Correct Answer: ABCE

QUESTION 2

What data are available to every BusinessWorks process definition for mapping purposes? (Choose two.)

- A. \$_error
- B. \$_Start
- C. \$_globalVariables
- D. \$_processContext

Correct Answer: CD

QUESTION 3

How do you define the schema required for an Assign Work activity?

- A. create a Notify resource
- B. create a Work Mapper resource
- C. create a Workflow Schema resource
- D. add the Render XML activity to the process ahead of the Assign Work activity
- E. add the Transform XML activity inside of a group with the Assign Work activity

Correct Answer: C

QUESTION 4

Assume you are using one machine to host multiple TIBCO Administration Domains. What are two disadvantages of this architecture? (Choose two.)

- A. The architecture introduces a single point of failure.
- B. The architecture complicates domain resource isolation.
- C. The architecture complicates domain backup procedures.
- D. The architecture does not facilitate centralized administrative resources.

Correct Answer: AB

QUESTION 5

Which two components may be used to specify BusinessWorks user authorization? (Choose two.)

- A. Corporate LDAP
- B. TIBCO Domain Utility
- C. TIBCO Administrator GUI
- D. TIBCO Administrator Installer

Correct Answer: AC

QUESTION 6

Which three security mechanisms are supported in TIBCO BusinessWorks? (Choose three.)

- A. SSL
- B. Kerberos
- C. username / password
- D. certificate / private key
- E. TIBCO DNS Obfuscation

Correct Answer: ACD

QUESTION 7

Which two messaging protocols can be used to communicate between a BusinessWorks process and a TIBCO Adapter? (Choose two.)

- A. SOAP
- B. RosettaNet
- C. Rendezvous
- D. Message Queues
- E. Java Message Service

Correct Answer: CE

QUESTION 8

How does BusinessWorks support the External Transformation Model?

- A. BusinessWorks requires users to create their own XSD transformation engine.
- B. BusinessWorks allows XML transformation to take place as part of every activity.
- C. BusinessWorks allows users to visually express multi-pass document transformations as transitions.
- D. BusinessWorks allows XSLT templates to be imported and executed as part of a process flow's definition.

Correct Answer: D

QUESTION 9

Which SOAP activity must be configured for BusinessWorks to return the concrete service definition?

- A. SOAP Send Fault
- B. SOAP Send Reply
- C. Retrieve Resources
- D. SOAP Event Source
- E. SOAP Request Reply

Correct Answer: C

QUESTION 10

Using the TIBCO Administrator, which three settings can you configure? (Choose three.)

- A. max log file size

- B. shared resources
- C. max log file count
- D. subprocess Call Order
- E. whether or not to run as NT Service

Correct Answer: ACE

QUESTION 11

Which two statements are true when considering the schema or metadata of event driven BusinessWorks processes? (Choose two.)

- A. External business events generated by adapters utilize statically defined schema.
- B. Developers are free to design the schema of any internal events, but not external events.
- C. Once an event occurs, there is no way to modify the schema of the event data. The developer must utilize it in its original form.
- D. Business events can be mapped into common business objects to minimize the number of schemas that business processes must deal with.

Correct Answer: AD

QUESTION 12

You are migrating your test environment to production and want to change the TIBCO Rendezvous service port used in this project from 7200 to 7400. What is the recommended method to accomplish this task before deployment?

- A. modify the server DAT file using a text editor
- B. modify the TRA file to add the service parameter
- C. open the project in TIBCO Administrator, change the service variable, and deploy
- D. use a Global Variable to set the service variable and change it before completing deployment

Correct Answer: D
