QUESTION 1

You carry out modelling of requirements with a use case diagram. Which answer best describes its prospective modelling elements? (1 Point)

- A. Objects, activities and associations
- B. Actors, messages and activities
- C. Objects, use cases and activities
- D. Actors, use cases and associations

Correct Answer: D

QUESTION 2

In delimiting system and system context, a differentiation is made between the system boundary and the context boundary. This differentiation is important in order to understand which aspects impact on the requirements of the system to be developed and which do not. Choose the two correct statements. (2 Points)

- A. The context boundary separates the system from the system context.
- B. The system boundary and the context boundary define the system context.
- C. The system context includes all aspects that are not relevant to the requirements of the planned system.
- D. Only the aspects within the system boundary must be taken into account in order to determine the requirements of the system to be developed.
- E. The selection of the system boundary establishes which aspects are covered by the system to be developed and which lie beyond its scope.

Correct Answer: BE

QUESTION 3

Which of the following elements are elements of a state diagram and which are not? Please indicate true or false. (1 Point)

| True | False | |
|------|-------|------------------|
| A | B | Event |
| C | D | Initial state |
| E | F | State Transition |
| G | H | Interaction |
| H | I | Actor |

A, A, C, E, H, I

Correct Answer: A

QUESTION 4

You would like to design a requirements document in such a way that it is particularly well suited to the project participants who are to continue working with it. Please select from the following statements the two most appropriate assignments of requirement properties to participants. (1 Point)

- A. For the tester the requirements must be practicable.
- B. For the developers the requirements must be easily changeable.
- C. For all participants the requirements must be consistent.
- D. For the project manager the requirements must be evaluated.
- E. For maintenance the requirements must be testable.

Correct Answer: CD

QUESTION 5

In order to document a door system for a underground railway system, the following activity diagram has been modelled. You reconcile this diagram with your notes. Which two of the following notes were not represented in the diagram? (1 Point)

Your notes:

- A. Double pressing of the door button countermands the currently running action.
- B. The tread is pulled in once the door is closed.
- C. The light-emitting diode is deactivated at the end of the process.
- D. If the door is open, it is subsequently closed.
- E. If the door is closed, it is subsequently opened.

Correct Answer: AC

QUESTION 6

As a requirements engineer, you deal with a diverse range of requirements. A template for natural language functional requirements can help you to formulate different forms of system activities in a more precise way. Which two kinds of system activities are among those supported? (1 Point)

- A. User interaction
- B. Technical requirement

- C. Quality requirements
- D. Independent system activity
- E. System requirement

Correct Answer: AD

QUESTION 7

Which sentence best characterises the term "stakeholder"? (1 Point)

- A. The external actors interacting with a system and the technical interfaces to surrounding systems are designated as stakeholders.
- B. Stakeholders are persons and organisations affected by the development and the use of the system or of the product.
- C. Stakeholders are special interest representatives who are responsible for the approval of the first project phase.
- D. A stakeholder is responsible for the administration of the software development environment.

Correct Answer: B

QUESTION 8

You are to create a requirements specification for an internet banking software. The system shall perform bank credit transfers and therefore receives from the user, among other information, the bank identification code and the name of the bank. Now things have changed so that only the bank identification code must be entered by the user and the bank name is no longer required. On which part of your documentation do you most likely have to work in order to incorporate this change? (2 Points)

- A. Nowhere, since this is a detail for the architecture.
- B. In the chapter in which the states of the system are described.
- C. As a change in the goals has been communicated, the goals in the specification must be updated.
- D. If it is about inputs and outputs of the system, this change has to be worked into the context diagram.
- E. You have to adjust the class model and/or the data model, which describe the structure of the system's input and output data.

Correct Answer: CD

QUESTION 9

As part of the "UniKasso" project, the "CRETIL" company is standardising the payment methods for all customers. The requirements specification has been created and the first release is currently being implemented. This week, the management has decided to include the implementation of the "credit card" mode of payment in the first release and to shift the "direct debit" mode of payment to the second release. The test manager receives the order to adjust the test

planning accordingly. Which particular characteristic of the requirements will facilitate the work of the test manager significantly in this respect? (1 Point)

- A. Coherence
- B. Testability
- C. Flexibility
- D. Stability
- E. Traceability

Correct Answer: E

QUESTION 10

You are project manager for a system that your company is creating for the military in the field of logistics. A requirements engineer has been assigned to your project but does not have all the desirable skills for this role. In respect to the attributes of the requirements engineer, which of the following statements implies the greatest risk for the requirements engineering? (1 Point)

- A. The requirements engineer is not familiar with the military ranks and so cannot deal adequately with the hierarchical sensitivities.
- B. The requirements engineer does not have detailed knowledge of the military norms and standards that should be applied to the system.
- C. The requirements engineer has no solid project management training.
- D. The requirements engineer is introverted and has no knowledge of requirements elicitation and documentation.

Correct Answer: D
