QUESTION 1

When developing vulnerability remediation workflows, it is recommended that the majority of patches be categorized as which type of change?

- A. Manual
- B. Routine
- C. Critical
- D. Exception

Correct Answer: C

QUESTION 2

Using a network extraction approach for logging requires which of the following?

- A. Scripts to parse multiple log formats
- B. Sensors to capture mirrored traffic
- C. System service configuration changes
- D. System remote agents for log collection

Correct Answer: A

QUESTION 3

Which of the following types of authentication is generally used for public Internet Web sites?

- A. Anonymous authentication
- B. Integrated Windows authentication
- C. Basic authentication
- D. Digest authentication

Correct Answer: A

QUESTION 4

Which of the following is used to describe a managed collection of related projects?

- A. Knowledge Area
- B. Operation
- C. Program
- D. Process Group

Correct Answer: C

QUESTION 5

Mark works as a Network Administrator for NetTech Inc. The company has a Windows Server 2008 domain based network. The network contains four Windows Server 2008 member servers with different roles and 120 Windows Vista client computers. Mark has implemented a Streaming Media Services server on the network. Users complain that they are unable to view the contents when using their Windows Media Players. Mark investigates and finds that the firewall only allows ports 80 and 443 for traffic. Mark wants to ensure that the users can view the contents. What will Mark do to accomplish the task?

- A. Configure firewall to allow port 110
- B. Re-install Windows Media player on the users' computers
- C. Configure firewall to allow port 25
- D. Enable HTTP Streaming

Correct Answer: D

QUESTION 6

Which of the following files must be configured to enable hostname lookups to use the Domain Name Service (DNS)?

- A. libnss_ldap
- B. /etc/pam.d
- C. /etc/nsswitch.conf
- D. /etc/pam.d/sshd

Correct Answer: C

QUESTION 7

You are the program manager for your project. You are working with the project managers regarding the procurement processes for their projects. You have ruled out one particular contract type because it is considered too risky for the program. Which one of the following contract types is usually considered to be the most dangerous for the buyer?

- A. Cost plus incentive fee
- B. Cost plus percentage of costs
- C. Time and materials
- D. Fixed fee

Correct Answer: B

QUESTION 8

Which of the following is a common feature of SSL VPNs?

- A. Transport mode
- B. Security associations
- C. IKE key exchange
- D. Browser portal

Correct Answer: D

QUESTION 9

Mark works as a Network Administrator for Infonet Inc. The company has a Windows 2003 domainbased network. The network contains five Windows 2003 member servers and 300 Windows XP Professional client computers. Mark is setting up a wireless network for the company. He is planning to implement 802.1x authentication for this new wireless network. Mark is not planning to use a public key infrastructure (PKI) and certificates for authentication. Mark also wants an encrypted authentication channel and a fast reconnect using cached session keys. Which of the following authentication methods will he use to accomplish the task?

- A. Protected EAP (PEAP)
- B. EAP-Transport Layer Security (EAP-TLS)
- C. Shared Key authentication
- D. Digest authentication

Correct Answer: A

QUESTION 10

What email validation technology only allows email from systems specified in DNS?

- A. ARC
- B. SPF

C. DMARC

D. HMAC

Correct Answer: C

QUESTION 11

You are the project manager of the GYG Project. A new scope change is being considered for your project. You are concerned, however, that the scope change may add costs, risks, and adversely affect the project schedule. What project management process is responsible for evaluating the full effect of a proposed scope change on your project?

A. Schedule change control

B. Scope change control

C. Integrated change control

D. Change Control Board approval process

Correct Answer: C

QUESTION 12

Which of the following are vulnerable to social engineering attacks? Each correct answer represents a complete solution. Choose two.

A. Minimal trained company employees

B. Encrypted data on the hard disk drive

C. A public building that has shared office space

D. An office with a biometrics authentication system

Correct Answer: AC

QUESTION 13
