QUESTION 1

Is the checklist created to determine the test basis dependent on the selected test design technique?

A. yes

B. no

Correct Answer: A

QUESTION 2

What constitutes a good test environment?

A. it is possible to adequately determine to what extent the test object meets the requirements

B. it has been configured and tested by qualified personnel

C. it meets both of the requirements listed above

D. it is as similar to the production environment as possible and the test data is consistent

Correct Answer: A

QUESTION 3

What is to be preserved in the activity reserving the testware? What is to be preserved in the activity?

A. all testware created during the project

B. a selection of the testware in consultation with the future administrator

Correct Answer: B

QUESTION 4

Which test design technique can be used to test performance?

A. Data Cycle Test

B. Process Cycle Test

C. Real-Life Test

Correct Answer: C

QUESTION 5

See the specification below:

IF A AND (B OR C)

THEN error message

ENDIF

How many logical test cases are distinguished if Semantic Testing with coverage type decision points condition/decision coverage is used?

- A. 2
- B. 3
- C. 4
- D. 8

Correct Answer: A

QUESTION 6

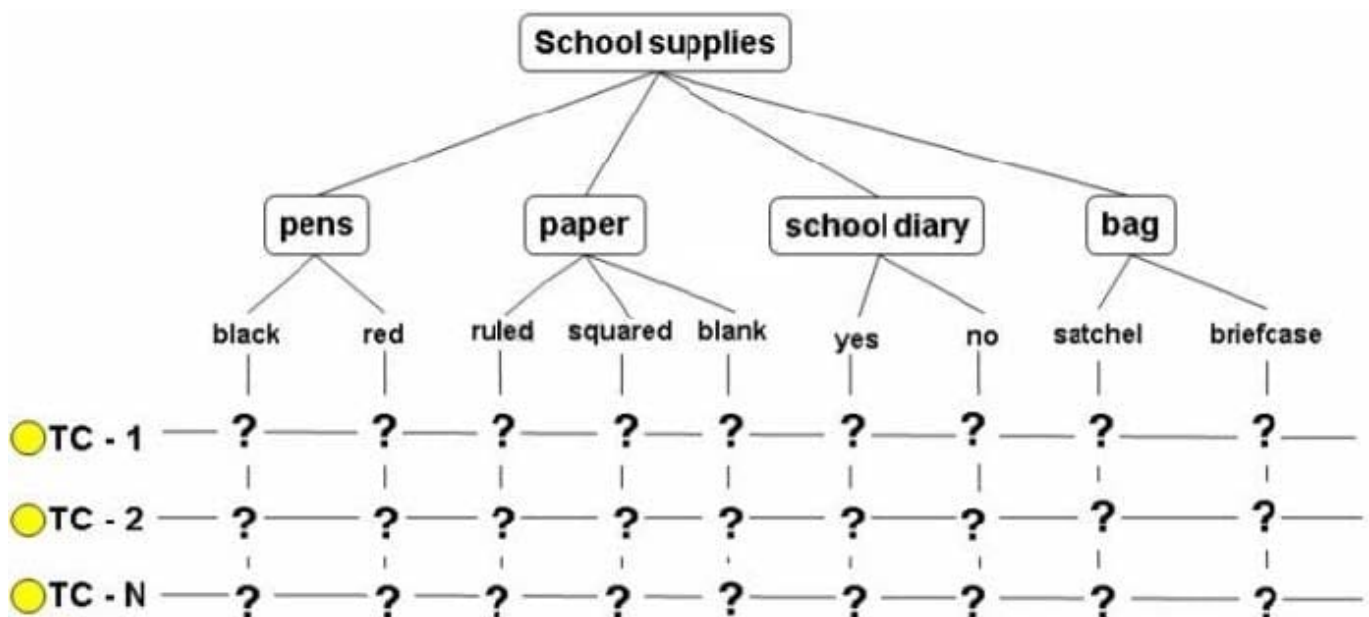

See the diagram below:

In order to test the purchase of school supplies, logical test cases must be created based on the data combination test. It has been agreed in this instance that a medium depth test is required. This means that all data must be subjected to

pairwise testing:

Pens - paper - school diary - bag

The test cases are designed using the below classification tree.

What is the minimum number of test cases that will be generated by applying the pairwise testing technique? (What is "N" at a minimum?)

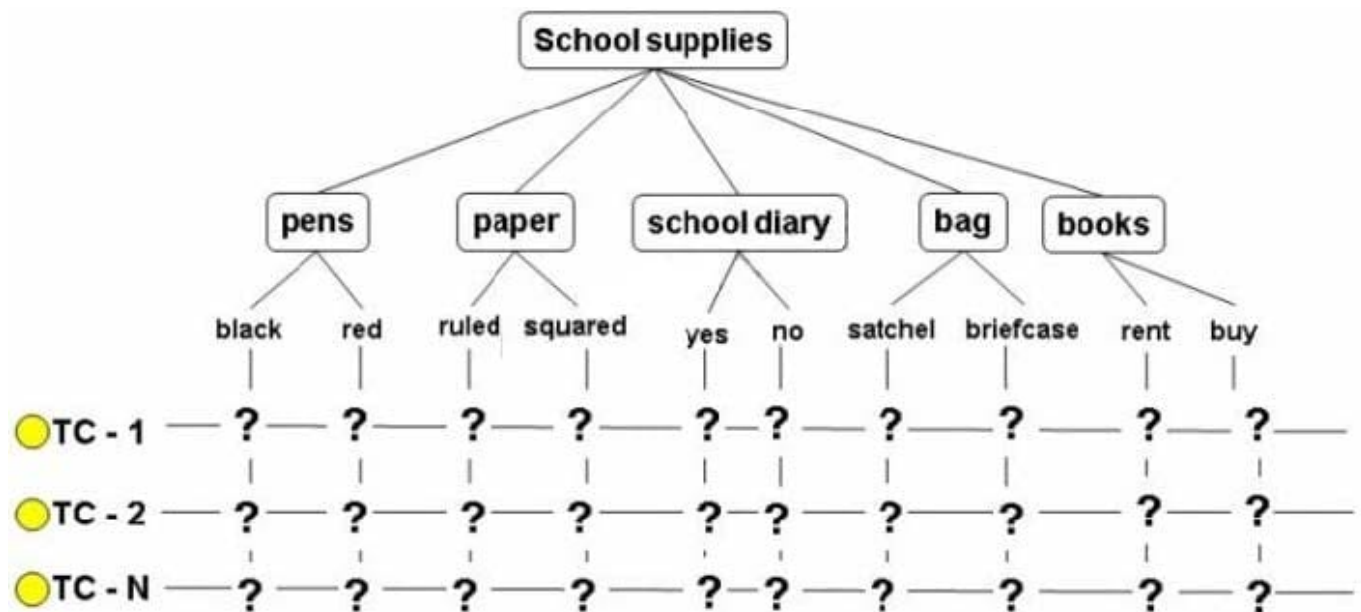

- A. 6
- B. 8
- C. 12
- D. 24

Correct Answer: A

QUESTION 7

See the diagram below:

In order to test the purchase of school supplies, logical test cases must be created based on the data combination test. It has been agreed in this instance that a medium depth test is required. This means that all data must be subjected to pairwise testing:

What is the minimum number of test cases that will be generated by applying the pairwise testing technique? (What is "N" at a minimum?)

- A. 4
- B. 6
- C. 16
- D. 32

Correct Answer: B

QUESTION 8

See the definition below: The ease with which the information system can be adapted to new requirements of the user and the changing external environment, or to correct errors. Of which quality characteristic is this the definition?

- A. manageability
- B. flexibility
- C. maintainability

Correct Answer: C

QUESTION 9

What is a major reason for evaluating the test basis during the preparation phase?

- A. Avoiding costly corrective work at a later stage of the project.
- B. Being able to design the test infrastructure at an earlier stage.
- C. Being able to build test data quickly.

Correct Answer: A

QUESTION 10

Business-driven test management allows the business client to control the test process and help determine the test approach. Which aspects can the client control?

- A. The balance between results and risks versus time and costs.
- B. The quality of the test object.
- C. The test design techniques to be used.
- D. Reducing the probability of software failure.

Correct Answer: A
