ACP Cloud Computing

## Pass Alibaba ACP-CLOUD1 Exam with 100% Guarantee

Free Download Real Questions & Answers **PDF** and **VCE** file from:

<https://www.passapply.com/acp-cloud1.html>

100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by Alibaba Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

Which of the following statements is most accurate about the Data Transmission Service (DTS) database migration function?

- A. Supports database schema replication between instances.
- B. Supports warning when source and destination has some unresolved conflict found.
- C. Supports all of the above functions.
- D. Supports migrating MySQL databases from external sources.

Correct Answer: A

---

**QUESTION 2**

After stopping an Alibaba Cloud Elastic Compute Service (ECS) instance, since the ECS instance is stopped, you will not be charged for anything related to that ECS instance until you start the instance again regardless of which region the instance is located in.

- A. True
- B. False

Correct Answer: A

---

**QUESTION 3**

You would like to deploy your applications on Alibaba Cloud to meet requirements including cost reduction, improving service availability, fast deployment- and redundant backup Alibaba Cloud\_\_\_\_\_products can help meet these requirements (Number of correct answers 3)

- A. Elastic Compute Service (ECS) image achieve efficient and convenient deployment.
- B. Utilizing Content Delivery Network (CDN) can meet the demands for redundant backup.
- C. Utilizing Server Load Balancer (SLB) and ECS instances can improve data reliability.
- D. Elastic Compute Service (ECS) snapshot satisfies the needs of rapid recovery of applications and data.
- E. Reasonable selection of Regions/Zones meets the location needs of application deployment as well as the demands for redundantly backup critical business applications and data.

Correct Answer: ACE

---

**QUESTION 4**

Which of the following scenarios can be done using Alibaba Cloud Express Connection? (Number of correct answers: 2)

- A. Intranet communication between VPCs and Smart Access Gateway in customers different branch offices
- B. Intranet communication between a VPC and servers in an external IDC
- C. Intranet communication between two VPCs in different accounts and different CIDR Blocks
- D. Intranet communication between two VPCs under the same account in the same region

Correct Answer: AC

---

#### QUESTION 5

Many websites have suffered DDoS attacks of different volumes. Therefore, accurate understanding of DDoS attacks is critical to website security protection. Which of the following statements about DDoS attacks is the MOST accurate?

- A. The purpose of a DDoS attack is to steal confidential information.
- B. The main purpose of a DDoS attack is to prevent the target server from providing normal services. Currently, the DDoS attack is one of the strongest and most indefensible website attacks.
- C. A DDoS attacks crack the server's logon password by means of a massive number of attempts.
- D. DDoS attacks primarily target databases.

Correct Answer: B

---

#### QUESTION 6

To meet business requirements, a user requires that the backend server of an SLB instance include a primary ECS instance and a secondary ECS instance. When the primary instance is working properly, the traffic is only forwarded to the primary ECS, when the primary instance is down, traffic is switched to the standby instance. In this case, you can create an active/standby server group on the backend of the SLB instance.

Which kind of listener supports this feature? (Number of correct answers: 2)

- A. HTTPS
- B. HTTP
- C. UDP
- D. TCP

Correct Answer: AC

---

#### QUESTION 7

The daily PV volume of a community website is as high as 20 million. The applications of the website are deployed on ECS instances while logs are stored on the data disks of a single ECS instance.

Now, the website wants to extend the log retention period to 24 months and ensure that logs can be quickly downloaded when needed. The current data disks they have can only help retain three months of logs In this case, \_\_\_\_\_ is the ideal solution for solving the log retention issue.

- A. CDN
- B. Container Service
- C. OSS
- D. ApsaraDB for RDS

Correct Answer: A

---

### QUESTION 8

A Virtual Private Cloud (VPC) is an isolated network environment that is completely isolated from each other The following statements about VPC are correct\_\_\_\_\_. (Number of correct answers: 2)

- A. Each VPC has an independent tunnel ID, and a tunnel ID corresponds to a virtualized network.
- B. Subnets can be divided like the traditional network environment. Different cloud servers within each subnet are connected by the same router and different subnets are interconnected by switches.
- C. ECS instances in a VPC use security group firewalls for Layer 2 network access control.
- D. The internal networks of different VPCs are completely isolated and can be interconnected through IP addresses mapped to the outside.

Correct Answer: BD

---

### QUESTION 9

Which of the following privilege is required to manually install Alibaba Clod Security Center on the server?

- A. Database Access privilege
- B. Common user privilege
- C. System administrator privilege
- D. FTP service privilege

Correct Answer: B

---

### QUESTION 10

When creating an ECS instance in your Alibaba Cloud VPC, you must specify a VSwitch for that instance at the same time. Otherwise, you will not be able to create this ECS instance.

- A. True
- B. False

Correct Answer: A

---

#### QUESTION 11

The backend server pool of an Alibaba Cloud SLB contains multiple ECS instances, which may have different service capacities. To exploit the different service capacities of backend ECS instances, which of the following statements is correct?

- A. Choose Weighted Round Robin mode to set higher weights to ECS instances with higher capacities The higher the weight of the backend ECS instance the higher chance that the instance will receive requests.
- B. SLB cannot assign more requests to certain ECS instances.
- C. Choose Round-Robin model and ECS instances with higher capacities will surely be assigned with more requests.
- D. Choose Weighted Least-Connection mode, and ECS instances with higher capacities will surely be assigned with more requests.

Correct Answer: A

---

#### QUESTION 12

A popular worldwide forum stores static resources in OSS and accelerates access using CON Users find that the speed of downloading files from the forum has been greatly improved, but uploading files is slow due to the long data transmission distance, resulting in a bad access experience In order to improve the speed of uploading files for users in this forum, so that users in different regions can have a good access experience, we recommend that the forum can\_\_\_\_\_.

- A. Activate the PCDN service
- B. Activate OSS in different regions as file storage, and synchronize data between OSS in different regions through cross-region replication
- C. Enable the transmission acceleration service for O: Enable OSS
- D. Enable OSS static website hosting

Correct Answer: B

---

#### QUESTION 13

Which of the following ports does RDS for MySQL listen on by default?

- A. Port 8080

- B. Port 3306
- C. Port 3060
- D. Port 3600

Correct Answer: B

---

#### QUESTION 14

You are designing a solution for a startup company, the proposed solution is like this You suggest they use ECS instances to process requests from mobile App clients, and use SLB to distribute data traffic and ensure the load across each backend ECS instance is balanced.

Moreover to deal with volatile fluctuations in business volume (page views are much higher on the weekends), you also suggest they use Auto Scaling to dynamically increase or reduce computing resources.

The company is satisfied with the solution you proposed. However, they have one concern that when removing an idle instance from the scaling group: if Auto Scaling shuts the instance down directly, the service running on that instance will be abruptly terminated, resulting in poor user experience.

In order to eliminate your customer's concern, which of the following solutions should you recommend them?

- A. Find the ECS instance that is going to be removed from the backend server pool of the SLB instancer and automatically set the weight of this ECS instance to 0. This instance will not be assigned with new requests, and will be automatically removed from the backend server pool after existing tasks are completed.
- B. First, insert a script into the image for creating the ECS instance Second, make the script run automatically when the operating system in this ECS instances is about to shut down. This script contains the processing logic that can ensure the instance finish all the remaining tasks before shutting down.
- C. Find the ECS instance that is going to be removed from the backend server pool of the SLB instance, and manually remove this instance from the backend server pool Applications running on this ECS instance will normally return results, but this instance will not be assigned with new requests.
- D. Use the Lifecycle Hook function embedded m Auto Scaling Define a suitable timeout and a web hook to do the necessary work before the instance is removed.

Correct Answer: D

---

#### QUESTION 15

Many cloud computing service providers support users to activate/create a cloud service through Open API. Which of the following protocols is most not likely to be supported by these Open API?

- A. HTTP
- B. Restful
- C. Web Service
- D. PPPoE

Correct Answer: D
