### QUESTION 1

Your company performs data processing which consists of running the same data processing application against multiple data sets. This application, running in your company's private cloud, can take several days to process a single dataset and there is the need to deploy more than one instance of this workload. Which feature would help you deploy extra instances of this application when needed?

- A. Orchestrator
- B. vCloud Template
- C. vCloud Catalog
- D. vCenter Template

Correct Answer: A

Reference: [http://www.vmware.com/support/pubs/orchestrator\\_pubs.html](http://www.vmware.com/support/pubs/orchestrator_pubs.html)

---

### QUESTION 2

Your manager is concerned that, even in the cloud, provisioning hundreds or thousands of VMs will result in a lot of redundant storage use. You explain that you can minimize the use of redundant storage with vCloud by making use of which of the following features?

- A. Snapshots
- B. Fast Provisioning
- C. Templates
- D. Storage DRS

Correct Answer: B

Reference: <http://www.vmware.com/files/pdf/VMware-Architecting-vCloud-WP.pdf>

---

### QUESTION 3

The physical datacenter on which your current private cloud runs is nearing capacity. Which product would allow you to temporarily move some of the workload to a leased public cloud?

- A. vCloud Connector
- B. Distributed Resource Scheduler
- C. vFabric Suite
- D. Site Recovery Manager

Correct Answer: A

Reference: <http://www.vmware.com/products/site-recovery-manager/features.html>

---

#### QUESTION 4

Your IT director had asked about the types of infrastructure platforms that vCloud Automation Center can deliver services across. Which three platform types will you include in your response? (Choose three.)

- A. Cloud
- B. Provider
- C. Physical
- D. Organization
- E. Virtual

Correct Answer: ACE

---

#### QUESTION 5

Your company is migrating to a private cloud and currently has a combination of legacy physical servers, vCenter (e.g. non-cloud) VMs and cloud-based VMs. Rather than having to deal with three separate interfaces for deployment and lifecycle management, which product can you use during the transition period?

- A. vFabric Suite
- B. vCloud Connector
- C. vCenter Server
- D. vCloud Automation Center

Correct Answer: B

---

#### QUESTION 6

You are an automation engineer for your companies private vCloud environment. While you work on many projects, you are primarily responsible for automating workflows for the provisioning, altering configurations, and decommissioning virtual workloads. Which product is integrated with vCloud Automation Center's workflow engine that will allow you to accomplish these tasks?

- A. Powershell
- B. vCenter Orchestrator
- C. vCloud Connector
- D. VMware NSX

Correct Answer: B

---

### QUESTION 7

While giving a technical presentation on cloud concepts and components, you are asked to define the Software-Defined Enterprise. How do you respond?

- A. The Software-Defined Enterprise is an architectural approach that uses virtualization to replace all physical components in the data center whilst using local management and compliance to deliver infrastructure and Software-as-a-Service components.
- B. The Software-Defined Enterprise is an architecture framework designed to fully automate all IT services in all data centers removing the need for human interaction.
- C. The Software-Defined Enterprise is an architecture that uses intelligence, automation and common management to provide transparent governance of infrastructure and Software-as-a-Service components.
- D. The Software-Defined Enterprise is an Enterprise response to mainstream disorganization of resources in the datacenter that delivers on the promise of interconnected infrastructure and Software-as-a-service.

Correct Answer: C

---

### QUESTION 8

A colleague hears you have just completed vCloud training. She asks you to explain vCenter Operations Manager and its relationship to the vCloud Suite. What do you tell her?

- A. vCenter Operations Manager is a cloud security and firewall service which helps prevent virus and hacker attacks
- B. vCenter Operations Manager is the main web-based management interface for vCloud
- C. vCenter Operations Manager is an optional software component which helps with performance analysis in the cloud
- D. vCenter Operations Manager helps automate repetitive tasks in your private cloud

Correct Answer: C

Reference: <http://www.petri.co.il/vcenter-operations-manager-5-review.htm#>

---

### QUESTION 9

An administrator is considering a private cloud solution. The solution must allow for a 3 tiered service model for development servers, application servers and business critical servers. What component of a VMware private cloud solution can be used to meet this requirement?

- A. Organizations
- B. Service Catalogs
- C. Virtual Datacenters
- D. Allocation Models

Correct Answer: B

Reference: <http://www.vmware.com/files/pdf/services/VMware-On-Demand-Services-Whitepaper.pdf> (page 3, on-demand services)

---

#### QUESTION 10

Users from the finance group are concerned that there may be no available resources for their group when requesting a vApp or other virtual workload. What vCloud Automation Center feature can you tell the users in this group to alleviate their concerns?

- A. vApp blueprints
- B. Resource reservations
- C. Workflows
- D. Linked Clones

Correct Answer: A

---

#### QUESTION 11

Your development group wants to automate the configuration, deployment and subsequent updating of a multi-tier app they are developing. Which of the following products will allow development to do this?

- A. vFabric Hyperic
- B. vFabric Application Director
- C. vCloud Connector
- D. vCloud Director

Correct Answer: B

Reference: <http://www.vmware.com/files/pdf/vCloud-Suite-Pricing-Packaging-Whitepaper.pdf> (page 5)

---

#### QUESTION 12

You need to deploy a consistently configured workload with multiple VMs. Another group in your company has already defined just such a workload. Rather than recreate your own workload definition, which feature would allow you to deploy the workload as defined by the other group?

- A. Auto Deploy
- B. vCloud Catalog
- C. vCenter Template
- D. Org vDC

Correct Answer: B
