its RemotelyAnywhere filter table updated?

A. Storage processor

B. Link control card

C. Control Station

D. ESRS server

Correct Answer: A

QUESTION 2

You are on a customer site to perform a software upgrade on a VNX Block storage system. You have worked with the customer to install USM on a system that has IP connectivity to the VNX system and the Internet. What is the behavior of the Download Software Updates Wizard in USM?

A. It advises the user of the current version of VNX OE for Block software on the system and then connects the user to Powerlink for downloads of the appropriate versions of the VNX OE for Block upgrade software.

B. It advises the user of the current versions of VNX OE for Block software on the system and requires the user to navigate to Powerlink for downloads of the appropriate versions of VNX OE for Block upgrade software.

C. The user must manually look for the current versions of VNX OE for Block software on the system and must manually navigate to Powerlink for downloads of the appropriate versions of the VNX OE for Block upgrade software.

D. The user must manually look for the current versions of VNX OE for Block software on the system and must manually connect to Powerlink for downloads of the appropriate versions of the VNX OE for Block and language pack software.

Correct Answer: A

QUESTION 3

A. VNX Installation Assistant

B. Unisphere Service Manager

C. VNX Procedure Generator

D. Powerlink Knowledgebase

Correct Answer: C

QUESTION 4

What protocols does the Data Mover support?

A. CIFS, NFS, pNFS and MPFS

B. CIFS, pNFS, and SCSI

C. MPFS, HTTP, FTP, and NFS

D. NFS, FC, and CIFS

Correct Answer: A

QUESTION 5

In a VNX File procedure, which component is imaged back to a state where the VNX Installation Assistant can be rerun?

A. Control Station

B. Control LUNs

C. NAS partitions

D. Data Movers

Correct Answer: A

QUESTION 6

You have been tasked to run a test of dual Control Station high-availability event notification. Which command should be run from the primary Control Station for this task?

A. cs_standby -failover

B. server_standby server_2 -a mover

C. cs_standby -takeover

D. server_standby server_3 -a mover

Correct Answer: A

QUESTION 7

When using USM\\'s Capture Diagnostic Data feature, where are the files automatically stored upon completion of this task?

A. They are in the C:\EMC\repository folder located on the system running USM.

B. They are automatically uploaded to EMC support if the system is registered.

C. The user is prompted to either view them or upload them to EMC if ConnectHome is configured.

D. They are automatically stored in the repository located on the VNX vault drives.

Correct Answer: A

QUESTION 8

From which resource would you obtain the VNX Block recovery document?

A. VNX Procedure Generator

B. VNX Installation Toolkit

C. VNX Installation Assistant

D. VNX Series Product Page

Correct Answer: A

QUESTION 9
