**Version:** Demo

**Question: 1**

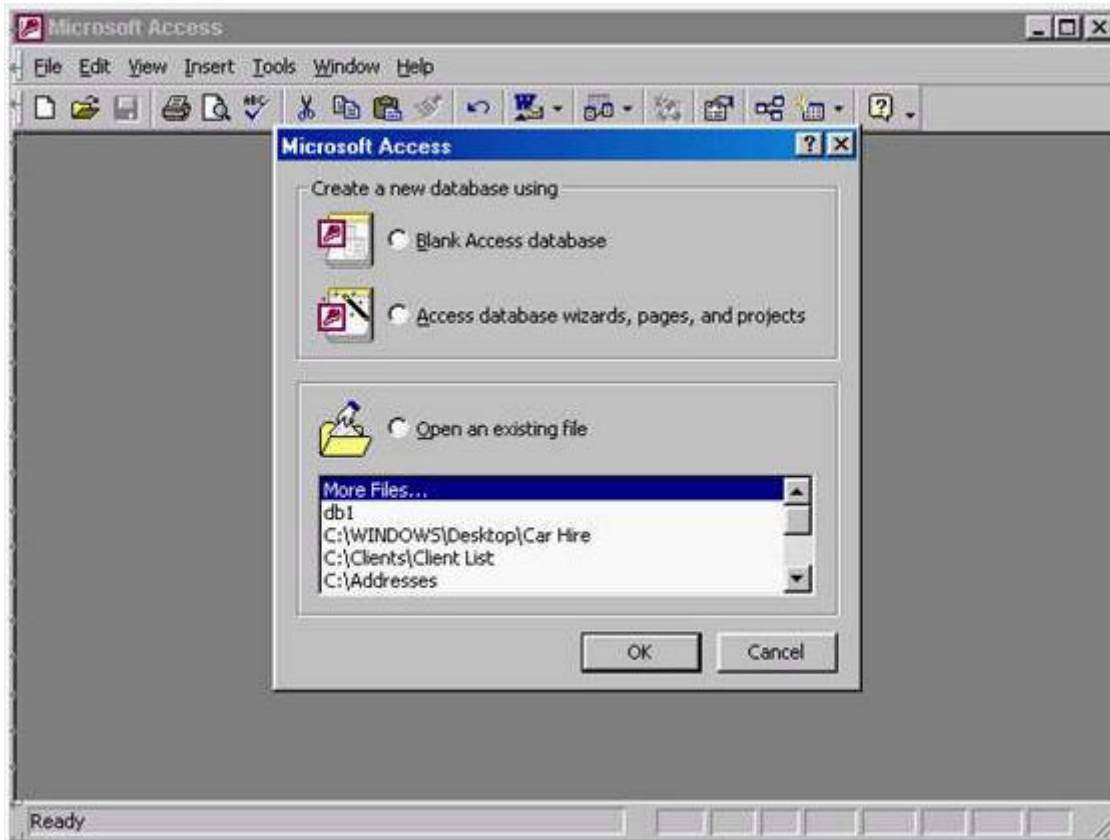

Which two of these statements about referential integrity are true?

- A. If a record in a parent table has a related child record referential integrity prevents you from deleting the parent record
- B. In Access, referential integrity is enforced by typing in a rule.
- C. You can set rules about referential integrity in a one table database.
- D. Referential integrity ensures that records in linked tables are automatically updated when changes are made.
- E. A child record cannot be entered unless it has a parent in the database if referential integrity is used

**Answer: A, E**

**Question: 2**
