**Answer: A,C,D**

9. Sam uses Adaptive Payments' Pay API to set up payments so he is the API caller. He would like to allow "guest payment" ("guest checkout"): that is, the payer does not have to have a PayPal account but can make the payment using a credit card. To achieve that which two of the following should Sam make sure of?

A. He should use himself as the primary receiver if it is a chained payment.

B. All receivers of a guest payment need to be either Premier or Business verified PayPal accounts.

C. He should not specify the sender's email in the Pay API call that sets up the payment.

D. He should not use embedded payment flow for Adaptive Payments since guest checkout function is not available in it.

E. He should store the payer's credit card information in his site/application.

**Answer: B,C**

10. When you (as a developer, using your own API credentials) are running Express Checkout API calls on behalf of a merchant what variable can you use to pass the merchant's PayPal account email address so that the payment is associated with the merchant's account?

A. EMAIL

B. MERCHANTID

C. SELLEREMAIL

D. SUBJECT

**Answer: D**

- A. item\_shipping\_1
- B. item\_shipping\_2
- C. ship\_amt\_1
- D. ship\_amt\_2
- E. shipping
- F. shipping2

**Answer: E,F**

14. What does "authorization" mean in the context of credit card processing?

- A. Process of collecting a payment from a customer's credit card
- B. Process of obtaining customer's consent for payment
- C. Verification of availability of funds from customer's credit card
- D. None of the above

**Answer: C**

15. Which three are true about eCheck?

- A. The sender's PayPal account contains one or more bank accounts but no linked credit card.
- B. A payment is still an eCheck even though the sender has enough PayPal balance in his/her account.
- C. An eCheck payment cannot be refunded with the Refund API of Adaptive Payments.
- D. Sender and primary receiver of a chained payment cannot use eCheck.
- E. Funding of an eCheck is not available right away in the receiver's account, since PayPal needs to wait for the sender's bank to clear it first.

**Answer: A,D,E**
