Following Questions and Answers are all new published by IBM Official Exam Center

QUESTION 1

Which two actions must be done to introduce a new LTO5 tape drive into an existing SCSI library with LTO2?

A. define the library

B. define a devclass

C. define the LTO2 drives

D. define the LTO5 drives

E. define a storage pool utilizing a devclass for LTO2

Correct Answer: BD

QUESTION 2

What is the benefit of reorganizing the Tivoli Storage Manager (TSM) server database?

A. Access is optimized on the TSM server database.

B. There will be less activity on TSM server database.

C. TSM database and logs are reloaded in optimal order.

D. Better ACTIVE and ARCHIVE log usage on the TSM server.

Correct Answer: A

QUESTION 3

During a long period of time the backup data for a specific node is spread over many volumes. For a faster restore, how can the data be consolidated if active and inactive versions are needed for the restore?

A. Create a new copy pool for this specific node and restore from the copy pool.

B. Create an active data pool and copy the active versions from the primary pool hierarchy.

C. Move the data for this node with move nodedata from all sequential storage pools to a random disk storage pool.

D. Move the data for this node with move nodedata from the last sequential storage pool to a new sequential storage pool.
Correct Answer: C

QUESTION 4

In the Primary Storage Pool definition, autocopy=migrate is defined in FILEPOOL2 and TAPEPOOL. What are two

consequences if the target (next) storage pool in a hierarchy (FILEPOOL2) cannot contain the data being migrated, and it is necessary to overflow to its next storage pool (TAPEPOOL)?

A. Simultaneous write is disabled.

B. TAPEPOOL inherits the copy pool list for FILEPOOL2.

C. The server uses the inheritance model to create the copies.

D. COPYPOOL2 is used because it is defined to TAPEPOOL.

E. COPYPOOLI1 and COPYPOOL2 is used because the definitions of FILEPOOL2 and TAPEPOOL are inherited.

Correct Answer: D

QUESTION 5

What is the purpose of the dsmserv.opt ACTIVELOGSIZE option?

A. It defines the size of the active log.

B. It adds additional space to the active log.

C. It updates the amount of storage space for active versions with a reboot.

D. It updates the space allowed for the activity log in the Tivoli Storage Manager server without downtime.

Correct Answer: A

QUESTION 6

What is the function of reconciliation in IBM Tivoli Storage Manager (TSM)?

A. It removes obsolete data from the TSM database.

B. It logs orphan stubs and deletes obsolete copies of files.

C. It removes orphan stub files from the TSM server database.

D. It repopulates orphan stubs and deletes obsolete copies of the files.

Correct Answer: B

QUESTION 7

When would enhanced scheduling be used?

A. To schedule a backup on specific days of the month.

B. When a schedule has to be spread over multiple servers.

C. To load balance nodes across different schedules automatically.

D. When multiple nodes need to be assigned to a specific schedule.

Correct Answer: A

QUESTION 8

Which backup method is optimized for use when the backup exceeds the backup window, the files being backed up have relatively little daily change and not having to scan the file system looking for changed files would benefit the backup window?

A. Selective backup

B. Journal-based backup

C. Full incremental backup

D. Partial incremental backup

Correct Answer: B

QUESTION 9

What is the purpose of a second tier of a storage pool hierarchy?

A. It splits the volume content into two tiers.

B. It uses cheaper, high capacity data storage.

C. It stores data that requires faster access than tier 1.

D. It specifies the backup storage pool of a primary storage pool.

Correct Answer: D

QUESTION 10

What does reusedelay do for a copy storage pool?

A. It specifies the minutes that have to elapse before new data can be written to a volume.

B. It specifies the number of days that must elapse before a filling volume can used again.

C. It specifies how long to wait for volumes that are marked as scratch to return from the offsite pool to onsite.

D. It specifies the number of days that must elapse after all files are deleted from a volume before the volume can be overwritten or returned to scratch.

Correct Answer: B

QUESTION 11

What are three ways to check for client backup failures?

A. db2diag.log

B. clsmerror.log

C. dsmsched.log

D. OS security log

E. TCP/IP communication log

F. Tivoli Storage Manager server activity log

Correct Answer: ABF

QUESTION 12

What does this command do: dsmc archive "/home/tsm/prod/" -v2archive?

A. It archives files in the /home/tsm/prod directory and the tsm or prod directories.

B. It archives only files in the /home/tsm/prod directory but not the tsm or prod directories.

C. It archives all the files in /home/tsm/prod/ including the subdirectories using the management class v2archive.

D. It archives only the files in /home/tsm/prod/ including the subdirectories using the management class

v2archive.

Correct Answer: B

QUESTION 13

If an export admin command is run, which import statement needs to be used?

A. Import node

B. Import client

C. Import server

D. Import policy

Correct Answer: B

QUESTION 14

A customer is upgrading their environment from IBM Tivoli Storage Manager (TSM) V5.5 to TSM V7.1. Which three new skills are required for the existing storage administrator with system privileges?

A. defining DB2 volumes

B. defining database space

C. defining active data pools

D. managing recovery log volumes

E. managing a database reorganization

F. managing multiple stream database backups

Correct Answer: ADF

QUESTION 15

Migration is using only one tape but more tape drives are available. Which stgpool option should be reviewed?

A. drives

B. numdrives

C. migprocess

D. mountpoints

Correct Answer: C
