QUESTION 1

Load Generator hosts are experiencing heavy memory usage.

Which Run-time Settings optimization will reduce memory usage of each of the running Vusers?

- A. Miscellaneous: Run Vuser as a process
- B. Miscellaneous: Run Vuser as a thread
- C. Think time: Ignore think time
- D. Log: Extended log

Correct Answer: B

QUESTION 2

Click the Task button. Match each output tool with its description.

Select and Place:

Match each output tool with its description.

Output Tools	Descriptions
(place here)	displays the script overall status when the script execution is complete
(place here)	lists communications between the script and the server when the script execution is complete
(place here)	summarizes the success or the failure of each step of the playback web script
(place here)	creates results in a format suitable for exporting to a third party with no access to LoadRunner tools

Output Tools

HTML Test Result	Replay Log
Test Results Window	Replay Summary

Done

Correct Answer:

Match each output tool with its description.

Output Tools	Descriptions
HTML Test Result	displays the script overall status when the script execution is complete
Test Results Window	lists communications between the script and the server when the script execution is complete
Replay Log	summarizes the success or the failure of each step of the playback web script
Replay Summary	creates results in a format suitable for exporting to a third party with no access to LoadRunner tools

Output Tools

Done

QUESTION 3

What does the lr_advance_param command do?

- A. advances all data rows between iterations
- B. immediately advances the current data row for the all columns in a data table
- C. advances a given column's data row for only one column between iterations
- D. immediately advances the current data row for only one column in a data table

Correct Answer: D

QUESTION 4

Where should you add a web_reg_save_param function to a script?

- A. in the global.h section
- B. before the step that contains the dynamic value

- C. before the step that generates a response from the server containing the value
- D. at the beginning of the action section that contains the dynamic value

Correct Answer: C

QUESTION 5

In which VuGen tab can you see dynamic parameterized data during script replay?

- A. Replay Log
- B. Recording Log
- C. RunTime Data
- D. Generation Log

Correct Answer: C

QUESTION 6

When can you view the RunTime view/tab of the script parameter data being used in a parameter?

- A. during script replay/runtime only
- B. during saving of a script
- C. during compilation of a script
- D. during execution of a script via the controller

Correct Answer: A

QUESTION 7

You add the logic `lr_message("the message");` to your script but you do not see any messages in the Output window while running the scenario in the Controller. What should you do?

- A. Add the code `lr_start_messages(1);` before the `lr_message("the message");`
- B. Change the logging options in the Controller's Run-time Settings from "only when an error occurs" to "Always Send" and "Standard Log."
- C. Add the code `lr_set_debug_message(LR_MSG_CLASS_EXTENDED_LOG | LR_MSG_CLASS_FULL_TRACE, LR_SWITCH_ON);` to the line before the `lr_message("the message");`
- D. Highlight the script in the Controller, click Details, and click Refresh Log Options.
- E. Because only 10% of the messages are logged, wait for the test to run longer.

Correct Answer: B

QUESTION 8

When choosing between HTML-based and URL-based recording modes for Web protocol, robustness and maintainability of the recorded script should be considered. What would cause the replay failure of a script recorded in HTML mode?

- A. a change in the links URL
- B. a missing image in the page, if not linked
- C. a change in the links text
- D. an extra resource in the page

Correct Answer: C

QUESTION 9

Which function is added to the script when inserting a text check during recording using the recording toolbar?

- A. web_reg_save_param
- B. web_reg_find
- C. web_reg_add_cookie
- D. web_reg_dialog

Correct Answer: B

QUESTION 10

In HTML-based and URL-based recording modes, user steps are recorded at different layers. They differ in the layer where the user steps are recorded. Why is the HTML recording name also named as "context sensitive"?

- A. because every UI object is recognized in the context of the page/window to which it belongs
- B. because the browser cache stores a copy of the page, in the context of which user actions are performed
- C. because the playback engine cache stores a copy of the page, in the context of which user actions are performed
- D. because context sensitive help suggestions are available in HTML mode only

Correct Answer: C

QUESTION 11

For which protocol(s) can automatic transactions per step be defined?

- A. all protocols
- B. Web Protocol only
- C. Citrix Protocol only
- D. SAP Protocol only

Correct Answer: B

QUESTION 12

A customer informs you that an application to be tested is Acid2 compliant. Which protocol should be used to test this application?

- A. Silverlight
- B. URL
- C. AMF
- D. HTML
- E. TruClient
- F. Click-n-Script

Correct Answer: E
