### QUESTION 1

SAP enabled key user extensibility for a SAP Fiori application. The application accesses a database table that you extended with an append structure in the customer namespace. You want to use key user extensibility to create input fields on the SAP Fiori UI that correspond to the custom database fields.

Which of the following steps are mandatory?

There are 3 correct answers to this question.

- A. Append the custom database fields to the extension include structure provided by SAP.
- B. Activate the custom database fields using the transaction Extensibility Registry (SCFD\_REGISTRY).
- C. Redefine the OData service used by the SAP Fiori app in transaction SAP Gateway Service Builder (SEGW) to add the custom database fields.
- D. Enable the usage of the custom database fields in the Custom Fields and Logic app.
- E. Enable the custom database fields for usage in SAP Fiori apps using the transaction Enable Fields for Use in the Custom Fields and Logic (SCFD\_EUI) app.

Correct Answer: ADE

---

### QUESTION 2

Where does the SAP system organize the SAP Gateway services? Please choose the correct answer.

- A. Internet Transaction Server (ITS)
