QUESTION 1

The selection of test cases for regression testing..?

- A. Requires knowledge on the bug fixes and how it affect the system
- B. Includes the area of frequent defects
- C. Includes the area which has undergone many/recent code changes
- D. All of the above

Correct Answer: D

QUESTION 2

Which TWO of the following test tools would be classified as test execution tools? [K2]

a.

Test data preparation tools

b.

Test harness

c.

Review tools

d.

Test comparators

e.

Configuration management tools

A.

a and b

B.

c and d

C.

c and e

D.

b and d

Correct Answer: D

QUESTION 3

Which of the following is not a type of incremental testing approach?

- A. Top down
- B. Big-bang
- C. Bottom up
- D. Functional incrementation.

Correct Answer: B

QUESTION 4

What would be a test approach regarding the test design techniques to be applied that would fit an item with the highest risk?

- A. Component testing: decision testing; System testing: exploratory testing
- B. Component testing: decision testing; System testing: decision table testing
- C. Component testing: statement testing; System testing: equivalence partitioning
- D. Component testing: statement testing; System testing: decision table partitioning

Correct Answer: B

Testlet 1

Topic 6, Scenario 6, V1 "Independent Test Team"

XYZ is a Swedish company and the company language is local and all system development documentation is done in the local language.

As a test manager you are currently leading an independent test team of 4 people to system test the payroll functionality. The 4 members of staff of described below:

-

John is one of the senior testers. He has been working for the company the longest and has a good network of contacts. He is confident and tries to bring other team members together to promote team discussions. He is sometimes considered to be manipulative and is often seen to delegate personal work.

-

Sue is a senior tester. She always seems to be busy and often seems to have too much work to do. However, she gets her work done, regardless of what it takes. She is often inclined to worry unduly and sometimes considered to be

argumentative and blunt. She is conscientious and searches out errors and omissions. She always delivers on time.

-

Steve is a tester. He is serious minded and often looks ahead. When he is given problems to solve he often looks at all options before deciding. He needs to be a little bit more diplomatic though in his approach to other people because his attitude often has a negative affect when trying to inspire others. He is good person discuss ideas with. Steve used to work as a business analyst on the payroll department.

-

Vicki is a test analyst. She is the newest member of the team and has been employed for her automation skills. Vicki is shown to be dedicated to automation, having spent the past 5 years developing the necessary skills in automation tools. Her view on testing seems too limited; she believes automation is the only way forward. Both John and Sue are highly experienced at finding defects based on their experience with the system and domain knowledge.

QUESTION 5

Which of the following statements contains a valuable objective for a test team?

- A. Prove that the remaining defects will not cause any additional failures.
- B. Run all of the tests that are defined for the test object as quickly as possible.
- C. Prove that all faults have been identified through thorough testing.
- D. Cause as many failures as possible so that faults can be identified and corrected

Correct Answer: D

QUESTION 6

Evaluate the status of the project against the defined exit criteria. Which of the following options shows the correct status?

- A. Criteria A = OK, criteria B = OK, criteria C = OK
- B. Criteria A = NOT OK, criteria B = NOT OK, criteria C = OK
- C. Criteria A = OK, criteria B = NOT OK, criteria C = NOT OK
- D. Criteria A = NOT OK, criteria B = NOT OK, criteria C = NOT OK

Correct Answer: B

Testlet 1

Topic 6, Scenario 6, V4 "Independent Test Team"

You have for a while been trying to hire a second test automation specialist for your test team. However, you did not have any luck in finding a suitable candidate. So now, you have been asked by IT management of XYZ to forward a proposal with alternative solutions for building an automated regression test suite at system test level over a period of 2 years including needed training and eventual handover to the test team.

QUESTION 7

Incorrect form of Logic coverage is: A. Statement Coverage

B. Pole Coverage

C. Condition Coverage

D. Path Coverage

Correct Answer: B

QUESTION 8

Which of the following test types are non-functional tests?

I) Acceptance test II) Regression test III) Stress test IV) Component test V) Reliability test

A. II, III and V

B. I, II and IV

C. I, III and V

D. III and V

Correct Answer: D

QUESTION 9

What is the purpose of a test completion criterion?

A. to know when a specific test has finished its execution

B. to ensure that the test case specification is complete

C. to set the criteria used in generating test inputs

D. to determine when to stop testing

Correct Answer: B

QUESTION 10

Which option is part of the 'implementation and execution' area of the fundamental test process?

A. Developing the tests.

B. Comparing actual and expected results.

- C. Writing a test summary.
- D. Analyzing lessons learnt for future releases.

Correct Answer: B

QUESTION 11

Which of the following is a key characteristic of informal reviews?

- A. Metric analysis
- B. Kick-off meeting
- C. Low cost
- D. Individual preparation

Correct Answer: C

QUESTION 12

When is use case testing appropriate?

- A. For acceptance testing with user participation
- II. For exhaustive testing of subsystem interaction if the system is specified by use cases III. For testing the interaction between the user and the system depending on user input and system state IV. For tests reflecting real-world use of the system under test
- B. For testing mathematical algorithms if the program flow differs depending on the input given
- C. I, II, III, V
- D. I, III, IV, V
- E. I, III, IV
- F. II, IV

Correct Answer: D

QUESTION 13

Testing should provide sufficient information to stakeholders to make informed decisions about the release of the software or system being tested. At which of the following fundamental test process activity the sufficiency of the testing and the resulting information are assessed?

- A. Implementation and execution
- B. Requirements specification

C. Evaluating exit criteria and reporting

D. Analysis and design

Correct Answer: C

QUESTION 14

What if the project isn't big enough to justify extensive testing..?

A. Use risk based analysis to find out which areas need to be tested

B. Use automation tool for testing

C. Both a and b

D. None of the above

Correct Answer: A

QUESTION 15

For which of the following activities is a static analysis tool NOT useful?

A. Detecting dependencies in software modules

B. Quantitative analysis related to the tests (e.g. tests passed)

C. Enforcement of coding standards

D. Calculation of complexity of the code

Correct Answer: B
