- A. Contact an AWS Account Manager to sign a new contract
- B. Move an Availability Zone to the new Region
- C. Begin deploying resources in the second Region
- D. Download the AWS Management Console for the new Region

Correct Answer: C

QUESTION 6

A company is planning to host a large ecommerce application in the AWS Cloud. The company must create an architecture that provides protection against network-based security issues, such as DDoS attacks.

Which AWS services should the company use to meet this requirement? (Choose two.)

- A. Amazon Inspector
- B. Amazon GuardDuty
- C. Amazon CloudFront
- D. AWS Shield
- E. AWS Identity and Access Management (IAM)

Correct Answer: CD

QUESTION 7

A company with AWS Enterprise Support needs help understanding its monthly AWS bill and wants to implement billing best practices.

Which AWS tool or resource is available to accomplish these goals?

- A. Resource lagging
- B. AWS Concierge Support team
- C. AWS Abuse team
- D. AWS Support

Correct Answer: B

QUESTION 8

A company has a complex AWS architecture. The company needs assistance from a dedicated technical professional who can suggest strategies regarding incidents, trade-offs, support, and risk management. Which AWS Support plan will provide the required support?

- A. AWS Business Support
- B. AWS Enterprise Support
- C. AWS Developer Support
- D. AWS Basic Support

Correct Answer: B

The AWS Support plan that will provide the required support is:

B. AWS Enterprise Support AWS Enterprise Support provides a dedicated technical account manager (TAM) to help customers achieve their desired outcomes by providing proactive and personalized guidance and support. The TAM is an experienced technical professional who works with customers to understand their business and technical goals, and to provide guidance on AWS services and best practices. The TAM helps customers to optimize their AWS infrastructure, troubleshoot issues, and manage incidents. The TAM also provides support for trade-offs, risk management, and other business decisions related to the customer's use of AWS. With AWS Enterprise Support, customers have access to 24/7 technical support, as well as a range of AWS Trusted Advisor checks and guidance. Customers can also take advantage of AWS Infrastructure Event Management (IEM) to receive proactive notifications about potential issues with their AWS resources.

QUESTION 9

A company's application running on Amazon EC2 is designed to use an Auto Scaling group to dynamically add or remove instances as demand increases or decreases. This is an example of which AWS Cloud architectural principle?

- A. Loose coupling
- B. Elasticity
- C. Design for failure
- D. Parallelism

Correct Answer: B

QUESTION 10

A developer is writing a new application that consists of multiple AWS microservices. During quality assurance testing, the developer notices runtime errors in several areas of the application.

Which AWS service should the developer use to help troubleshoot the errors?

- A. AWS CloudTrail
- B. AWS X-Ray
- C. Amazon CloudWatch
- D. Amazon Cognito

Correct Answer: B

QUESTION 11

A company has deployed its IT infrastructure in the AWS Cloud. The company's database must support reads with sub-millisecond latency. Which AWS service will meet this requirement?

- A. Amazon EMR
- B. Amazon RDS
- C. AWS Glue
- D. Amazon ElastiCache

Correct Answer: D
