QUESTION 1

DRAG DROP

You provision virtual machines (VMs) as development environments.

One VM does not start. The VM is stuck in a Windows update process. You attach the OS disk for the affected VM to a recovery VM.

You need to correct the issue.

In which order should you perform the actions? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Run the following command at an elevated command prompt:

```
dism /image:\ /get-packages > c:\temp\Patch.txt
```

Run the following command at an elevated command prompt:

```
dism /Image:<Attached OS disks>\ /Remove  
Package /PackageName:<package name to delete>
```

Detach the OS disk and recreate the VM

Open C:\temp\Patch.txt file and locate the update that is in a pending state

Answer Area

Correct Answer:

Actions	Answer Area
	Run the following command at an elevated command prompt: <code>dism /image:\ /get=packages > c:\temp\Patch.txt</code>
	Open C:\temp\Patch.txt file and locate the update that is in a pending state
	Run the following command at an elevated command prompt: <code>dism /Image:<Attached OS disks>:\ /Remove Package /PackageName:<package name to delete></code>
	Detach the OS disk and recreate the VM

Remove the update that causes the problem

1.

Take a snapshot of the OS disk of the affected VM as a backup.

2.

Attach the OS disk to a recovery VM.

3.

Once the OS disk is attached on the recovery VM, run diskmgmt.msc to open Disk Management, and ensure the attached disk is ONLINE.

4.

(Step 1) Open an elevated command prompt instance (Run as administrator). Run the following command to get the list of the update packages that are on the attached OS disk: `dism /image::\ /get-packages > c:\temp\Patch_level`

5.

(Step 2) Open the C:\temp\Patch_level.txt file, and then read it from the bottom up. Locate the update that's in Install Pending or Uninstall Pending state.

6.

Remove the update that caused the problem: `dism /Image::\ /Remove-Package /PackageName:`
