QUESTION 1

How can you delete a Remember Me cookie from the user's browser?

- A. You can use the get rememberMe cookie in a JavaScript function and set the expiration time to 1 Jan 1970.
- B. You can call rememberMeService.deleteCookie(request) to delete the cookie.
- C. You can use the deleteRememberMeCookie JavaScript function provided by the client- side API.
- D. Create a URL pointing to CookieService.getInvalidateCookieURL(request,response).toString(). When the user clicks this URL, the rememberme cookie is deleted.

Correct Answer: D

QUESTION 2

Which option best describes how JSR 286-compliant portlets and widgets interact with each other?

- A. Portlets and widgets cannot interact with each other.
- B. Widgets and portlets can interact by using shared render parameters and events.
- C. Widgets and portlets can interact by using shared render parameters.
- D. widgets and portlets can interact by using events.

Correct Answer: B

QUESTION 3

Which of the following options is a false statement about the Remember Me cookie service?

- A. The Remember Me cookie service does not extend the portal personalization feature to the public area because a user identified by the Remember Me cookie service in a public area is still considered anonymous from an access control point-of-view.
- B. The Remember Me cookie service can be accessed only from JSR 168- or JSR 286- compliant portlets.
- C. You can define custom authentication levels using the Step-up authentication API.
- D. The Remember Me cookie service can be accessed from JSR 168- or JSR 286- compliant portlets, IBM Portlet API-compliant portlets, or servlets.

Correct Answer: D

QUESTION 4

Jim has created an application template using his local development environment and would like to promote this

template to his team shared development environment. What steps will he use to accomplish this?

- A. Use the Site Management portlet in the source server to promote the template definition to the target server.
- B. Use XMLAccess on the source server to export the template definition file, then use XMLAccess on the target server to import the template definition file.
- C. Use the Application Template Library portlet on the source server to export the template definition file, then use the Application Template Library portlet on the target server to import the template definition file.
- D. Use the Portal Scripting Interface on the source server to export the template definition file, then use the Portal Scripting Interface on the target server to import the template definition file.

Correct Answer: C

QUESTION 5

Which of the following statements describes the value of the Vendor variable from the following portlet code?

```
Profile p = (Profile) portletRequest.getAttribute(PortletRequest.CCPP_PROFILE);  
String vendor = p.getAttribute("Vendor").toString();
```

- A. It contains the name of the vendor of the portal server.
- B. It contains the name of the vendor of the client browser or device.
- C. It contains the value of the configuration key "vendor" for the Profile configuration service.
- D. It contains the value of the "vendor" attribute for an identified or authenticated user, or null for an anonymous user.

Correct Answer: B

QUESTION 6
