Correct Answer: AC

---

### QUESTION 3

Which statements are correct?

There are 2 correct answers to this question.

- A. Real Application Clusters also supports all Oracle backup and archiving features that are available in single instance Oracle databases.
- B. SAP only supports RAC on systems with a cluster filesystem.
- C. Migration to Oracle Real Application Clusters is relatively easy where unloading and loading of data is necessary.
- D. While with a standard cluster solution you effectively use just one active database instance, RAC makes it possible to use several instances simultaneously.

Correct Answer: AD

---

#### QUESTION 4

What does SAP recommend when importing transport requests? (There are 3 correct answers to this question)

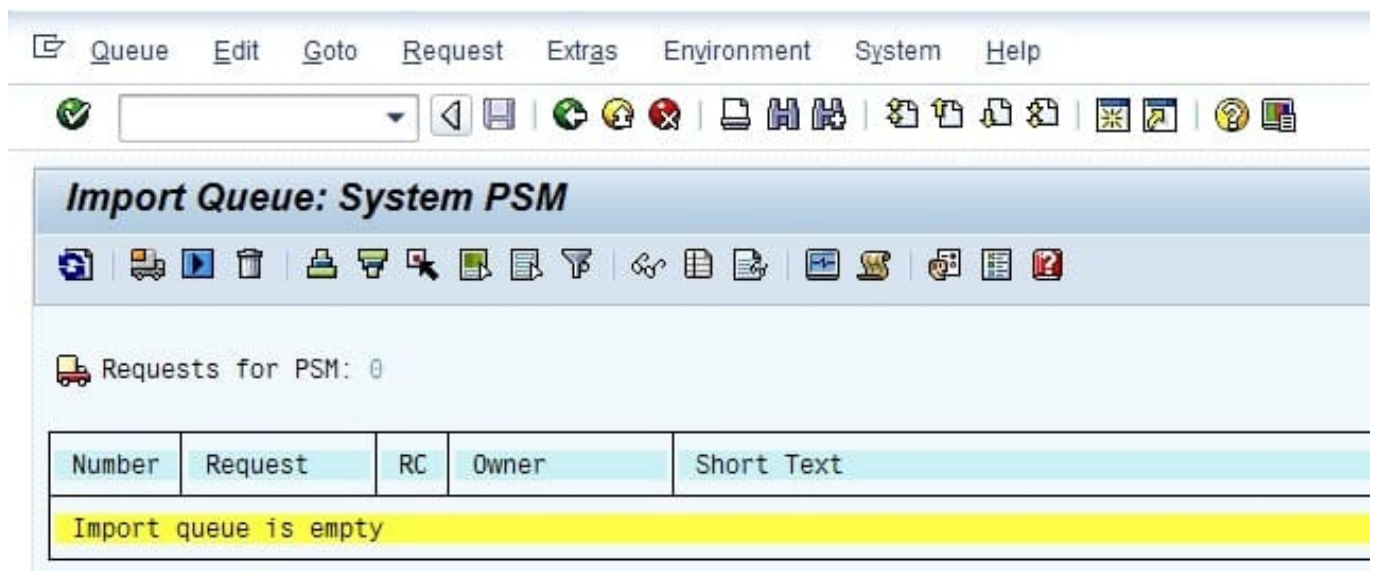

- A. Transport requests should only be imported if the software component vector of the transport requests fit to the software components and their Support Package level of the target system.
- B. Transport requests should be imported into the productive system one by one in the order of their sequence in the import queue
- C. Transport requests should always be imported into the productive system in the sequence of their export from the development system
- D. In general importing transport requests into the productive systems requires a maintenance window (downtime window).
- E. Transport requests should be imported project wise into the productive system

Correct Answer: ADE

#### QUESTION 5

You execute transaction Transport Management System (STMS) and switch to the import queue of an SAP system of the transport domain. Here you find that the Import All Requests button is missing but the Import Request button is available.

What is the most likely reason for this behavior?

- A. The transport strategy for the PSM system is set to Single Transports.
- B. There is no consolidation route pointing to the PSM system.
- C. PSM is a virtual system.

D. There is no transport request waiting to be imported into this system.

Correct Answer: A

---
