QUESTION 1

A PowerProtect DD appliance with two expansion shelves is being installed in a customer-provided rack.

When cabling the controller to the shelves, what is connected to the host port on the last shelf in the chain?

- A. Expansion port of the upstream shelf
- B. Host port of the controller
- C. Expansion port of the controller
- D. Host port of the downstream shelf

Correct Answer: A

QUESTION 2

What are some possible network bottlenecks for a PowerProtect DD?

- A. Configuration, wire speeds, switches and routers
- B. Connectivity, routing protocols, and configuration
- C. Connectivity, firewalls, and routing protocols
- D. Routing protocols, switches and routers, and wire speeds

Correct Answer: B

QUESTION 3

Which port/protocol is used when using a syslog server to monitor a PowerProtect DD system?

- A. 514/UDP
- B. 2051/TCP
- C. 514/TCP
- D. 2051/UDP

Correct Answer: A

QUESTION 4

An administrator recognizes poor network performance when using CIFS shares from a PowerProtect DD system. The network link utilization is under 100%.

What is the most likely cause of this issue?

- A. TCP window size too small
- B. TCP timeout too small
- C. TCP timeout too large
- D. TCP window size too large

Correct Answer: B

QUESTION 5

DRAG DROP

What is the order of steps to configure DD Boost on a PowerProtect DD appliance?

Select and Place:

Enable DD Boost	STEP 1
Define a local user as the DD Boost User	STEP 2
Create storage units as needed	STEP 3
License DD Boost	STEP 4

Correct Answer:

	Enable DD Boost
	License DD Boost
	Create storage units as needed
	Define a local user as the DD Boost User

QUESTION 6

When the PowerProtect DD system boots up for the first time, the CLI configuration wizard script does not start automatically.

Which command can be used to start the script manually?

- A. configure terminal
- B. config setup
- C. setup config
- D. config wizard

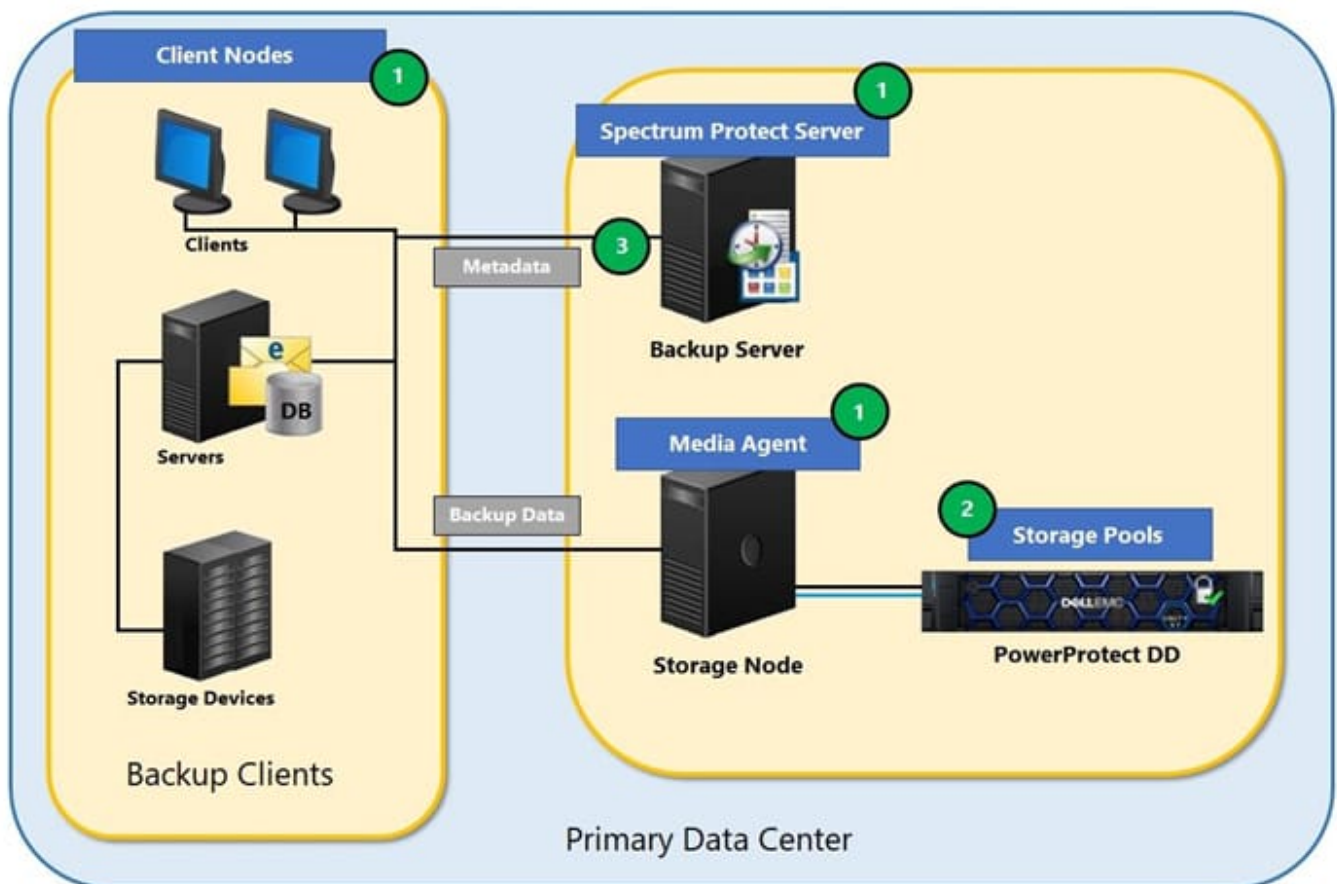

Correct Answer: B

QUESTION 7

DRAG DROP

Refer to the exhibit.

Match each action to its call-out location.

Select and Place:

3	Install Spectrum Protect
1	Configure an NFS export
2	Configure Spectrum Protect to use NFS

Correct Answer:

	1
	2
	3

QUESTION 8

Which are supported compression algorithms in DDOS?

- A. lz, gz, and gzfast
- B. dsp, gz, and lz
- C. rle, lzw, and lz
- D. bmp, lz, and gz

Correct Answer: A

Reference: <https://www.delltechnologies.com/asset/en-ee/products/data-protection/industry-market/dell-emc-powerprotect-dd-series-appliances-hardware-assisted-compression.pdf>

QUESTION 9

An engineer is configuring a PowerProtect DD system for VTL using Fibre Channel. How should the zones be

configured?

- A. Hard zones
- B. Single initiator, multi target
- C. Single initiator, single target
- D. Soft zones

Correct Answer: B

QUESTION 10

DRAG DROP

What is the correct sequence of operations used by the PowerProtect DD DIA in the end-to-end verification process?

Select and Place:

Stores the fingerprints	STEP 1
Writes request from the backup software	STEP 2
Verifies that the checksum that is read back matches the checksum written to the disk	STEP 3
Verifies that DDOS can read data from the disk	STEP 4
Analyzes data for redundancy and stores new data segments	STEP 5

Correct Answer:

	Writes request from the backup software
	Analyzes data for redundancy and stores new data segments
	Stores the fingerprints
	Verifies that DDOS can read data from the disk
	Verifies that the checksum that is read back matches the checksum written to the disk
