-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

QUESTION 1

Which IBM Cloud Computing Reference Architecture adoption pattern is most suitable for a company that has not implemented any cloud technology and wants to slowly start migrating their existing IT environment into a private cloud?

- A. Platform as a Service
- B. Software as a Service
- C. Cloud Service Provider
- D. Cloud Enabled Data Center

Correct Answer: A

QUESTION 2

Which statement describes cloud bursting in the design of the architecture?

- A. It can happen only in an off premise solution.
- B. The scenario when a cloud infrastructure breaks down due to heavy request load.
- C. Allocation of additional capacity during peak loads in an on premise hybrid solution.
- D. Provisioning of non-critical environments like development and test in an off premise hybrid solution.

Correct Answer: D

QUESTION 3

Which set of IBM components and subcomponents (as part of use cases in the IBM Cloud Computing Reference Architecture Cloud Enabled Data Center (CeDC) adoption pattern) can be integrated in order to provision network and virtual systems to the CeDC?

- A. IBM SoftLayer IMS
- B. IBM Cloud Orchestrator, IBM Tivoli Netcool Configuration Manager
- C. IBM SmartCloud Provisioning, IBM SmartCloud Control Desk, IBM Endpoint Manager
- D. IBM Endpoint Manager, IBM Tivoli Storage Manager, and IBM SmartCloud Control Desk

Correct Answer: B

QUESTION 4

Which statement is true regarding a private cloud?

- A. It is dedicated to a single customer.
- B. It is composed of a combination of cloud providers.
- C. It employs cloud bursting for scaling across clouds.
- D. Communication is affected over a non-trusted network.

Correct Answer: C

QUESTION 5

In an ITIL managed cloud environment, which two service transition processes are involved when the memory of a virtual machine is increased?

- A. Event Management
- B. Change Management
- C. Release Management
- D. Capacity Management
- E. Configuration Management

Correct Answer: AE

QUESTION 6

What must a hardware platform typically support for a cloud infrastructure?

- A. Virtualization
- B. VMware ESX
- C. Disk Mirroring
- D. High Availability

Correct Answer: C

QUESTION 7

Which cloud attribute describes the ability to quickly adapt to high volatility in the amount of requests?

- A. Elasticity
- B. High Availability
- C. Service Delivery

D. Service Level Agreement Compliance

Correct Answer: D

QUESTION 8

How does elastic scalability benefit users of cloud computing applications?

- A. It is a tool for improving capacity planning and optimizing upfront investments
- B. The cost of resources is incurred only when they are used and for as long as (or how much) they are used.
- C. It reduces the cost of applications in the cloud because it relies only on a virtualized infrastructure which is cheaper than a physical infrastructure.
- D. It allows for the incremental development of new application features in the cloud, which makes the applications more affordable to manage and operate.

Correct Answer: C

QUESTION 9

A company wants to use cloud services in the future. What needs to be done first?

- A. Use cloud migration services to move their production workload into a managed cloud.
- B. Ask the IT department to work out a plan to reduce capital expenses using cloud services.
- C. Analyze existing business processes and determine which of them can be realized using cloud services.
- D. Ask the IT department to order multiple virtual machines from different cloud service providers and test them for performance.

Correct Answer: C

QUESTION 10

Which statement is true about Bluetooth and WiFi in a cloud computing environment?

- A. They always use two-factor authentication.
- B. Their utilization is not compliant with main safe requisites.
- C. They require automatic locking if the device is idle for a certain period of time
- D. Devices can be easily exploited to infect a mobile device with malware or compromise transmitted data.

Correct Answer: C

QUESTION 11

The integration process in the IBMCloud Computing Reference Architecture relies heavily on which option?

- A. CloudStack
- B. Virtualization
- C. Cloud Foundry
- D. silos of computing

Correct Answer: B

QUESTION 12

According to the Cloud Services Adoption Pattern, what is considered to be the set of services that make up the entry level for a Platform as a Service implementation?

- A. Management of Service Level Agreements, quality of service management, and security.
- B. Management of programming services and integration services with other clouds and applications.
- C. Management of development operations, continuous delivery, and application performance monitoring.
- D. Management of services through service catalog, automated service deployment and metering, resource

Correct Answer: D
