QUESTION 1

Which two statements are true about gateways and User tasks? (Choose two.)

- A. A User task can be used when interaction with a user via a form is required.
- B. A User task can have more than one associated Timer Catch Event.
- C. A gateway can be used when routing is based on process data.
- D. A gateway can be used for interaction with a user when a decision is required from the user.

Correct Answer: AC

QUESTION 2

Which statement is true when the User task's specified distribution method is Offer to All?

- A. The work item is available to all users who are members of the specified organizational entity.
- B. The work item is distributed to, and completed by all members of the specified organizational entity.
- C. Work items are distributed to members of the specified organizational entity in strict rotational order.
- D. Work items are distributed to members of the specified organizational entity in random order.

Correct Answer: A

QUESTION 3

Which three statements are true when using emulation to debug a process in TIBCO Business Studio? (Choose three.)

- A. In Debug mode, the process automatically suspends execution at each User task.
- B. Breakpoints should be added to make the tester suspend execution to allow debugging.
- C. Testpoints should be added to check the data flow.
- D. The process must be deployed to an ActiveMatrix BPM node to allow debugging.
- E. The process can be debugged before deployment.
- F. The data flow is automatically displayed.

Correct Answer: BCD

QUESTION 4

Which three statements are true? (Choose three.)

- A. Process Routing and Timer expiry functions can only be fully tested after the project is deployed.
- B. Only the current values of process instance data are available to assist in debugging.
- C. A full update history of process instance data is available to assist in debugging.
- D. Process Service tasks can be fully tested without deploying the project.
- E. The Process Event Log can assist in checking that process routing functions are operating correctly.
- F. The Process Event Log always contains details of all process instance data changes.

Correct Answer: ABE

QUESTION 5

What is the default Correlation mode for the Start Message task?

- A. Correlate
- B. Initialize
- C. Join
