QUESTION 1

Which layer of a cloud infrastructure includes tools that optimize resource utilization?

- A. Virtual layer
- B. Physical layer
- C. Orchestration layer
- D. Service layer

Correct Answer: A

QUESTION 2

Which security product enables detection and investigation of threats often missed by other security tools?

- A. RSA Security Analytics
- B. RSA SecurID
- C. RSA Archer eGRC
- D. RSA Adaptive Authentication

Correct Answer: A

QUESTION 3

An organization is using a shared file system to manage virtual machine (VM) files.

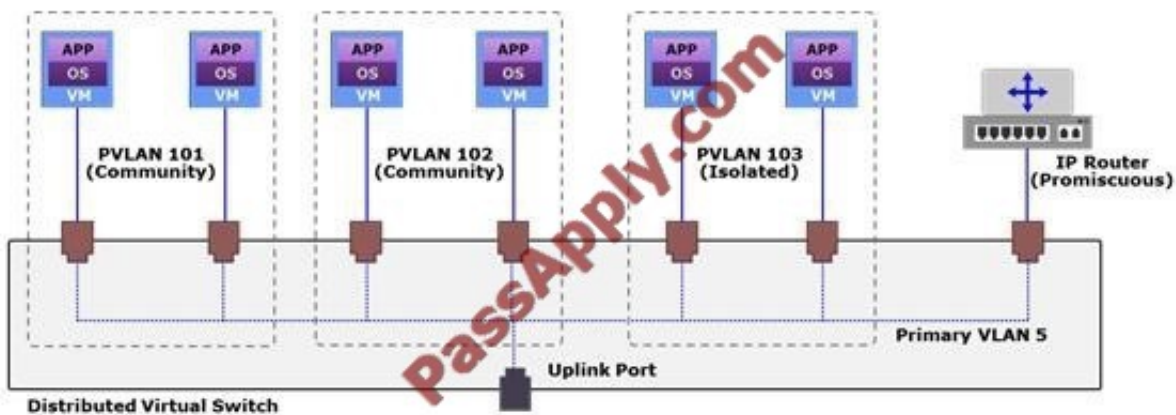

Which statement is true about the file system?

- A. It enables VM files to be stored on remote file servers.
- B. It is installed on the local storage of the computer system.
- C. It enables multiple hypervisors to write to a VM file concurrently.
- D. It is installed on the guest operating system of each VM.

Correct Answer: A

QUESTION 4

Refer to the Exhibit.

With which elements can the virtual machines (VMs) connected to the ports in private virtual LAN (PVLAN) 101 communicate?

- A. With each other and with the IP router only
- B. With the IP router and the VMs connected to the ports in PVLAN 102
- C. With each other, the IP router, and the VMs connected to the ports in PVLAN 102
- D. With the IP router and the VMs connected to the ports in PVLAN 103

Correct Answer: A

QUESTION 5

A storage system is configured with erasure coding. The data is divided into 10 data fragments and three coding fragments. Each fragment is stored on a different disk drive in the storage system.

What is the maximum number of disk drive failures the storage system can tolerate without data loss in this implementation?

- A. 3
- B. 7
- C. 10
- D. 13

Correct Answer: A

QUESTION 6

What is provided by an uplink NIC used in a virtual machine network on a physical compute system running a hypervisor?

- A. Connectivity between a virtual switch and a physical Ethernet switch

- B. Connectivity between a virtual switch and physical NICs
- C. Inter-switch links (ISLs) between virtual switches
- D. Connectivity between a virtual switch and virtual NICs

Correct Answer: A

QUESTION 7

What does CHAP use to enable initiators and targets to authenticate each other?

- A. A secret code
- B. OpenID
- C. OAuth
- D. Permissions

Correct Answer: A

QUESTION 8

Which image represents the correct sequence of steps in a Kerberos mechanism?

- A.
- B.
- C.
- D.
- E. Exhibit A
- F. Exhibit B
- G. Exhibit C
- H. Exhibit D

Correct Answer: A

QUESTION 9

What is a benefit of service orchestration?

- A. Reduced service provisioning time
- B. Enhanced service portability across clouds

- C. Improved conformity to service contract
- D. Automated service portfolio management

Correct Answer: A

QUESTION 10

What describes the operation of the write-through cache in a block-based storage system?

- A. Data is placed in the cache. Data is written to the disk. An acknowledgement for the write is sent.
- B. Data is placed in the cache. An acknowledgement for the write is sent immediately. Data is later written to the disk.
- C. Data is written directly to the disk without being placed in the cache. An acknowledgement for the write is sent.
- D. Data is written directly to the disk. An acknowledgement for the write is sent immediately. Data is later placed in the cache.

Correct Answer: A

QUESTION 11

An administrator plans to perform scheduled maintenance of a computer system in a cluster. There are multiple virtual machines (VMs) running a cloud service on the computer system.

Which solution enables the administrator to perform maintenance without service interruption?

- A. VM live migration
- B. VM backup
- C. VM hardening
- D. VM template

Correct Answer: A

QUESTION 12

Which image represents the correct sequence of steps in an OAuth mechanism?

- A.
- B.
- C.
- D.
- E. Exhibit A

F. Exhibit B

G. Exhibit C

H. Exhibit D

Correct Answer: A
