QUESTION 1

Which of the following techniques is used to transmit passwords during authentication?

A. Asymmetric encryption

B. Hashing

C. Salted Hash

D. Symmetric encryption

Correct Answer: C

QUESTION 2

Allen works as a Software Developer for Mansoft Inc. He creates an ASP.NET Web application named MyApplication. He wants to use the Health Monitor to monitor MyApplication to record details about events rather than just the values of specific data counters. Which of the following health monitoring child elements will he use to accomplish the task?

Each correct answer represents a complete solution. Choose all that apply.

A. Rules

B. Profiles

C. bufferModes

D. customErrors

E. eventMappings

F. Providers

Correct Answer: ABCEF

QUESTION 3

You work as a Software Developer for ABC Inc. You are defining a component for an application. In some deployments, the component will be deployed on the same computer as the application. In other deployments the component will be deployed on a separate computer. The component has implicit dependencies and needs to access and use server-side resources that cannot cross system boundaries.

You must ensure that your component design supports both deployment scenarios. What will you do to accomplish the task?

A. Create a SingleCall object.

B. Create a marshal-by-value object.

C. Create a marshal-by-reference object.

D. Create a Singleton object.

Correct Answer: C

QUESTION 4

You work as a Software Developer for ABC Inc. You create a Web page named MyWebForm1.aspx that displays a student\\'s registration form. The page uses three CheckBox controls and several other Web server controls on the page. The CheckBox controls contain information about the educational qualifications. You want to ensure that a message containing educational status and relevant information is displayed as soon as a user clicks the CheckBox controls. Which of the following actions will you take to accomplish the task?

Each correct answer represents a part of the solution. Choose two.

A. Set the AutoPostBack property to false.

B. Use the CheckedChanged event.

C. Set the CausesValidation property to false.

D. Set the CausesValidation property to true.

E. Set the Checked property to true.

F. Set the AutoPostBack property to true.

Correct Answer: BF

QUESTION 5

You work as a Software Developer for ABC Inc. The company uses Visual Studio .NET as its application development platform. You are creating an application using the .NET Framework. You need to save a graphical object from the application. The graphical object is a collection of x and y points, each represented by using a single precision floating point number. You want to use the least amount of disk space by the saved object. Which the following classes will you use to accomplish this task?

A. XmlWriter

B. StreamWriter

C. TextWriter

D. BinaryWriter

Correct Answer: D

QUESTION 6

John works as a Software Developer for DawnStar Inc. He creates a class, named MyClass1. He wants to generate a

key pair that he will use to give the compiled assembly a strong name. Which of the following tools will he use to accomplish the task?

A. Installutil.exe

B. Gacutil.exe

C. Sn.exe

D. Al.exe

Correct Answer: C

QUESTION 7

Which of the following is used, if a reference to an object is required to be made when it is passed from one application to another?

A. Marshal By Reference object

B. Singleton object

C. SingleCall object

D. Marshal By Value object

Correct Answer: A

QUESTION 8

John works as a Software Developer for DawnStar Inc. He creates a class, named MyClass1. He wants to generate a key pair that he will use to give the compiled assembly a strong name. Which of the following tools will he use to accomplish the task?

A. Gacutil.exe

B. Sn.exe

C. Installutil.exe

D. Al.exe

Correct Answer: B

QUESTION 9

Nick works as a Programmer for ES International Ltd. The company is a manufacturer and a dealer of new cars. This year, the annual sales report of the company showed that the sale of its Escort car model dropped significantly. To lower the inventory of the Escort car model, the company management finally decided to give a 25 to 30 percent discount on the Escort model. Nick receives an XML document that contains a list of the company\\'s car models. Nick wants to load the incoming XML document into a memory stream. He also needs to use another XML document. Which

of the following methods will he use to accomplish this task?

Each correct answer represents a complete solution. Choose two.

A. LoadXml()

B. WriteTo()

C. Load()

D. ImportNode()

Correct Answer: CD

QUESTION 10

You work as a Software Developer for ABC Inc. The company uses Visual Studio.NET 2008 as its application development platform. You create an ASP.NET Web application using the .NET Framework 3.5. The application is used to map HTTP requests to HTTP handlers based on a file name extension. You need to ensure that each HTTP handler processes individual HTTP URLs or groups of URL extensions in the application.

Which of the following built-in HTTP handlers will you use to accomplish this task?

Each correct answer represents a part of the solution. Choose all that apply.

A. Generic Web handler (*.ashx)

B. Generic handler (*.ashx)

C. Web service handler (*.asmx)

D. ASP.NET page handler (*.aspx)

E. Trace handler (trace.axd)

Correct Answer: ACDE

QUESTION 11

John works as a Software Developer for CyberOrbit Inc. He develops an application, named App1, using Visual C# .NET. He implements security by using the security classes of the .NET Framework. In the application code, he uses the

following statements to create two PrincipalPermission objects representing two different administrative users:

PrincipalPermission Perm1 = new PrincipalPermission("Mark", "Manager");

PrincipalPermission Perm2 = new PrincipalPermission("Davis", "Manager");

John wants to create a new PrincipalPermission object by combining these two objects and use the new object to make a demand. He wants the demand to succeed only if the current principal object represents either Mark or Davis in the role

of Manager. Which of the following methods will he use to create the new permission?

A. Intersect

B. Copy

C. IsSubSetOf

D. Union

Correct Answer: D

QUESTION 12

Which of the following elements will you use to add a script to the ScriptManager declaratively?

A.

B.

C.

D.

Correct Answer: B

QUESTION 13

You work as a Web Application Developer for SunInfo Inc. The company uses Visual Studio 2008 as its application development platform. You create a Web application using .NET Framework 3.5.

You want to ensure that the data input by a user falls within a predetermined range. Which of the following validation controls will you use to accomplish the task?

A. RangeValidator

B. CompareValidator

C. RequiredFieldValidator

D. RegularExpressionValidator

Correct Answer: A
