- A. define a project
- B. connect to the server
- C. authenticate user
- D. create a user
- E. define a domain
- F. select a project

Correct Answer: BCF

QUESTION 3

Before automating a test, you decide to create a library of actions to be reused to achieve testing goals.

Which elements are critical for recording the different combinations of actions?

- A. starting and ending parameters
- B. input and output conditions
- C. initial and end conditions
- D. visual and implied cues

Correct Answer: C

QUESTION 4

What is one purpose of virtual objects?

- A. to point to an object name that might be located in any object repository
- B. to map an area of your application to a standard class
- C. to utilize an object without pre-defining the object type
- D. to point to an object that will be defined later, possibly by another tester

Correct Answer: B

QUESTION 5

You added parameters in your test and defined them in the Global and Local sheets. The Global sheet includes two rows, and the Local sheet includes five rows.

If you do not change any of the default data table run settings, how many times will the test iterate?

- A. 2
- B. 5
- C. 7
- D. 10

Correct Answer: A

QUESTION 6

DRAG DROP

Click the Task button. Match the icons in the Object Spy dialog box with their descriptions. Note: Icons may be used more than once.

Match the icons in the Object Spy dialog box with their descriptions.
