QUESTION 1

A system administrator has successfully configured Content Federation Services for IBM FileNet Image Services and needs to start federating documents from Image Services to the IBM FileNet P8 Content Engine.

What is the name of the tool that is used to start federating the documents in the above scenario?

- A. Remote Admin Console
- B. Remote Xapex Interface
- C. Remote Admin Task Manager
- D. Remote Configuration Manager

Correct Answer: B

QUESTION 2

An IBM Content Platform Engine V5.2.1 (CPE) administrator receives a call from a user that the system is running slow during certain times of the day.

What logging or configuration change in CPE, on a WebSphere Application Server (WAS), will help gather information for this issue?

- A. In FileNet Enterprise Manager under the Domain Properties>Trace Control tab check the Enabled Trace Logging box.
- B. For CPE installed on a WAS, modify the fnlog4j.properties.sample and place it in WebSphere\AppServer\java\jre\lib.
- C. In Administration Console for Content Platform Engine under the Domain Properties>Trace Subsystem check the Enabled Trace Logging box.
- D. For CPE installed on WebSphere, edit the perflog_config.properties file under WebSphere\AppServer\profiles\profile_name\FileNet\server_instance_name.

Correct Answer: B

QUESTION 3

A software vendor is implementing the IBM Content Management Interoperability Services (CMIS) for IBM FileNet Content Manager.

The administrator will set which two of the following for this configuration?

- A. IBM CMIS supports only Federated Repositories.
- B. IBM CMIS and FileNet Content Engine can have the same LDAP server.
- C. The IBM FileNet P8 and IBM CMIS Platform uses LDAP-based security and also supports Java 2 security.

D. Use the IBM WebSphere Application Server administrative console for the Content Engine server to ensure that the following settings match on both (CMIS and P8 Content Engine) application servers. 1) User filter 2) Group Filter 3) User ID map 4) Group member ID map 5) Certificate map mode 6) Certificate filter

E. Use the IBM WebSphere Application Server administrative console for the Content Engine server to ensure that only the following settings match on both CMIS and FileNet Content Engine application servers.

- 1) Primary administrative user name.
- 2) Automatically generated server identity.

Correct Answer: D

QUESTION 4

A company is planning to deploy IBM Content Navigator (ICN) to be used with an IBM FileNet Content Manager (FCM) V5.2.1 repository.

To configure ICN with the correct FCM client connector files, what steps should be followed? (Select two)

- A. No additional steps are needed to connect to a FCM repository.
- B. Run the FileNet Deployment manager to update the ICN client connector files.
- C. In the ICN Configuration Manager run the Update the IBM FileNet P8 Client Connector Files task.
- D. Copy the JACE.jar file from the FCM Server to the ICN servers and place in the ECMClient plugins folder.
- E. The CPEClient installer matching the FCM server version should be run on the ICN server to update the P8 Client Connector Files.

Correct Answer: AC

QUESTION 5

The P8 administrator of a company has been asked to determine how they can configure their file storage area to increase throughput.

Which of the following options would allow them to achieve this requirement?

- A. Assign multiple file storage areas to a document class.
- B. Create a storage policy with multiple database storage areas.
- C. Create a storage policy with multiple online storage areas and each on a separate disk spindle or SAN LUN.
- D. Create a storage policy with multiple storage areas setting all but one storage area online and the rest on standby.

Correct Answer: A

QUESTION 6

To meet the criterion "Minimum required permissions", which three operating system users need to be added to the operating system group "cpe_appserver_install_group"? (Select three.)

- A. cpe_db_user
- B. ae_install_user
- C. cpe_install_user
- D. config_mgr_user
- E. wpxt_install_user
- F. cpe_app_server_install_user

Correct Answer: ACD

QUESTION 7

A customer is setting up a new IBM FileNet Content Platform Engine and would like to know the easiest type of storage areas to create.

Which of the following meets this criteria?

- A. Fixed storage areas.
- B. Advanced storage areas.
- C. Database and file storage areas.
- D. Database and Fixed storage areas.

Correct Answer: A

QUESTION 8

The administrators for a large manufacturing organization are planning the installation of IBM's FileNet Content Manager V5.2.1 in an environment where Microsoft SQL will be the hosting database platform. Along with the Content Manager system, there is a legacy IBM FileNet Image Services V4.2 system that they would like to serve as a repository via content Federated Services-Image Services (CFS-IS). They are currently in the planning and MSSQL installation phase.

What database collation settings must they choose?

- A. Binary-code point sort order. Case sensitive, for use with 1252 Character Set.
- B. Dictionary order, case sensitive, for use with 1252 Character Set (or any case-sensitive SQL Server collation).
- C. Dictionary order, case-intensive, for use with 1252 Character Set (or any case-intensive SQL Server collation)
- D. Dictionary order, case-intensive, accent-intensive, kana-intensive, width-sensitive (or any case-intensive SQL Server collation).

Correct Answer: C

QUESTION 9

A company has completed installing and setting up a single-server IBM FileNet P8 Content Platform system using the Composite Platform Installation Tool (CPIT).

Which application should be used to log on to verify if a user can successfully browse, search, add a document and view the Tasks page?

- A. Process Task Manager
- B. IBM FileNet Workplace XT
- C. FileNet Enterprise Manager
- D. Administration Console for Content Engine

Correct Answer: B

QUESTION 10

A company performed an upgrade of multiple components and are not sure if they updated the Content Platform Engine (CPE) Client files on the Workplace XT (WPXT) server.

How can it be determined if the CPE Client files on WPXT match the CPE Version?

- A. View the CE Ping page which shows the CE version and the WPXT CPE Client file version.
- B. Open WPXT and go to help about and obtain the dap number and match it to the dap number on the CE Ping page.
- C. Open the jace.jar files on WPXT and verify the dap number in the manifest.mf file matches the dap number on the CE Ping page.
- D.

Correct Answer: A

QUESTION 11

A consultant for a large grocery store chain needs to ensure that the IBM Case Foundation system to be installed has the ability to handle the variations in application loads as the daily activity changes across file zones. To accomplish this, a highly available and load balanced system using geographically dispersed clusters has been specified.

Which one of the following J2EE servers is supported in this configuration?

- A. RedHat WildFly
- B. Apache Geronimo
- C. Oracle GlassFish Server

D. IBM WebSphere Application Server Network Deployment

Correct Answer: D

QUESTION 12

A customer would like to improve overall response time and CPU utilization in their IBM FileNet P8 V5.2.1 system by changing their garbage collection policy.

What is the suggested garbage collection policy for any FileNet P8 JVM to accomplish this improvement?

- A. Balanced (balanced)
- B. Optimum throughput (optthruput)
- C. Generational Concurrent (gencon)
- D. Optimum Average Pause (optavgpause)

Correct Answer: C

QUESTION 13

Which of the following is completely accurate about the permissions the cpe_install_user must have?

- A. Read permission on the /tmp directory.
- B. Membership in the appserver_admin_group.
- C. Read permission to the directories: file storage areas, index areas, and content caches.
- D. Read, Write and Execute permissions to the device or location where: Content Platform Engine is to be installed. The application server instance/domain/profile has been installed.

Correct Answer: C

QUESTION 14

A P8 administrator will be installing the IBM FileNet P8 Content Engine software onto multiple servers and would like to install it silently.

Which file and parameters will need to be updated?

- A. cpe_silent_install.txt.file, LICENSE_ACCEPTED, USER_INSTALL_DIR
- B. ce_silent_install.txt.file, CHOSEN_INSTALL_FEATURE_LIST, CCL_URL
- C. ce_silent_install.txt.file, JAVA_HOME, LICENSE_ACCEPTED, LAUNCH_CM
- D. cpe_silent_install.txt.file, USER_INSTALL_DIR, LAUNCH_CM, CCLWCM_URL

Correct Answer: B

QUESTION 15

An insurance company has offices worldwide and makes use of the content cache areas for frequently accessed document content. Recently, the encryption key for encrypted storage area at this insurance company was compromised and a new key needs to be created.

Which of the following is true for the original content in the content cache areas?

- A. If the original content is not encrypted, the cache copy of that content will now be encrypted.
- B. If the original content is encrypted, the cache copy of the existing content will now be re- encrypted.
- C. If the original content is not encrypted, then the cache copy of that content will be removed and re-encrypted.
- D. If the original content is encrypted, then it will be re-encrypted with the new encryption key. The cache copy of that content will also be re-encrypted with the new encryption key.

Correct Answer: C
