Following Questions and Answers are all new published by EXIN Official Exam Center

QUESTION 1

Which communication protocol group is generally accepted on the Internet?

A. NetBIOS

B. OSI

C. SNA

D. TCP/IP

Correct Answer: D

QUESTION 2

Failover is the capacity to switch, often automatically, to another system or resource in the event of a failure. How does failover assist in the provision of cloud services?

A. It assists providers in ensuring continuity of service when there is a problem.

B. It automatically restarts the system in case of a failure.

C. It builds a back-up while the system is active.

D. It provides hidden storage to be used when needed.

Correct Answer: A

QUESTION 3

In identity management, how might location information be used?

A. to determine the user\\'s native language

B. to determine whether the user is connected via a mobile platform

C. to provide advertisements for local restaurants, determined by GPS

D. to provide the correct version of the application for the user\\'s operating system

Correct Answer: C

QUESTION 4

What is the generally accepted communication protocol on the Internet?

A. Net BIOS

B. OSI

C. SNA

D. TCP/IP

Correct Answer: D

QUESTION 5

What is an important environment related benefit of Cloud?

A. fewer requirements for power capabilities

B. highly protected data

C. independency from the Internet

D. small bandwidth

Correct Answer: A

QUESTION 6

Which process is an external process for a Cloud data center?

A. Availability management

B. Capacity management

C. Service continuity management

D. Service level management

Correct Answer: D

QUESTION 7

What is the benefit of replication of data center sites?

A. data protection

B. disaster recovery

C. extended data storage

D. increased response rate

Correct Answer: B

QUESTION 8

What describes a serious drawback in the early development of networks?

A. Computers were dedicated to one function.

B. Computers were too complicated to be connected.

C. There was low network speed.

D. Vendors developed their own network communication protocols.

Correct Answer: D

QUESTION 9

Why is privacy an area of concern in Cloud computing?

A. Data cannot be securely stored in a Cloud solution.

B. Data always resides in another country, with different privacy laws.

C. People using Cloud solutions are afraid that their data is not secure in the Cloud.

D. Privacy laws vary from country to country.

Correct Answer: D

QUESTION 10

Which Service Model provides the best environment for testing new software?

A. Infrastructure as a Service (IaaS)

B. Platform as a Service (PaaS)

C. Software as a Service (SaaS)

D. There is no difference

Correct Answer: B

QUESTION 11

What is meant by Virtualization?

A. Virtualization means that data does not exist anywhere.

B. Virtualization is a method to combine more computing power onto one server.

C. Virtualization is a method to combine multiple computer environments onto one server.

D. Virtualization means that no real computer system is needed to distribute cloud solutions.

Correct Answer: C

QUESTION 12

What is the major benefit for software developers with regard to Cloud platforms?

A. Connectivity with other platforms makes it easier for users to connect to the Cloud.

B. Software developers can design, build and test their solutions faster.

C. Software developers do not benefit from Cloud platforms.

D. Solutions may be marketed on any platform.

Correct Answer: B

QUESTION 13

What is the intended result of a Distributed Denial of Service (DDOS) attack on a web site?

A. To change the content of the site to prevent it from providing further services

B. To distribute the content of the site to users who are denied access to its service

C. To infect the site to distribute a virus to users, which denies them access to further services

D. To lock users out of the site by exhausting the sites resources

Correct Answer: D

QUESTION 14

What is the most important feature of a virtualized environment?

A. Multiple applications can be used by a single user.

B. Multiple computers can be connected to a single network.

C. Multiple operating systems can be used on a single hardware platform

D. Multiple users can be active on a single network.

Correct Answer: C

QUESTION 15

How can backups be generated without interrupting ongoing processes?

A. by using Network Attached Storage (NAS)

B. by using replicated data

C. by using storage in the cloud

D. by using storage virtualization

Correct Answer: B
