- A. FileInputStream
- B. ObjectOutputStream
- C. ObjectInputStream
- D. FileOutputStream

Correct Answer: C

QUESTION 7

Mark works as a Programmer for InfoTech Inc. He develops the following code snippet.

1.
`public class Header`
2.
`{`
- 3.

```
//code//
```

4.

```
{
```

5.

```
System.out.println("Print the code.");
```

6.

```
super.finalize();
```

7.

```
}
```

8.

```
}
```

Which of the following header statements should be placed at line 3 to execute the program successfully?

- A. void finalize() throws Exception
- B. private void finalize() throws Exception
- C. protected void finalize() throws Throwable
- D. void finalize() throws Throwable

Correct Answer: C

QUESTION 8

Which of the following are valid class declarations?

Each correct answer represents a complete solution. Choose all that apply.

- A. public abstract final Ques0160c
- B. public abstract class Ques0160a
- C. final public class Ques0160b
- D. native synchronized class Ques0160d

Correct Answer: BC

QUESTION 9

Which of the following elements contains the element in the deployment descriptor?

- A.
- B.
- C.
- D.
- E.

Correct Answer: C

QUESTION 10

You work as a programmer for PassGuide.Inc. You have a session object named session1 with an attribute named Attribute1, and an HttpSessionBindingEvent object binding1 bound to session1. Which of the following will be used to retrieve Attribute1? Each correct answer represents a complete solution. Choose all that apply.

- A. Object obj=binding1.getSession().getAttribute("Attribute1");
- B. Object obj=binding1.getAttribute("Attribute1");
- C. Long MyAttribute=session1.getAttribute("Attribute1");
- D. String str1=session1.getAttribute("Attribute1");
- E. Object obj=session1.getAttribute("Attribute1");

Correct Answer: AE

QUESTION 11

Mark develops an application using Java language. He writes the following code snippet in the application.

```
public class mClass{  
    public static void main(String args[]){  
        try{  
            return;  
        }  
        finally{System.out.print("Finally");}}
```

What will happen when Mark attempts to compile and execute the code snippet?

- A. The code snippet will compile successfully and the output will be displayed as "Finally".
- B. The code snippet will compile successfully, but an exception message will be displayed at runtime.
- C. A compile time error will occur because the catch block is not defined.

D. The code snippet will compile successfully, but nothing will be displayed as output on execution.

Correct Answer: A

QUESTION 12

Which of the following statements is true about the Java synchronized keyword?

- A. It prevents multiple threads from accessing a block of code at the same time.
- B. It allows the class to be loaded as soon as the JRE starts.
- C. It prevents multiple developers from code redundancy.
- D. It allows two different functions to execute in a shared manner.

Correct Answer: A

QUESTION 13

Which of the following methods are used in the verification of a signature? Each correct answer represents a complete solution. Choose all that apply.

- A. initVerify
- B. update
- C. verify
- D. initSign

Correct Answer: BC

QUESTION 14
