-  **800,000+** Satisfied Customers

QUESTION 1

Which HP Storage product is optimized for Solid State Drive (SSD) performance?

- A. HP 3PAR StoreServ 7450 Storage
- B. HP 3PAR StoreServ 7200 Storage
- C. HP StoreVirtual 4335 Storage
- D. HP StoreVirtual 4730 Storage

Correct Answer: A

QUESTION 2

A leading retail, corporate, and investment bank serves approximately 15 million customers within Central and Eastern Europe. They have older P4000 storage systems and want to implement the latest HP Store Virtual 4000 model. Some of their volumes that support critical applications must be moved over to the new platform.

Which HP technology enables this action without stopping the applications?

- A. HP Peer Federation
- B. HP pMotion
- C. HP Remote Motion
- D. HP Peer Motion

Correct Answer: D

QUESTION 3

A medium-sized warehouse company has built their Windows-based IT environment over time. They have recently virtualized their servers using VMware technologies. They want to build a centralized storage solution but without a new storage network. Your solution is based on the HP StoreEasy product.

Which common features meet the customer requirements? (Select two)

- A. StoreEasy Management
- B. 16 Petabyte namespace
- C. SAN gateway facility
- D. node-based flexibility
- E. NFS 4.1 protocol support

Correct Answer: AC

QUESTION 4

Which HP 3PAR StoreServ feature will ensure minimum IOPS and latency for a specific application?

- A. HP 3PAR StoreServ Enhanced Priority Optimization
- B. HP 3PAR StoreServ configured with SSDs
- C. HP 3PAR StoreServ Adaptive Optimization
- D. HP 3PAR StoreServ Dynamic Optimization

Correct Answer: C

QUESTION 5

Which improvement to the standard features of HP StoreEasy Storage enables deduplication of data?

- A. HP StoreOnce software
- B. HP Smart Array Advanced Pack 2.0
- C. HP Data Protector software
- D. Microsoft Windows Storage Server 2012

Correct Answer: D

QUESTION 6

What are characteristics of SSD drive technology? (Select two.)

- A. Any SSD will immediately lose data when power is removed.
- B. SSD drives are recommended for storage array-tiring strategies
- C. SSD drives compress data natively via the drive interface with an embedded controller.
- D. SSD drives provide faster write performance by eliminating the need for raid calculations
- E. SSD drives manage wear leveling via the drive interface board and embedded controller.

Correct Answer: AD

QUESTION 7

Which HP Storage solution provides automatically-optimized tiered storage and thin provisioning?

- A. HP MSA P2000

- B. HP EVA P6000
- C. HP StoreVirtual
- D. HP 3PAR StoreServ

Correct Answer: D

QUESTION 8

When designing an HP 3PAR StoreServ environment that involves HP Peer Motion, which configuration requirements must be considered? (Select Two)

- A. All host servers connected to the target array must be removed from the Fibre Channel zoning to prevent data corruption.
- B. Source and destination arrays must be at InForm software version 3.1.2 or higher.
- C. The destination system cannot import volumes with existing Remote Copy membership.
- D. Volume Sets are not supported during the migration and volume-set membership must be removed.

Correct Answer: BC

QUESTION 9

What does Converged Enhanced Ethernet (CEE) add to legacy Ethernet to allow it to carry block-based storage traffic?

- A. TCP offload
- B. Lossless behavior
- C. Jumbo frames
- D. Data re-transmission

Correct Answer: B

QUESTION 10

Which statements are true when zoning an HP MSA P2000 G3 FC array into a fabric? (Select two.)

- A. The array can be in multiple operating system zones.
- B. Overlapping storage port zones may be configured
- C. Zoning is required for all operating systems that access the array.
- D. Zoning is not required for a single operating system.
- E. The array required port-based zoning to be configured.

Correct Answer: AC

QUESTION 11

Which configuration limits have been increased for HP 3PAR storeServ 7200 arrays with HP 3PAR OS3.1.3? (Select two.)

- A. Number of disk drives
- B. Remote copy over IP ports
- C. Fibre Channel host ports
- D. iSCSI/FCOE host ports
- E. Maximum supported initiators

Correct Answer: AE

QUESTION 12

Which HP 3PAR StorServ tool can be used to collect detailed server configuration information such as the OS type version, WWN of HBAs, the iSCSI name, and host multipathing information over a secure communication channel?

- A. System Reporter
- B. Web Services API
- C. Recovery Manager
- D. Host Explorer

Correct Answer: D

QUESTION 13

Which HP tool can be used to analyze all performance counters of the existing array?

- A. HP Performance Monitor
- B. HP EVAPerf
- C. Windows Perfmon
- D. HP 3PAR System Reporter

Correct Answer: D

QUESTION 14

Which description is true of Federated Storage?

- A. spontaneous migration of heavily utilized blocks of data
- B. non-disruptive data movement between storage systems in a peer-to-peer relationship
- C. interoperation of storage systems in a heterogeneous multi-vendor environment
- D. dynamic storage system expansion with no downtime

Correct Answer: C

QUESTION 15

Which features would lead you to position an HP 3PAR StoreServ 7200 as a replacement for an existing HP 8100 Enterprise Virtual Array? (Select two)

- A. Similar feature set
- B. Compatible replication protocol
- C. Faster disk spindle speeds
- D. Thin provisioning
- E. Seamless data migration

Correct Answer: DE
